

## **MEDICAL EQUIPMENT**

### *Match I.*

1. defibrillator	a piece of material used to cover and protect a skin injury
2. operating table	an apparatus used to induce artificial respiration
3. respirator	a medical instrument for listening to somebody's heart or breathing
4. sphygmograph	an instrument for measuring blood pressure
5. dressing	a hospital bed on wheels used for transporting patients who cannot walk
6. sphygmomanometer	a machine that is used to correct heart fibrillation (= rapid irregular contractions of heart muscle fibres) through electric shocks
7. stethoscope	an instrument that produces a line recording the strength and rate of somebody's pulse
8. bedpan	the surgical knife
9. trolley	can be raised, lowered and tilted in any direction to allow the best access to the patient
10. scalpel	a flat dish used as a toilet by people who are too ill to get out of bed

### *II.*

suction apparatus	gáza	gloves	berla
cotton wool	kleště	probes	nůžky na stehy
gauze	nosítka	tweezers	zvedák pro pacienta
(sticking) plaster	odsávací přístroj	crutch	rukavice
forceps	bažant	hoist	pinzeta
stretcher	náplast	Zimmer/walking frame	sondy
urinal	vata	stitch cutter	chodítko
