## WHEN IT COMES TO PRESENTATIONS

### USE OF CAPITAL PUNISHMENT IN THE UNITED STATES

In this presentation we would like to introduce one of the most discussed issues of today's society – persistent use of the capital punishment in the United States. Although this kind of punishment is prohibited in most of democratic countries, there are many states in the United States still using that. First of all we would like to outline a historical development of the highest form of penalty, after that we will focus on the methods of capital punishment. Finally we will describe the basic steps of the legal process. Many people claim that this penalty shouldn't be used in the U.S. anymore because it is in contrast with protecting human rights. So the main goal of this presentation is to find out genuine reasons of keeping that. We hope that this presentation may help you to form more objective opinion on this matter.

*Reaction: "In this case, it is one of the most discussed topics in the field of criminal law or law in general. I think no one can convince one or the other point of view, I think everyone already born with her view on what is right. As a topic in our lesson is completely appropriate and certainly appears more or less loyal defenders one or the other view."*

## INTRODUCTION TO INTERNATIONAL BUSINESS LAW

Our group is planning to focus the presentation on the most significant problems of today's international business law and to provide the audience with an overview of its nature and structure. The beginning will contain an introduction to international private law. After that we would like to discuss basics of European Union law and look a little bit deeply into the current legislation. That is the reason why another part of our presentation will be concentrated on understanding and application the provisions of the ECO – Regulation and EEX Regulation. Further more our intention is to introduce the audience characteristics of the Convention of the International Sale of Goods, Contract of Carriage and Incoterms. All three of us hope that the audience will gain some new information from our presentation and that it will be helpful for future studies of business law in general.

*Reaction: "I believe that this is a very interesting topic. But it is quite complicated, so I wondered whether the group can implement everything described in the abstract to the presentation, and whether it will be easy to understand and comprehensive. I look forward to widen my horizons of international business law."*

## UNEMPLOYMENT OF UNIVERSITY GRADUATES IN THE CZECH REPUBLIC & EU

In this paper, we would like draw your attention to the problem which is connected with the unemployment of young people in the Czech republic and in the Europe. The economic crisis are one of the biggest problem today. This problem has influence on the unemployment generally. We will aim on reasons of unemployment young people, defense against unemployment and we will reveal the graphs of unemployment in Europe in the last 3 years. In our presentation we will show connection between the education and unemployment. We would like to show how important this connection is. We will show you that economic crisis have a big influence on unemployment of university graduates in the all EU states. We will summarize main differences between this special type of unemployment in the Czech Republic and EU.

*Reaction: "From my point of view this is probably the best topic of all, because all students are interested in their chances of getting the job they want after they leave school. Despite this tendency not many people are informed about current situation in the field they want to pursue their careers in, because when people try to find something connected with this problem they usually find only partial and vague information. I'm expecting this to be improved by seeing the presentation."*

**ON TUESDAY AT 11.10 AM! YOU ARE WELCOME!**
