**Repetition of tissues in histological slides** (spring semester)

Identify tissues (t.) and specify their type in the following slides:

1/ *labium oris* – epithelium on ventral side (skin) .....  
and dorsal side (*tunica mucosa*) .....  
connective t. ....  
muscle t. ....

2/ *apex linguae* – epithelium .....  
muscle t.....  
connective t. ....  
try to find nerve fibres,

9/ *glandula submandibularis* – secretory units: a) .....  
b) ..... c).....  
connective t. of capsule .....

11/ *oesophagus* – epithelium .....  
connective t. ....  
muscle t. ....  
try to find nerve t. – nerve fiber or small ganglion,

16/ *intestinum tenue* – glandular cells in epithelium a) ..... b).....  
epithelium ..... muscle t. ....

22/ *vesica fellea* – epithelium .....  
connective t. .... muscle t. ....

27/ *trachea* – epithelium .....glands .....  
cartilage ..... muscle t. ....

32/ *calyx renalis* – epithelium .....connective t. ....

- 81/ *ganglion spinale* – neurons .....
- glial cells .....
- connective t. of capsule .....
- 84/ peripheral nerve – glial cells .....
- axon sheaths (1,2) .....
- connective t. of epineurium .....
- 91/ *palpebra* – epithelium on ventral (skin).....
- and dorsal side (mucosa) .....
- muscle t. ....
- 94/ *auricula* – epithelium .....
- cartilage .....
