Toxicological History	1
Social History	1
Work History	1
FA: what medicine he/she takes, for what and against what (<i>It is not enough just to name the drugs!</i>)	2
NO 1: onset, nature and duration of the problem, any medication?, symptoms, reason for hospitalization	3
No 2: course of hospitalization, in which ward, development of the condition	2
N03: prognosis and follow-up care after discharge from hospital	2
Total	22 points

Part b) has these sections with the following scoring:

<i>Topic</i>	<i>Score</i>
Characteristics of the disease	3 body
The most common causes	3 body
Typical symptoms	3 body
Diagnostics	3 body
Treatment	3 body
Prognosis	3 body
Total	18 bodů

c) pronunciation and comprehensibility: scale 1–10 points

- 1 – almost incomprehensible, pronunciation influenced by a foreign language
- 5 – fully comprehensible, less frequent deficiencies in pronunciation
- 10 – perfect/natural pronunciation and comprehensibility

General instructions

Presentation range: min. 10, max. 10 slides.

Slides will be drafted concisely (keywords) and will not contain long sentence units or paragraphs. The student will communicate everything necessary in an oral commentary, which is the main part of the presentation. The student will speak "in his own words". He will use language understood by fellow Czech non-native speakers and the non-professional public. Presentations that contain copied passages from Wikipedia or Google will not be accepted. The presentation will have the usual structure: address, introduction, case report, illness, conclusion and thanks.
