

Group Discussion lead.

Following the introduction of the material by the instructor, the assigned students will be responsible for developing, asking, and leading some discussion questions regarding the reading material for that chapter. This can take the form of interactive or creative ways to engage the class or at a minimum questions on a PPT file. The group should work together as a team on aspects of the project (not just divide up the chapter half-half, etc.). Points will be awarded jointly unless there is clear evidence of asymmetry in work effort.
