

Food for thought (after the session)

1. Should EU access to ECHR? What are pros and cons?
2. Why CJEU sees investment treaties among MS as incompatible with EU law? What are the consequences? What about investment treaties with third parties (e.g. India)? What is the role of new megaregional treaties, like CETA?
3. What is the overall picture of the relation of EU law and international law? Is EU law “a kind of international law”? Alternatively, is EU law a system of law independent on both international and domestic law?
