

Czech for Foreigners VI_COLLOQUIUM_CASE REPORT

The student prepares a case report of a real or fictive patient in cardiology, pulmonology or GIT and submits to the HW Vaults. The teacher evaluates the case study. The scoring of individual parts is in the table below.

The student can get maximum of 25 points. The pass mark is 17 points.

The student will complete the cases report in his own words and sentences, on expected language level; obvious use of the Google translator for whole sentences/paragraphs will not be accepted (however, the use of dictionaries, including the online ones, is acceptable). The copied case studies from the Internet or case studies identical to other students will also not be accepted.

Parts of the Case report	Scoring
Personal data of the patient	2
Reason for admission (difficulties preceding hospitalization; onset, type and location of the problem, the steps the patient has taken to alleviate the problem; previous hospitalization)	3
FAMILY HISTORY (health status of parents, grandparents, siblings, children; age; cause of death)	4
PERSONAL HISTORY, Gynecological history in women (chronological list of diseases, surgeries, injuries; childhood diseases)	5
PHARMACOLOGICAL HISTORY (permanently used drugs and their dosage)	2
ADDICTIVE SUBSTANCES (cigarettes, alcohol, black coffee, drugs; length of consumption, daily consumption)	2
SOCIAL and WORK HISTORY (conditions in which the patient lives and works, marital status, with whom he lives in the household, self-sufficiency; the patient's current and previous employment, physical exertion, stress or pollutants in the workplace; retirement, previous employment)	3
PRESENTING COMPLAINTS (type, location, intensity and duration of complaints and pain; chronic diseases; health condition during hospitalization; examination methods, course of treatment, recommendations on discharge from the hospital)	4
TOTAL:	25 points
