

TERAPIE A PREVENCE PARAZITÓZ

PETRA KUBÁČKOVÁ
OKM

STŘEVNÍ PARAZITÓZY

- *E. HISTOLYTICA*

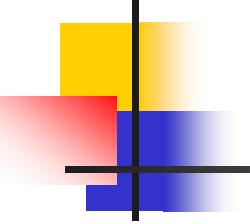

metronidazol, ornidazol, tetracyklin

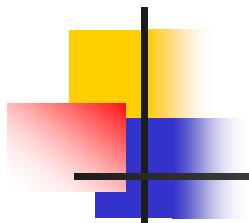

- *GIARDIA INTESTINALIS*

metronidazol, ornidazol, albendazol,
nitazoxanid

- *CRYPTOSPORIDIUM SP.*

paromomycin, spira-, azi-, klaritromycin,
nitazoxanid

- 
- *ENTEROBIUS VERMICULARIS*
mebendazol, albendazol
 - *ASCARIS LUMBRICOIDES, MĚCHOVCI*
mebendazol, albendazol
 - *TOXOCARA SP.*
albendazol, kortikoidy u oční formy
 - *TAENIA SP., HYMENOLEPIS NANA*
praziquantel, albendazol

MALÁRIE

- terciána a kvartána

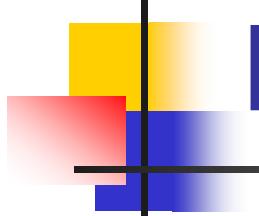

chlorochin + primachin

- tropika

meflochin, chinin, atovaquon/proguanil

- maligní tropika

chinin + doxycyklin nebo klindamycin

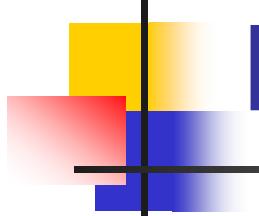

LEISHMANIÓZA

- kožní forma

lokální + celková (chirurgie, ketokonazol,
terbinafin, paromomycin, amfotericin)

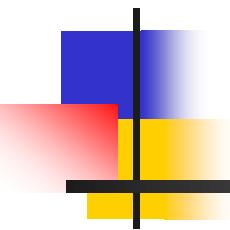

- viscerální forma

amfotericin v lipidovém nosiči

PREVENCE PARAZITÓZ

- osvěta
- expoziční profylaxe
- chemoprofylaxe

DĚKUJI ZA POZORNOST
