

1. Fill in the table according to the example

Noun	Genitive	Gender	Declension	Adjective
<i>skull</i> <i>cranium</i>	-ii	N	2 (cerebrum)	
<i>nose</i>				
<i>tooth</i>				
<i>mouth</i>				
<i>lower jaw</i>				
<i>eye</i>				
<i>tongue</i>				
<i>palate</i>				
<i>neck</i>				
<i>ribcage</i>				
<i>breastbone</i>				
<i>belly</i>				
<i>breast</i>				
<i>hand</i>				
<i>collar bone</i>				
<i>scapula</i>				
<i>arm bone</i>				
<i>elbow</i>				
<i>elbow bone</i>				
<i>radial bone</i>				
<i>wrist</i>				
<i>metacarpus</i>				
<i>finger</i>				
<i>vertebra</i>				
<i>coccyx</i>				
<i>thigh bone</i>				
<i>knee</i>				
<i>shaft bone</i>				
<i>calf bone</i>				
<i>heel</i>				
<i>tarsus</i>				

2. Connect:

injury of muscles + head, face, neck, eye, tongue, palate, pharynx, larynx, trunk, chest, back, belly

dislocation of joint(s) + hand, foot, elbow, wrist, thumb, the big toe, knee, fingers

operation of complicated fracture of bones + skull, face, thorax, vertebral column

symptoms + acute inflammation of the bronchi, tumour of lips, TB, chronic inflammation of the liver, diabetes mellitus, Infectious disease, internal bleeding, concussion (brain shock), premature birth

3. Derive the adjective and agree it with the noun; follow the example:

EX : vertebra >> vertebralis, e

columna vertebralis

costa >>	fovea
cranium >>	margo
latus >>	angulus.....
dorsum >>	tuberculum.....
nasus >>	musculus.....
superficies >>	pars.....
musculus >>	tunica.....
ventriculus >>	plica.....
cortex >>	septum.....

4. Change into plural, if possible find the adjective with opposite meaning as well:

Morbus sanabilis
Remedium simplex
Musculus brevis
Ligamentum breve
Intoxicatio gravis
Trauma leve
Musculus biceps
Carcinoma operabile
Pelvis renalis
Intestinum crassum
Os ethmoidale
Musculus opponens
Dens permanens
Arteria perforans
Morbus recurrens
Remedium adiuvans
Pars ascendens
