

1. Maxillary incisors
2. Mandibular incisors
3. Maxillary and mandibular canine
4. Maxillary premolars
5. Mandibular premolars
6. First maxillary molar
7. First mandibular molar
8. Second maxillary molar
9. Second mandibular molar
10. Apical morphology (x-ray apex, apical foramen, apical constriction, and average distances between a. constriction and apical foramen, a. constriction and x ray apex, f. apical and x-ray apex)

General questions:

How many roots, how many root canals, their name, their shape (round, oval, isthmus – narrowing – e.g. mandibular incisor, upper first premolar). Shape of the access cavity.
