Concept of Governance (or good Governance)

White Paper on European Governance, July 2001

The Principles of Good Governance

Openness (confidence and trust)

Participation (confidence and legitimacy)

Accountability

Effectiveness

Coherence

"Policies must be effective and timely, delivering what is needed on the basis of clear objectives, an evaluation of future impact and, where available, of past experience."

*Effectiveness and Accountability as (European)
Imperatives*

effectiveness is imperative in the relation between states.

- In international cooperation
- In the relation between the present members of the EU
- In the relation between the member states and the EU itself
- In the relation between the EU/member states and the states that are going to enter the EU

Trust and morality as a guarantee for fair play on the free market and to prevent unequal competition between states.

Accountable:

citizens as stakeholders: politicians, states, union need, 'legitimacy', need to be 'trusted', in democracy can be held accountable for their actions

Accountability is seen as a precondition for effective and legitimate governance
