### **Assessment methods and criteria**

The tuition is realised in the form of practical courses. The students' presence in these courses is strictly required; a maximum of two unexcused absences is tolerated. Students are allowed to substitute a maximum of TWO classes with another group. Substitutions are not possible in the weeks when Progress Test take place. **If a student has more than two unexcused absences, they will not be allowed to take the Final test. The tuition is finished by a colloquium (C) consisting of a WRITTEN and an ORAL part.** Passing the examination is conditioned by proper attendance, active participation in practical courses, sitting for Progress Tests and successful passing of written and oral exams. **The basic limit for passing all tests is 70%. In case of passing three class tests, which are obligatory for all students, the basic limit in the written exam is reduced by 10%. Without successful passing the written exam students will not be allowed to sit for the oral part! Students who score a minimum of 90% in EACH progress test are not obliged to take the written part of Colloquium.**

**Any copying, recording or leaking tests, use of unauthorized tools, aids and communication devices, or other disruptions of objectivity of exams (credit tests) will be considered non-compliance with the conditions for course completion as well as a severe violation of the study rules. Consequently, the teacher will finish the exam by awarding grade "F" in the Information System.**
