

Dear Students, dear course participants,

unfortunately, I am still out of the office and lessons.

In this email I would like to explain the outside-lesson work.

- A. In the week 5 of the semester, we should have a glimpse at motivation letters for study abroad.

What you will find in the teacher's folder week 5 is a number of materials. Please, make sure you study through all the materials for

- (1) linking words and expressions (handout, overview and the key to the handout)
- (2) motivation letters (student handout with activities, key to the handout and sample test task), please upload the handout with your answers in the odevzdávárna
- (3) the sample test task gives you a good idea of what there is to come in the midterm test – the motivation letter will be an integral part of the final examination and will be done as part of the midterm test
- (4) the sample test is an optional task – if you want you write your letter and upload it in odevzdávárna for feedback which I will happily provide

- B. in the „osnova“/interactive syllabus, please, study these sections:

- (1) REPRODUCTIVE SYSTEM – EXAM PRACTICE

- (2) REPRODUCTIVE SYSTEM – READING DETAILED – based on the text I will count on you having studied the terminology for anatomy and functions of the individual organs in male and female reproductive systems – you can understand the factual knowledge of the individual systems as a solid base for the final test.

The midterm test is to be shifted to week 9 of the semester.

The first presentations to be delivered will be postponed until the post-Easter week.

Once again I apologize for any inconvenience caused by the situation.
