Republic

- **Logic exercise, not meant as a guide**
- **Socratic paradox**
 - ✓ Good ideas may result in bad things when we try to implement them in their purest form
- An attempt to define ideal political system, which would be immune to such mistakes as Socrates' punishment
- The citizens would be divided into three groups according to personal qualities:
 - ✓ Rulers (Philosopher Kings)
 - ✓ Warriors/Guardians
 - ✓ Workers
- The citizen would be paired according to their qualities (the best with the best, the worst with the worst)
 - To prevent rebellion, a manipulated draw would be performed (mimicking the will of the gods)
- Children would be taken and raised institutionally
- In the last dialogue (The Laws) direct application of the laws was elaborated (no more rule of humans)

Rationalism carried out ad absurdum

Allegory of the Cave (Republic)

What is reality?
What we consider to be real

Aristotle

(384-322 BC)

➤ Synthesis of previous philosophy

- A system based on Greek ideals of harmony and moderation.
- Combined two main streams
 - ✓ Physical-material (Milesian-Heracleitian-Deomcrititan)
 - ✓ Logical-abstract (Pythagorean-Eleatic-Platonic)

➤ Rationalization, categorization

- ✓ Logic (Organon – tool of thinking – Categories, On interpretation, Analytics, Topics...)
- ✓ Nature philosophy (Physics, On the Heavens, History of animals, Generation of animals, Parts of animals, On the Soul...)
- ✓ Metaphysics (First philosophy)
- ✓ Ethics (Ethics, Nicomachean Ethics)
- ✓ Politics and economy (Politics)
- ✓ Rhetoric and poetics (Rhetoric, Poetics)

<https://www.biografiasyvidas.com/monografia/aristoteles/>

Aristotle

➤ Deductive reasoning

- Aristotle has established formal rules of deduction
- Aristotelian syllogism
 - ✓ 1. General statement (All the men are mortal)
 - ✓ 2. Specific statement (Socrates is a man)
 - ✓ 3. Conclusion (Socrates is mortal)

➤ Ideas are not entities, it is just a product of reasoning

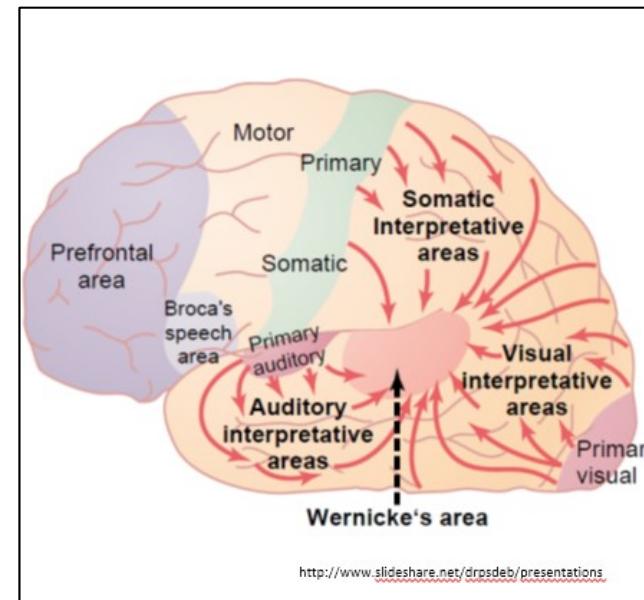

➤ Emphasized empiricism (the most important is, according to Aristotle, tactile sensation, because all the animals have an ability of tactile sensation)

➤ Four causes (on the example of statue)

- Material (marble; Milesian)
- Formal (shape; eleats)
- Efficient (hand of artist, pre-atomists)
- The final cause – meaning (function of the st.; A.)
 - ✓ The most important is the final cause
 - ✓ The universe has been evolved to have a purpose and to be suitable for creation of human beings.
 - ✓ Prime mover – a primary cause - God

<https://www.biografiasyvidas.com/mo-nografia/aristoteles/>

Aristotle

➤ Theory of the soul

- Based on relation between form (soul) and substance (body)
- The soul is determinant which makes the body real (living)
- Vegetative (Plants, animals, humans)
- Sensory (Animals, humans)
- Rational (Humans)

➤ Ethical aspects associated with the theory of the soul

- Humans are rational beings and reasoning should lead to moderation, however sensoric and vegetative souls should not be suppressed too much (no ascetism)
- Golden middle way
- The purpose of life is to develop abilities
 - Two ways
 - ✓ Ethical – reign of reason over instincts
 - ✓ Dianoetic – improving of reason

➤ Ideal political system

- The form of political system should correspond to the specific need of the nation at that time
- The relationship between citizen and state should be based on generosity and criterion of general benefit
