- Integrity
- Availability

# Main state activities in cyberspace

---

- Espionage
- Sabotage
- Censure
- Information war/propaganda
- Demonstration of power
- Support of conventional attack

# Cyber espionage vs. Sabotage

---

## Espionage

- Obtaining strategically sensitive or strategically important information from individuals or organizations by using or targeting IT means. It is used most often in the context of obtaining a political, economic or military supremacy.

## Sabotage

- Deliberate action aimed at weakening a polity or corporation through subversion, obstruction, disruption or destruction. In a workplace setting, sabotage is the conscious withdrawal of efficiency generally directed at causing some change in workplace conditions.

# Cases

# Censure

---

- Commonly link with non-democratic regime
- Halal internet vs. forbidden applications
- Using different ways from residents

INTERNET HALLAL

# Demonstration of power

---

Estonia (2007) and Latvia (2008)

- Similar modus operandi (DDoS, defacement and malware)
- Russian Federation – absence of direct evidence

Estonia - due to the removal of the bronze statue of an unknown Soviet soldier

- for RF symbol of freedom vs. symbol of occupation

Latvia – main reasons: law about non-acceptance Nazi and Soviet symbols, planning of American antimissile defense

# Russia

## Support conventional attack

Abkhazia

Georgia (2008)

- In the background of a five-day war
- Target: destroying of active communication and information
- Methods: defacement, DDoS, DDOS, malware
- Patriotic hacking (nationalistic mode in society)
- Russian Business Network
- Attacks also on RF

Black

**1982: trans-siberian sabotage**

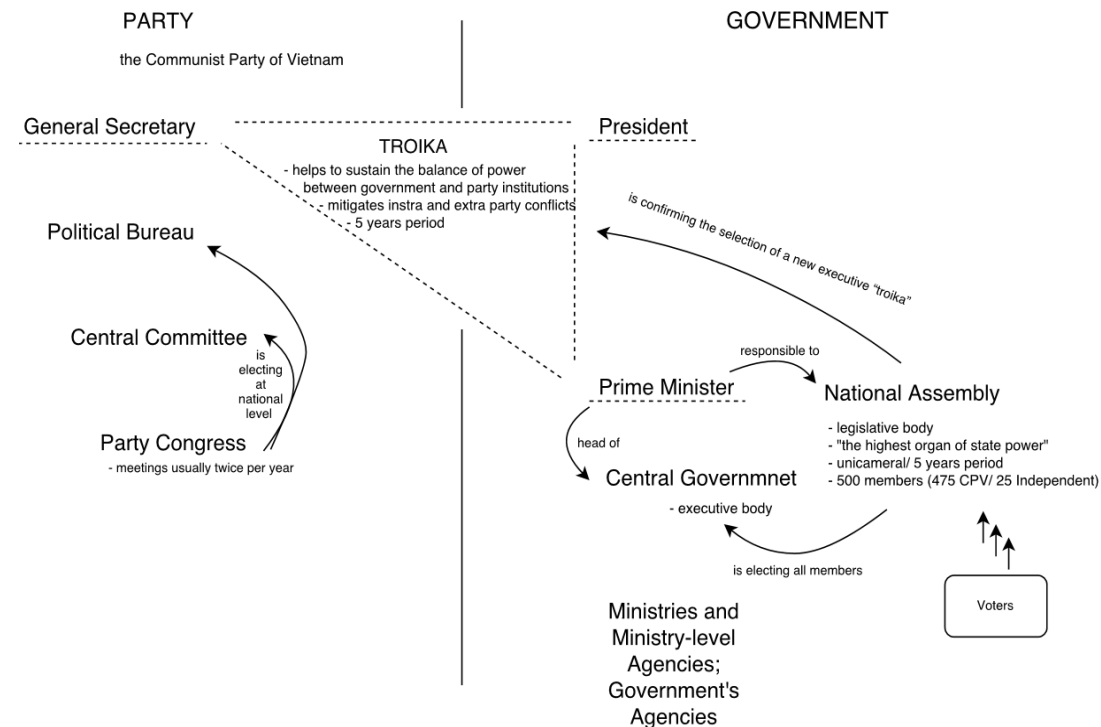

# Case study – Việt Nam

# Political and historical background I.

- one-party system state represented by *the Communist Party of Vietnam (CPV)*
- moves to market-oriented socialism

- 1994 – domain .vn has been registered
- 1997 - system administration VNPT
- Telecommunication - Viettel

# Political and historical background II.

- *The Government formed the National Internet Steering Board*
- penetration rate of 66,3 percent
- only companies that are state-owned can operate as *Internet access service providers* or *Internet exchange providers*

# Place of cyberspace today

- The continuation of the rule CPV
- Internet as a place for foreign investments
- Manipulation of information

# Important actors

## *The Ministry of Information and Communication*

- Authority for regulation, publication (newspapers) and telecommunication, IT,...
- *the Authority of Information Security*
- *the Vietnam Computer Emergency Response Team (VNCERT)*

## *The Ministry of Public Security*

- New Cyber Security Law

## *The Ministry of National Defense*

- *the Cyber Space Operations Command* (January 2018) „help with the state surveillance for protection of the state sovereignty“
- *Unit/Force 47* (10 000 members)

# Surveillance I.

- *Freedom House* (2018) - Net Freedom Status: not free
- Internet as a tool of destabilization for CPV

Article 69 of *the Constitution of the Socialistic Republic of Vietnam* (1992)

X

Article 79, 88 and 258 of *the Penal Code* (1999)

Article 331 of *the Criminal Code* (2015)

# Surveillance II.

- „propagandistic activities against CPV“
- „threaten of democratic freedoms and the interests of the state“
- „providing activities damaging the state administration“

## Result:

- In 2017 - arresting 21 bloggers and activists
- Penalties 9 - 15 years

# Surveillance III.

- Using applications such as Facebook and Instagram in Vietnam is possible (it The Governmnet si able to block these networks in key moments in recent years – for example May 2016)
- Removing „toxic“ content form YouTube and Facebook

**Bộ GD&ĐT yêu cầu không để học sinh viết, vẽ vào sách giáo khoa**

Ngày 20/9/2017, Bộ GD&ĐT đã yêu cầu các địa phương, đơn vị không để học sinh viết, vẽ vào sách giáo khoa.

# Cyber campaigns

## *APT32 (the OceanLotus Group -APT-C-00)*

- the most sophisticated groups of its kind in the region
- since 2012
- activities are associated with attacks targeting *the Association of Southeast Asian Nations (ASEAN)*, human rights organisations, civil society organisations and also organisations across multiple industries and foreign governments, dissidents, and journalists
- Until now, it has not been possible to associate the group cyberespionage activity with the Vietnamese government directly, but...

## Other actors in region

- *Chinese 1937CN Team*
- *Group from North Korea (APT37)*

# Current situation

- The Cyber Security Law

- protests from public (restrictions on freedom of expression)

- protests from members of government (economic limitations)

- conclusion – The dragon is here

- Efficiency: 1.1.2019

- Accepted: 12.6 *Nguyen Thi Kim Ngan, chairwoman of the Assembly, said the protesters might have misunderstood the nature of the bill.*

*“People should stay calm, believe in the decisions of the party and the state, especially in the fact that the National Assembly is always listening to the people’s opinions when discussing the bills,” Ngan said.*

# Conclusion

- Vietnam does not focus on the survival of state as such, but the state is here symbolised by the regime

There can't be a 1% if everyone is poor
