### **Feedback on Hana Podobová's draft of final essay**

In your draft you perfectly stated what you are supposed to write in your final paper. In addition, from what you wrote in your draft I assume you will focus more on the economic base of the cosmopolitan structure in your final paper. I think you can also consider the impact of the cosmopolitan structure on national culture because the cosmopolitan structure consists of many different cultures and these cultures integrate into each other as time passes by. This situation is dangerous for the local culture. You can include this question, too: How is the local culture of Bratislava affected by the cosmopolitan structure?
