# SECURING USER

Jakub Melichar

National Cyber  
and Information  
Security Agency

N Ú K I B

10110100101011101010001011010010110110010111001011011101  
0100010110100101101100101001010111010100010110100101111  
010101001010111010100010110100101101100101010001110101011

## WHY EDUCATE USER?

---

- 95 % incidents involve human mistake
- Insufficient experience and training
- Two layers of resilience
  - Secure environment
  - Secure behaviour

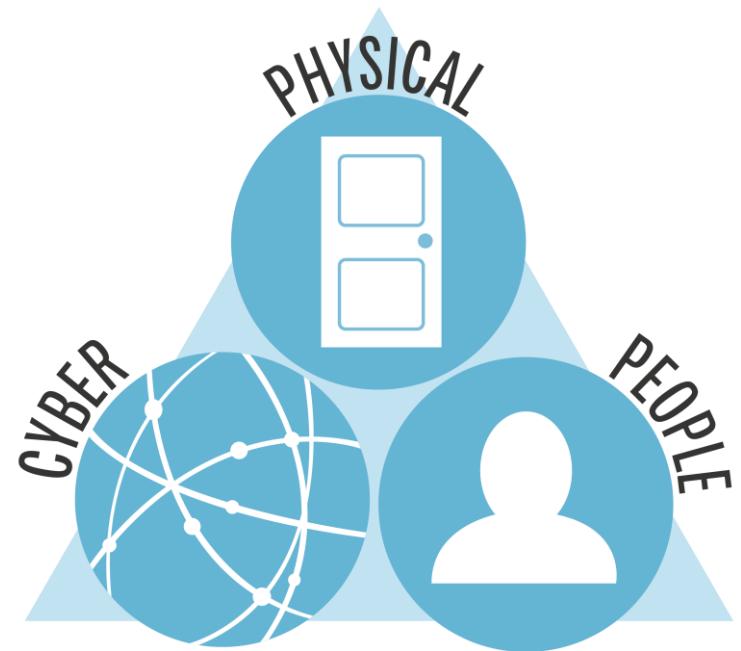

10110100101011101010001011010010110110010111001010110111101  
010001011010010110110010100101011101010001011010010101111  
010101001010111010100010110100101101100101010001110101011

## PHYSICAL SECURITY

---

- Confidentiality breach
- Data theft
- Impersonation
- Malware infection
- Backdoor, long-term access

10110100101011101010001011010010110110010111001010110111101  
010001011010010110110010100101011101010001011010010101111  
010101001010111010100010110100101101100101010001110101011

## SECURITY CRITERIA - CONFIDENTIALITY

- Risk examples
  - Eavesdropping
  - Unintentional publish
- Protection means
  - Access restriction
  - Caution with transfer/publishing
  - Encryption

10110100101011101010001011010010110110010111001010110111101  
01000101101001011011001010010101110101000101101001010101111  
0101010010101110101000101101001011011001010100011101010111

## SECURITY CRITERIA- INTEGRITY

- Risk examples
  - Files manipulation
  - Alteration of data in transit
- Protection means
  - Authentication of data and parties
  - Checksums
  - Reliable communication channels

10110100101011101010001011010010110110010111001011011101  
0100010110100101101100101001010111010100010110100101111  
0101010010101110101000101101001011011001010001110101011

## SECURITY CRITERIA- AVAILABILITY

- Risk examples
  - Data removal
  - Denial of access
- Protection means
  - Accurate access control
  - Secure access restoration
  - Secondary access (communications, device)
  - Backups

10110100101011101010001011010010110110010111001011011101  
0100010110100101101100101001010111010100010110100101111  
0101010010101110101000101101001011011001010001110101011

## STRONG AUTHENTICATION

---

- Memorable, but hard to guess
- password vs. passphrase
- Sufficiently long (13+ symbols)
- **Do not use same passwords for multiple services!**
- Password manager
- 2 Factor Authentication (2FA)

1011010010101101010001011010010110110010111001011011101  
0100010110100101101100101001010111010100010110100101111  
0101010010101110101000101101001011011001010001110101011

## WEB & SECURITY

---

- Check URL in links
- Do not visit untrustworthy sites
- Do not open unknown downloads
- Careful with plugins
- Careful with URL shorteners (<https://goo.gl/GJ7gd>)
  
- https:// (SSL/TLS security)
  - Domain authentication
  - Encrypted channel
  - Necessity for private activities

101101001010110101010001011010010110110010111001010110111101  
01000101101001011011001010010101110101000101101001010101111  
010101001010111010100010110100101101100101010001110101011

## WIRELESS SECURITY

---

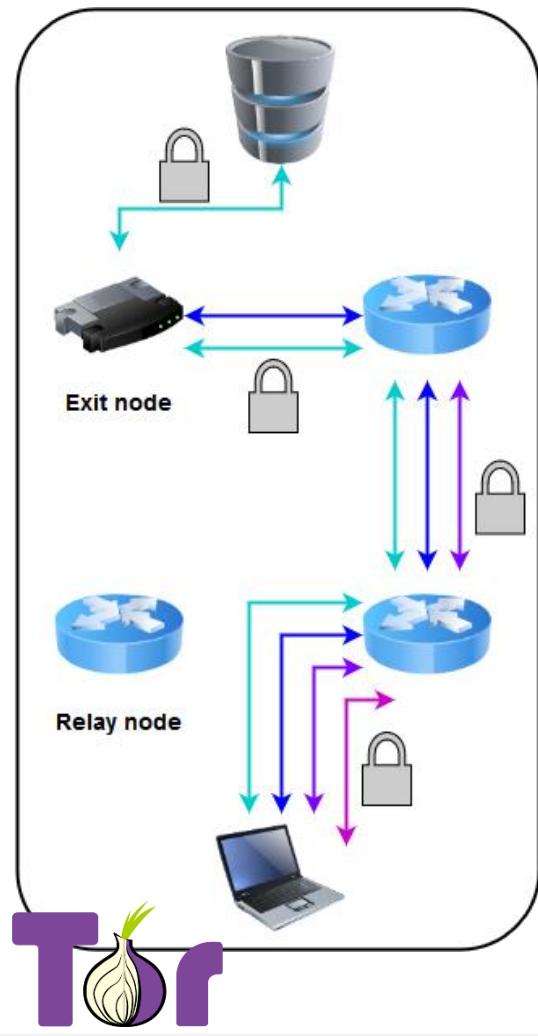

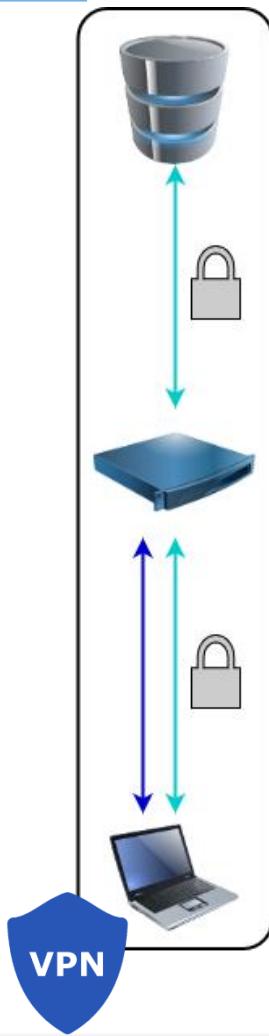

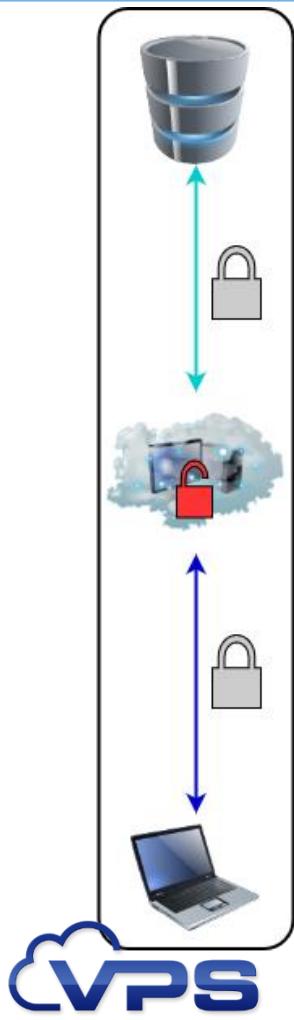

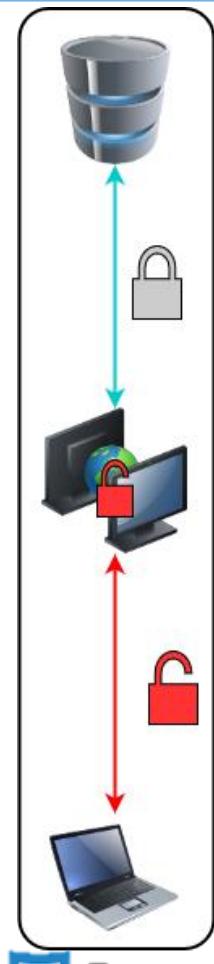

- Do not use open WiFi networks
  - Not-encrypted data transmission
  - Anyone in your vicinity can see your traffic
- Careful with public WiFi networks
- Secure personal hotspot - WPA2-PSK/AES (WPA3 late 2018)
- **Remove unused networks**

101101001010110101010001011010010110110010111001010110111101  
0100010110100101101100101001011101010001011010010101111  
01010100101011101010001011010010110110010100011101010111

## WEB & ANONYMITY

101101001010111010100010110100101101100101110010110111101  
0100010110100101101100101001010111010100010110100101111  
01010100101011101010001011010010110110010100011101010111

## EMAIL & SECURITY

---

- Sever personal and work communication
- Do not open unwanted emails
- Do not open suspicious attachments
- Always make sure you logged out of webmail
- For sensitive matters use encryption
- **Reliable origin only with digital signature**

10110100101011101010001011010010110110010111001010110111101  
010001011010010110110010100101011101010001011010010101111  
010101001010111010100010110100101101100101010001110101011

## SYSTEM SECURITY

---

- **Protect user with authentication**
- **Lock your screen**
- **Do not use privileged account**
- Update system & apps
- Storage encryption
- Security software
- Regular backups
- Disable interfaces
- Do not plug in unknown devices

1011010010101110101000101101001011011001011100101011011110  
010001011010010110110010100101011101010001011010010101111  
010101001010111010100010110100101101100101010001110101011

## GET YOUR HABITS RIGHT

---

- Regular security revision
  - Change your passwords
  - Check security settings
  - Create backups
- Think through the situation when...
  - You forget your password
  - Lose your means of authentication (phone, token, certificate)
  - Someone else is controlling your account
- **CHALLANGE EVERYTHING THAT IS BEING SERVED TO YOU**

10110100101011101010001011010010110110010111001011011101  
0100010110100101101100101001010111010100010110100101111  
010101001010111010100010110100101101100101010001110101011

# THANK YOU FOR YOUR ATTENTION
