ANATOMICAL BASIS OF ERECTION

Parasympathetic stimulation

– relaxation of smooth muscle in cavernae and aa. helicinae, compression of venous plexuses by bulbospongious and ischiocavernous muscles → erection

Sympathetic stimulation

- contraction of smooth muscle of aa. helicinae, relaxation of bulbospongious and ischiocavernous muscles, drainage of blood into v. dorsalis penis prof. → detumescence

EJACULATION OF THE SEMEN

- 1. Emission of sperms and genital glands secretion**
- sympathetic stimulation
- 2. Expulsion of the semen from the spongy urethra (ejaculation) – parasympathetic stimulation**
