If this is a persuasive research proposal? How do the authors justify its relevance? Is the justification sufficient?

How well is the research question grounded in the literature and research done so far? Does the literature review contain enough information on previous research and relevant theories or concepts?

What information could help to strengthen the research proposal?

Is the language use good – does the paper “flow” or are there parts that are difficult to understand? Is the tone appropriate for the assignment and the target audience?
