Abstract

As we know, the medium density fiberboard prepared from natural sticky matter which is generated from the lignin activated through laccase-mediator system has been an effective solution to the problem of free formaldehyde in forestry industry. Therefore, based on the premier experiments, this paper has studied the carbon reservation in medium density fiberboard through artificial accelerated aging and drew the conclusion that the carbon reservation in medium density fiberboard prepared from natural sticky matter which is generated from the lignin activated through laccase-mediator system has been an effective solution to the problem of free formaldehyde in forestry industry. Furthermore, when the variation during artificial accelerated aging is relatively small, the variation of chromatic value bears evident relationship with the variation of carbon reservation. This is because the laccase-mediator system has a high catalytic activity and the smaller the initial concentration of laccase, the higher the catalytic activity of laccase. The initial concentration of laccase has a great influence on the carbon reservation of medium density fiberboard prepared with laccase-mediator system varies little, and decreases slightly with the increase of the initial concentration of laccase.

This paper is a commentary on Lyons, K. and Westoby, P. (2014) Carbon colonialism and the new land grab: Plantation forestry in Uganda and its livelihood impacts, *Journal of Rural Studies*, 36, 13–21. © 2016 Elsevier Ltd. All rights reserved.

In volume 36 of this journal (2014, pages 13–21), **Kristen Lyons and Peter Westoby published** a paper entitled “Carbon colonialism and the new land grab: **Plantation forestry in Uganda and its livelihood impacts**”, in which they criticise the activities by the Norwegian company Green Resources in two pine and eucalyptus plantations in Uganda. We have studied one of these plantations (Kachung). Based on the information we have, it appears to us that recent changes in forest legislation and policy have therefore opened the way for private investments in forestry. **Both Bukaleba and Kachung benefit** from selling emissions reductions on the global carbon market. The screenshot shows the Microsoft Word interface with the 'REFERENCE' ribbon selected. A yellow arrow points to the 'Insert Citation' button in the ribbon. The document text reads 'Citují publikace zabývající se lesnictvím.' Below the ribbon, there are two yellow text boxes with black text providing instructions on how to insert citations.

Poté, co máme nainstalovaný plugin do MS Wordu a stažené záznamy do Mendeley, se můžeme pustit do vkládání citací (odkazů na použitou literaturu) v textu naší práce.

Před tím, než vložíme citaci do textu, umístíme kurzor na místo, v němž se má citace zobrazit. Poté v panelu Reference klikneme na ikonu pro vložení citace „Insert Citation.“

The screenshot shows the Microsoft Word interface with the Reference tab selected. The ribbon includes options like 'Insert Citation', 'Insert Bibliography', and 'Refresh'. A yellow arrow points to the 'Insert Citation' icon. The document text contains a paragraph with a citation: 'Citují publikace zabývající se lesnictvím (Fischer et al. 2016). Nyní potřebuji odkázat na více publikací najednou (Walters a Lyons 2016, s. 732; Reynolds 2007; Zhang et al. 2016). Reynolds je nově vyzkoumané metody sledování.' Another yellow arrow points to the author name 'Reynolds'. Below the text, there are two yellow callout boxes with instructions in Czech. The first box explains that the author's name is part of the text and only the year and page number should be used. The second box instructs to place the cursor at the author's name and click the 'Insert Citation' icon.

**Dále je zde ještě možnost, jak postupovat v případě, že příjmení autora je součástí textu a my potřebujeme za něj uvést pouze rok vydání a případně i číslo citované strany.**

**Kurzor umístíme za příjmení autora a klikneme na ikonku „Insert Citation“.**
