ESS419 International Relations Theory and Energy Security

19th November 2015

Outline

- Assumptions.
- Securitization.
- Security sectors.
- Regional security complex.

Copenhagen school

- **Context:** traditionalists vs. revisionists.
- Analytical framework for study of international security.
- **Currently:** mainstream approach in security studies.

- Based on:
 - (“radically”) idealist ontology
 - interpretative epistemology (discourse analysis)
 - “residual traditionalism”

Security as a social construct

- There is **no “essence”**, no universal feature of security.
 - Security is **socially constructed** and intersubjectively shared.
 - Security is a **self-referential practice**: an issue becomes a security issue only by being labeled as one.
- Focus on **discursive construction** of security issues.

Securitization

- Framing
 - standard (depoliticized)
 - politicized
 - securitized

- Audience acceptance
- Extraordinary measures
- Linkages

Securitization

- **Securitization actors:** ones that declare – via illocutionary speech act – existential threat towards a particular referent object.

- **Functional actors:** ones that significantly affect the dynamic of the security environment (sector).

Speech acts

- **Locutionary act:** the literal meaning of the utterance.
- **Illocutionary act:** the social function of the utterance, for what purpose it is used in a given context.
- **Perlocutionary act:** the effect of the utterance in a given context.

“I warn you, the oil is running out!”

- Locutionary act: made vocal sounds, said that with a Czech accent.
- Illocutionary act: making a warning about (an existential) threat.
- Perlocutionary act: made you (audience) feel insecure (or amused).

degree of widening	modes of widening (modified Weisová 2004)			
	horizontal (sectors)	vertical (referent objects)	values	threat sources
narrow concept	military-political	state	sovereignty, territorial integrity	other states, (non-state actors)
widened concept	societal	nation, societal groups	national unity, identity	(states), nations, migrants, hostile cultures
	economic	state, non-state actors, institutions, individuals	development, subsistence	states, market failures
	environmental	environmental systems, humankind	sustainability, survival, quality of life	states, globalization, humankind

Regional security complex

- Brings back **geography** to IR.
- Structural characteristics:
 - **Boundaries:** differentiation from the rest of the system.
 - **Anarchy:** number of actors in the complex.
 - **Polarity:** distribution of power within the complex.
 - **Social construction:** relationships of amity and enmity.
- **Definition** (Buzan and Waever 2003: 44):
“...set of units whose major processes of securitization, desecuritization, or both, are so interlinked that their security problems cannot be reasonably analyzed apart from one another.”
- **Security constellation:** aggregate of all four levels of analysis.

Map 2. Patterns of Regional Security Post-Cold War

Copenhagen school and energy security

- Energy not considered as “*a distinctive area of security interactions*”.
- Typically included in **an economic sector**.
- Other options: energy sector as a new (**additional**) one? Energy sector as a **supra-sector**? (Palonkorpi 2008)

→ Let's discuss this. 😊

Summary

- **A comprehensive framework** for security analysis.
- Esp. theory of securitization now **part of the mainstream**.
- **The objective:** desecuritization of the debate.
- **Criticism:** state-centric, inconsistent use of constructivist and rationalist concepts, focus mainly on discourse (omits context), conceptual and methodological doubts (audience).
