

Cybersecurity

Part 2: Non-state actors

AH, THE INTERNET...
... ONE OF THE
GREAT SALES
TOOLS OF OUR
TIMES.

DANZIGER

NYTS/CWS Aug 20 2014 (6103)

What is terrorism?

- extortion?
- using threats and fear to get stuff?
- logic of terrorism

Typical features

- violence, damage, fear
- goal and representation
- publicity
- repeatability, campaign
- symbolism, spectacle

Challenges

- poor understanding among media and politicians
- getting better only very slowly
- rare overlap of politics and IT

Cyberterrorism is...

- massive differences of opinion:
 - “terrorists on the internet”
 - recruitment, guides, propaganda, communication, planning
 - physical attacks on data infrastructure

- defined by:
 - preparation/means/target?

A MESSAGE TO THOSE IN THE FIELD OF MEDIA

By Sheikh Anwar Al-Awlaki

There is no freedom of expression for those who
expose the crimes of America and its agents.

WikiLe

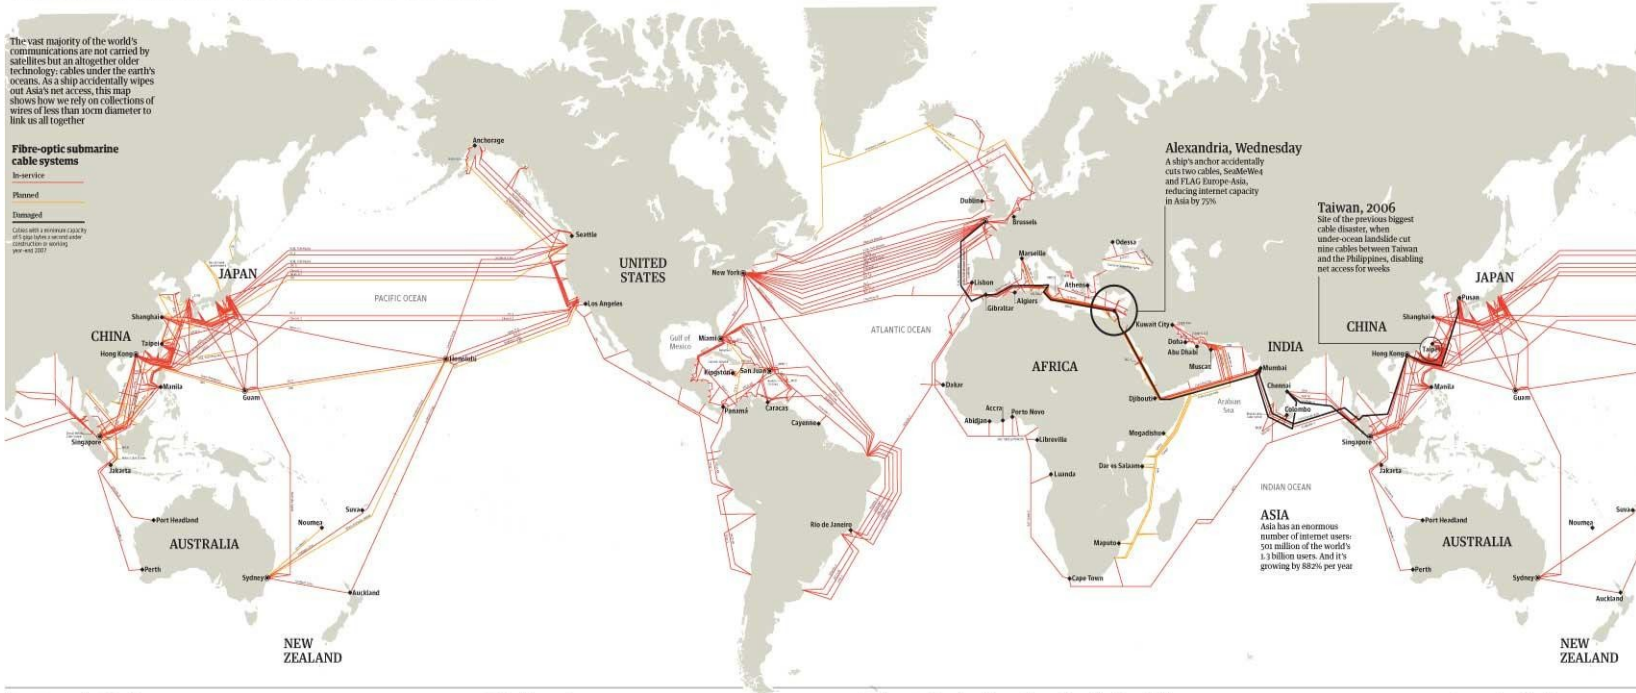

The internet's undersea world

The vast majority of the world's communications are not carried by satellites but an altogether older technology: cables under the earth's oceans. As a ship accidentally wipes out Asia's net access, this map shows how we rely on collections of wires of less than 10cm diameter to link us all together

Fibre-optic submarine cable systems

- In-service
- Planned
- Damaged

Cables with a maximum capacity of 100 Gbps are under construction or working (see page 20)

Alexandria, Wednesday

A ship's anchor accidentally cuts two cables, SeaMeWe3 and FLAG Europe-Asia, reducing internet capacity in Asia by 75%

Taiwan, 2006

Site of the previous biggest cable disaster, when under-ocean landslide cut nine cables between Taiwan and the Philippines, disabling net access for weeks

Internet users affected by the Alexandria accident

The main countries affected in Wednesday's event

World cable capacity

Submarine cable operators light their own capacity on their systems to sell bandwidth to other carriers. Carriers buy extra capacity, mainly to hold in reserve. On the trans-Atlantic route, 80% of the bandwidth is purchased, but only 29% is used

Capacity in terbytes a second

What makes up "used capacity"?

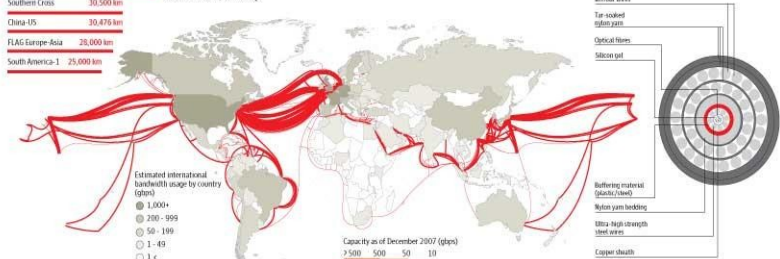

The longest submarine cables

The SeaMeWe-3 system from Norden in Germany to Keeloe, South Korea connects 32 different countries with 39 landing points

SeaMeWe-3	39,000 km
Southern Cross	30,500 km
China-US	30,476 km
FLAG-Europe-Asia	29,000 km
South America-1	25,000 km

The world's cables in bandwidth

The first intercontinental telephony submarine cable system, TAT-1, connected North America to Europe in 1958 and had an initial capacity of 64,000 bytes per second. Since then, total trans-Atlantic cable capacity has soared to over 7 trillion bps

Cross-section of a cable

Cables of this strength are typically 100 mm in diameter and weigh over 10,000 kilograms a kilometer. In deeper waters, lighter and less insulated cables are used

History

- first ideas towards the end of the Cold War
- quick growth in 90s (+ Y2K)
- explosion (figurative) after 9/11

Cases?

- Queensland “cyberterror”, 2000
- StuxNet, 2010
- Lodz, 2008
- Anonymous and LulzSec?
- Estonia 2007 and Georgia 2008?

Reality

- imagined and unfulfilled concept
- “nothing is happening”
 - not really true, things are happening all the time, but it is not cyberterrorism
- why?
- required combination of skills, motivation, resources
 - its too hard to match effectiveness of real terrorism

Future of cyberterrorism

Would we recognize it? What should it look like?

Hacktivism

HACKTIVIST

WITH A

NOBLE

CAUSE

NO VIOLENCE REQUIRED

Hacktivism

- disrupting networks, misusing systems
- support ideology, political goal, etc.

- political activism adapted to the internet in 21st century

This domain has been seized by Anonymous under section #14 of the rules of the Internet.

Greetings HBGary (a computer "security" company),

Your recent claims of "infiltrating" Anonymous amuse us, and so do your attempts at using Anonymous as a means to garner press attention for yourself. How's this for attention?

aaronbarr

Today we taught everyone a lesson. When we actually decide to bite back against those who try to bring us down, we bite back hard. #gameover

- Stratfor
- MegaUpload, ACTA
- arrests
- Syria, DPRK, Ukraine

Proudly presents...

Anti-sec. We're a movement dedicated to the eradication of full-disclosure. We wanted to give everyone an *image* of what we're all about.

Full-disclosure is the disclosure of exploits publicly – anywhere. The security industry uses full-disclosure to profit and develop scare-tactics to convince people into buying their firewalls, anti-virus software, and auditing services.

Meanwhile, script kiddies copy and paste these exploits and compile them, ready to strike any and all vulnerable servers they can get a hold of. If whitehats were truly about security this stuff would not be published, not even exploits with silly edits to make them slightly unusable.

As an added bonus, if publication wasn't enough, these exploits are mirrored and distributed widely across the Internet with a nice little advertisement embedded in them for the crew or website which first exposed the vulnerability to the public.

It's about money. While the world is difficult to change, and money will certainly continue to be very important in the eyes of many, our battle is that of the removal of full-disclosure for the purpose of making it harder for the security industry to exploit its consequences.

It is our goal that, through mayhem and the destruction of all exploitive and detrimental communities, companies, and individuals, full-disclosure will be abandoned and the security industry will be forced to reform.

How do we plan to achieve this? Through the full and unrelenting, unmerciful elimination of all supporters of full-disclosure and the security industry in its present form. If you own a security blog, an exploit publication website or you distribute any exploits... "you are a target and you will be rm'd. Only a matter of time."

This isn't like before. This time *everyone* and *everything* is getting owned.

Signed: **The Anti-sec Movement**

Anonymous - #opSyria

More than 100,000 people have been killed in the conflict in Syria
Anonymous has been actively involved and contributed towards the uprisings in
Egypt, Lebanon and Tunisia.

For far too long, we have witnessed the barbaric, unjust and brutal treatment of the Syrian people. Time and time again we have observed these war crimes. From the chemical weapons and scud missile attacks employed by Bashar al-Assad, to the growing number of questionable and violent actions taken by some of the opposing groups, it is clear that whoever the citizens may rally behind, their safety and security is ultimately transient and not guaranteed. The accumulation of war crimes has irritated our nest and the time has now come for us to take action.

Dictator Assad and elements within the Syrian Opposition, you now have the undivided attention of Anonymous. You are failing your country, you are failing your people, your country faces following the examples of your Egyptian, Lebanese and Tunisian counterparts. Our request is a simple one; cease fire immediately and stop the violence towards the innocent or you will feel our wrath.

To the people of Syria, know that Anonymous stands with you in this war against terror.

We vow to do everything we can to hinder war crimes played against you. We will raise awareness in every manner we can. We will assist you in putting an end to this carnage. We have put together the Anonymous Syria Care Package which contains instructions in Arabic and English that will aid you in areas of conflict. We encourage you to download this information, keep it on your person and share it with your fellow Syrians to the best of your ability.

We are with you in this war. No matter how alone and abandoned you feel, no matter how many atrocities you face - know that there are many of us working around the clock, concerned and attempting everything we can to catalyse change. We are oceans far from you, but closer than the jugular vein. We, together, can conquer adversity.

We are Anonymous.
We are Legion.
We do not Forgive.
We do not Forget.

Dictator Assad, oppressors of the Syrian people,
EXPECT US!

The spectrum of hacktivism

- can be for anything
 - nationalistic
 - anarchistic
 - religious
 - vigilantism
 - ecological
- dominant form is a vague leftwing anarchism (Anonymous)

How dangerous is it?

- compared to other threats, hacktivism is not especially dangerous
 - attacks are usually short
 - and more importantly – public!
- hacktivism can also act as „immunization“

Structure and organization

- not hierarchical
- „adhocracy“
- loose network structure
- often even individual or separate groups in conflict with one another (see th3j35t3r)

th3j35t3r

The connection to **www.cia.gov** was interrupted.

Here are some suggestions:

- [Reload](#) this web page later.
- Check your Internet connection. Reboot any routers, modems or other network devices
- Add Google Chrome as a permitted programme in your firewall or antivirus software's security programme, try deleting it from the list of permitted programmes and adding it again.
- If you use a proxy server, check your proxy settings or contact your network administrator to ensure the proxy server is working. If you don't believe you should be using a proxy server, adjust your proxy settings: **Tools** > **Options** > **Under the Bonnet** > **Change proxy settings...** > **LAN Settings** > **Use proxy server for your LAN** checkbox.

Error 101 (net::ERR_CONNECTION_RESET): The connection was reset.

» ACTA

ACTA staví zájmy vybraných mediálních korporací nad práva člověka. Kvůli ochraně duševního vlastnictví vybraných subjektů se my všichni musíme vzdát části svých práv.

ACTA předjímá, že každý z nás je zlodějem. Schválením ACTA nás námi volení zástupci zbavují soukromí ve jméno ekonomických zájmů kasty privilegovaných. Budeme monitorováni a kontrolováni v reálném i virtuálním světě.

ACTA legalizuje privilegované postavení úzké skupiny subjektů na trhu. ACTA klade všem lidem za povinnost chránit cizí duševní vlastnictví a to na vlastní náklady, ale prostředky, které určí ACTA. Budeme to tedy my, spotřebitelé, kteří zaplatí za ochranu duševního vlastnictví jiných.

Budeme to tedy my. Měli bychom okradeni pod záminkou podezření. Je my sami jure knaží! Budeme okradeni o svá práva, majetek i důstojnost.

» Vzkaz politikům

Naši přátel draží politici, lidé nebudou volit někoho, kdo nehájí jejich zájmy.

» Vzkaz médiím

Nejme teroristé. Neutíkájeme nevinnými a bezbrannými. Naším úmyslem není vyvolávat chaos bez příčiny, ale bránit svět před tyraní, kterou mu nyní chtějí vnést vlády a podnikatelské lobby.

Vzkaz pro prezidenta

Vážený pane prezidente,
dne 9. 11. 2010 se uneseš vláda na tom, že Vám doporučí zmocnění zástupce naší republiky k podpisu smlouvy veřejně známé jako ACTA.

Já v minulosti jste utíkal, že se říká vlastním úsudkem i svědomím. Zmocněním zástupce ČR k podpisu smlouvy ACTA vyjadřujete svůj souhlas a omezením práv a svobod občanů České Republiky.

Budoucnost našeho státu není dražena, a proto vás vyzýváme k vyjádření vašeho víru a nápravě. Předovzte, aby sáh našich životů distavaly ekonomická zájmy jiných!

Greetings HBGary (a computer "security" company).

Your recent claims of "infiltrating" Anonymous amuse us, and so do your attempts at using Anonymous as a means to garner press attention for yourself. Now's this for attention?

You brought this upon yourself. You've tried to bite at the Anonymous hand, and now the Anonymous hand is bitch-slapping you in the face. You expected a counter-attack in the form of a verbal brawl (as you so eloquently put it in one of your private emails), but now you've received the full fury of Anonymous. We award you no points.

What you seem to have failed to realize is that, just because you have the title and general appearance of a "security" company, you're nothing compared to Anonymous. You have little to no security knowledge. Your business thrives off charging ridiculous prices for single things like VPNs, and you don't deserve praise or even recognition as security experts. And now you turn to Anonymous for fame and attention? You're a pathetic gathering of media-whoring money-grabbing syzygents who want to reel in business for your equally pathetic company.

Let us teach you a lesson you'll never forget: you don't mess with Anonymous. You especially don't mess with Anonymous simply because you want to jump on a trend for public attention, which Aaron Barr admitted to in the following email:

"But it's not about them... it's about our audience having the right impression of our capability and the competency of our research. Anonymous will do what every they can to discredit that, and they have the mic so to speak because they are on Al Jazeera, ABC, CNN, etc. I am going to keep up the debate because I think it is good business but I will be smart about my public responses."

You've clearly oversteered something very obvious here: we are everyone and we are no one. If you swing a sword of ridicule into Anonymous' boards, we will simply swing it. You cannot break us, even though you have clearly tried...

You think you've gathered full names and home addresses of the "higher-ups" of Anonymous? You haven't. You think Anonymous has a founder and various co-founders? False. You believe that and they will tell you the information you've found to the FBI? False. Now, why is this one false? We've seen your internal documents, all of them, and do you know what we did? We laughed. Most of the information you've "extracted" is publicly available via our IRC networks. The personal details of Anonymous "members" you think you've acquired are, quite simply, nonsense.

So why don't you sell this information to the FBI like you intended? Because we're going to give it to them for free. Your gloriously fallacious vend can be a wonder for all to enjoy. As will all of your private emails (more than 46,000 beautiful for the public to enjoy). Now as you're probably aware, Anonymous is quite serious when it comes to things like this, and usually we can elaborate gratuitously on our reasoning behind operations, but we will give you a simple explanation, because you seem like primitive people:

You have blindly charged into the Anonymous hive, a hive from which you've tried to steal honey. Did you think the bees would not defend it? Well here we are. You've angered the hive, and now you are being stung.

It would appear that security experts are not expertly secured.

We are Anonymous.
 We are legion.
 We do not forgive.
 We do not forget.
 Expect us " always.

Quick 'n' dirty way to read the emails in a human-readable format:

1. Get a client. <http://www.mozilla.com/en-US/thunderbird/>
2. Get a file renaming tool. <http://www.baig.com/renamitool.php> (Windows)
3. Rename all the mail files so that they have a .mlt extension.
4. Drag & drop them into Thunderbird.
5. Enjoy.
