REGIONAL ANATOMY OF THE NECK AND CHEST

MUDr. Marek Joukal, Ph.D.

Regiones coli - limitation

Against head:

protuberantia occipitalis ext.

linea nuchae sup.

porus acusticus ext.

Base of mandible

Against chest:

Incisura jugularis sterni

clavicula

acromion

vertebra prominens

Against nuchal region:

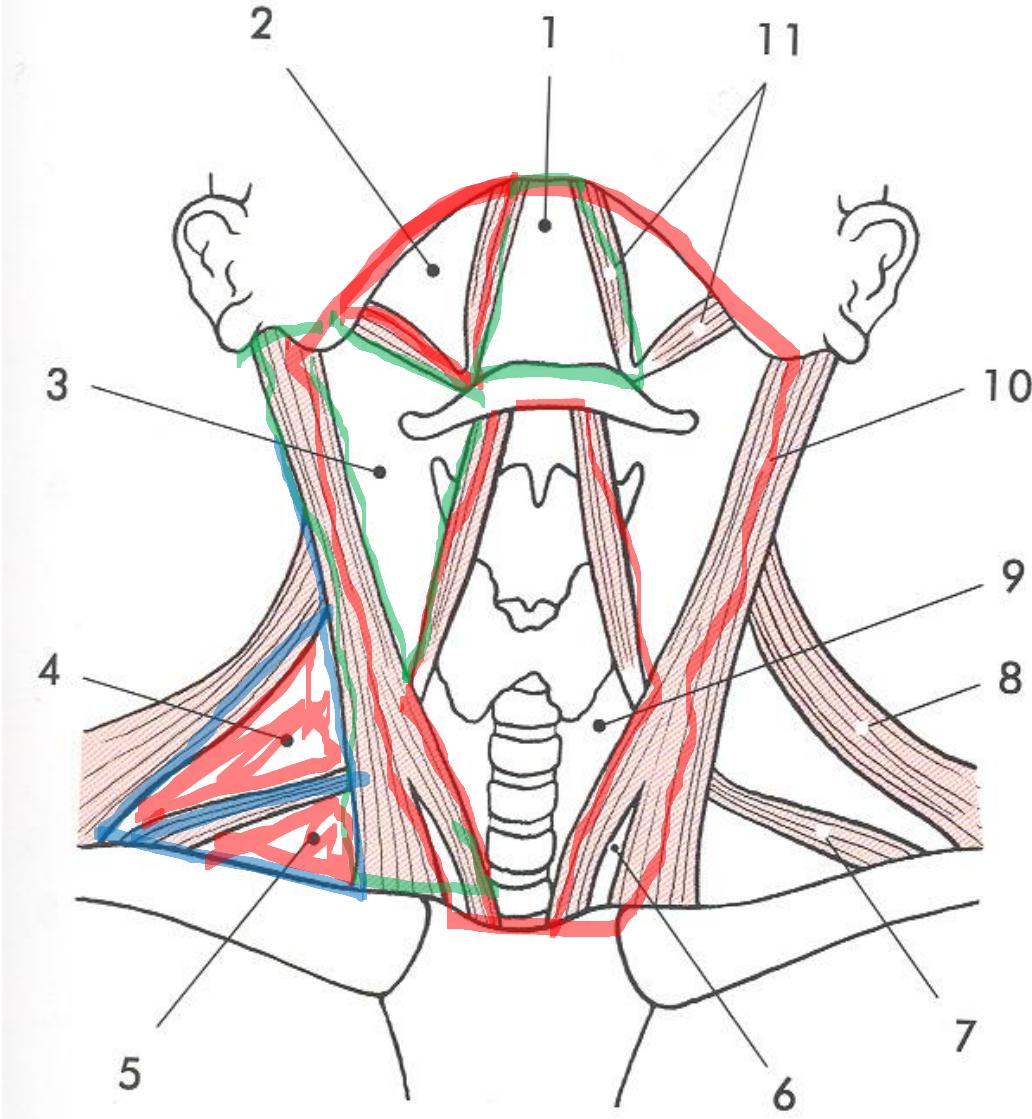

processus mastoideus

Margine of the m. trapezius

acromion

Regiones coli

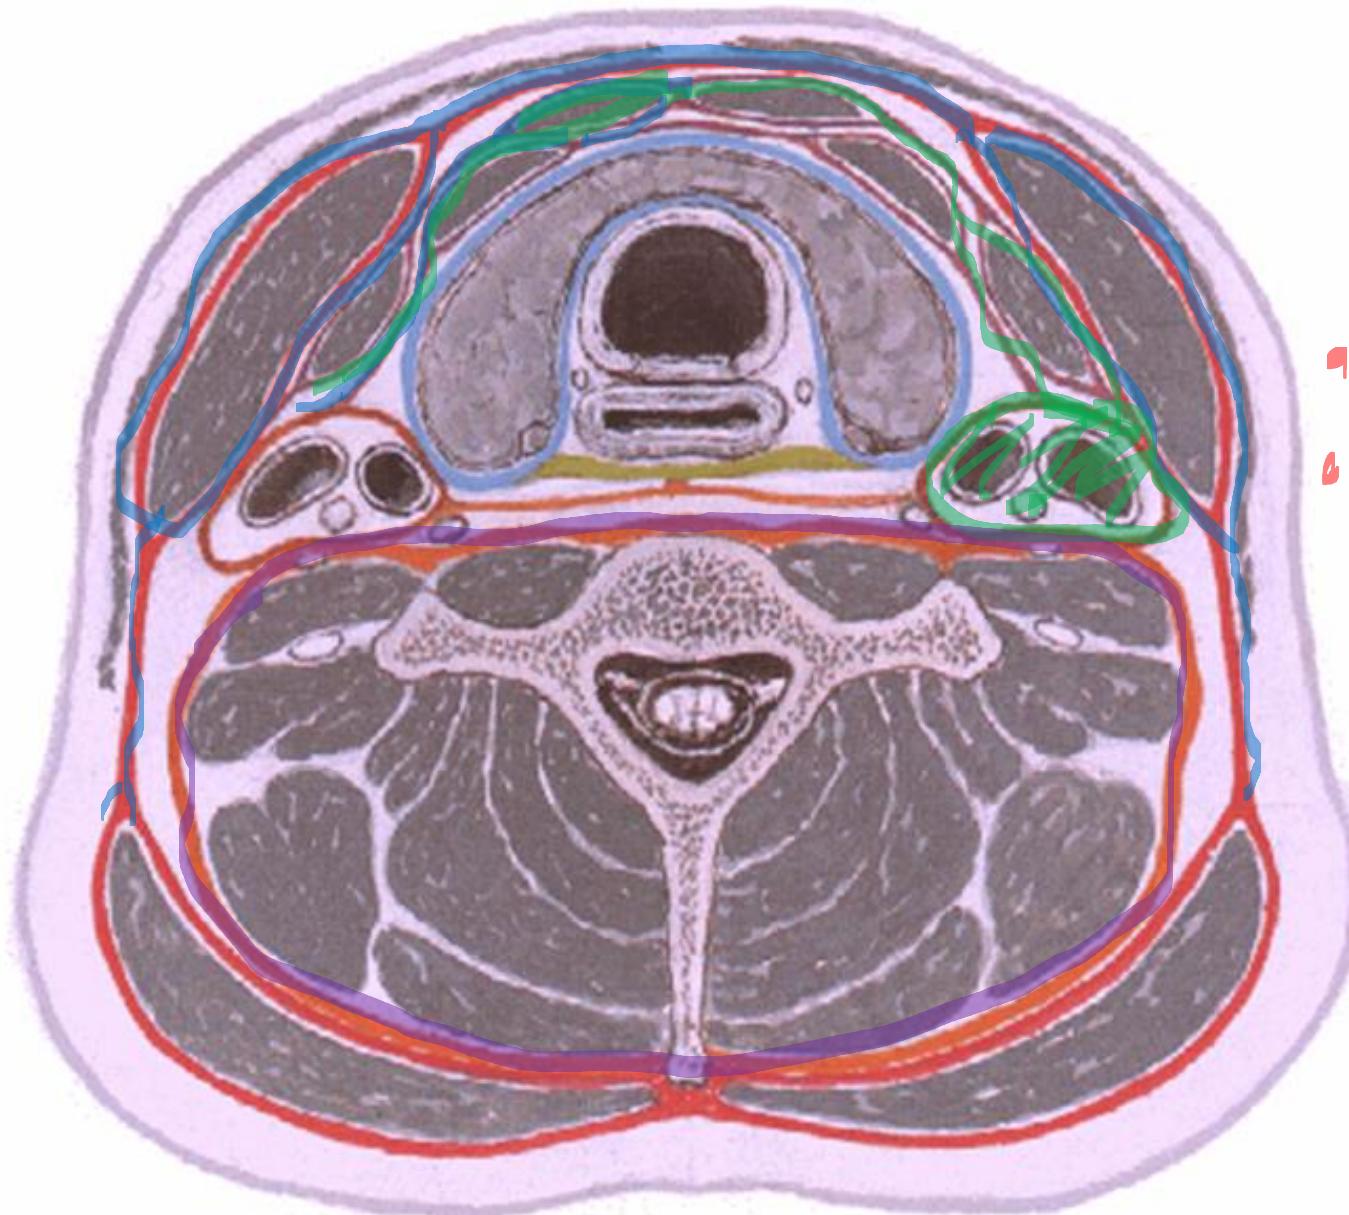

regio colli ant.

- trigonum omotracheale
(*infrahyoideum*)
- trigonum submandibulare
- trigonum submentale
- trigonum caroticum
- regio sternocleidomastoidea
- regio colli laterale
- trigonum omoclaviculare
- trigonum omotrapezoideum
- trigonum scalenovertebrale

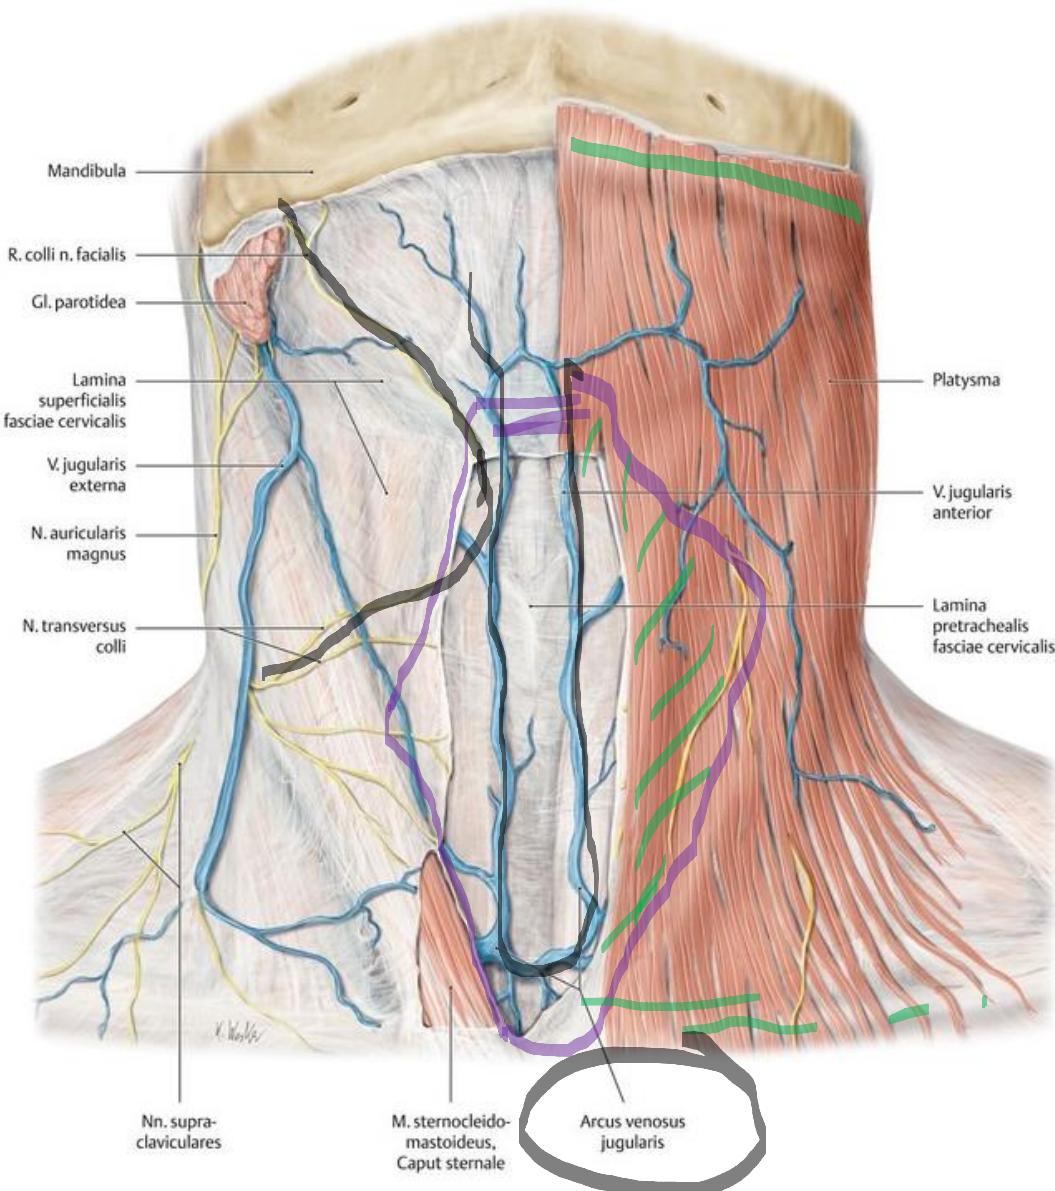

Cervical fascia

- Lamina superficialis fasciae cervicalis
- Lamina praetrachealis fasciae cervicalis
- Lamina praevertebralis fasciae cervicalis

Trigonum omotracheale (regio infrahyoidea)

Superficial layers:

- skin (**prominentia laryngea**)
- m. platysma (**ansa cervicalis spf.**)
- lamina spf. fasciae cervicalis
- vena jugularis ant.
- lamina praetrachealis fasciae cervicalis

Spatium suprasternale

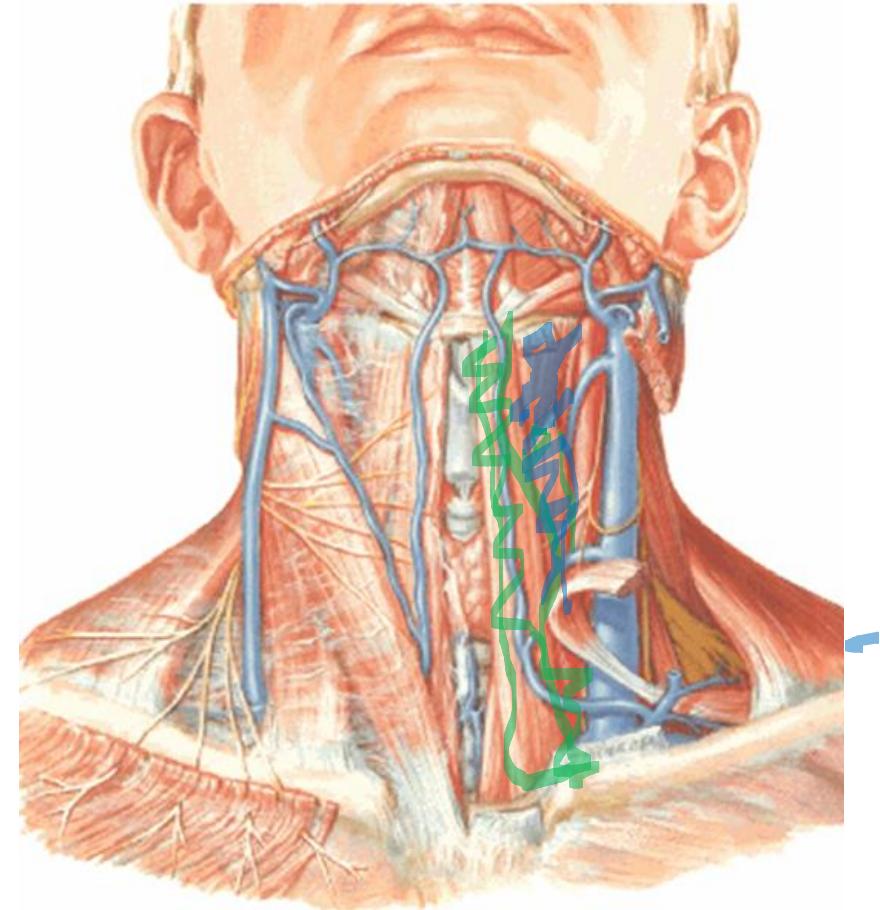

(above the sternum, between lamina spf. and praetrachealis)

Fatty tissue

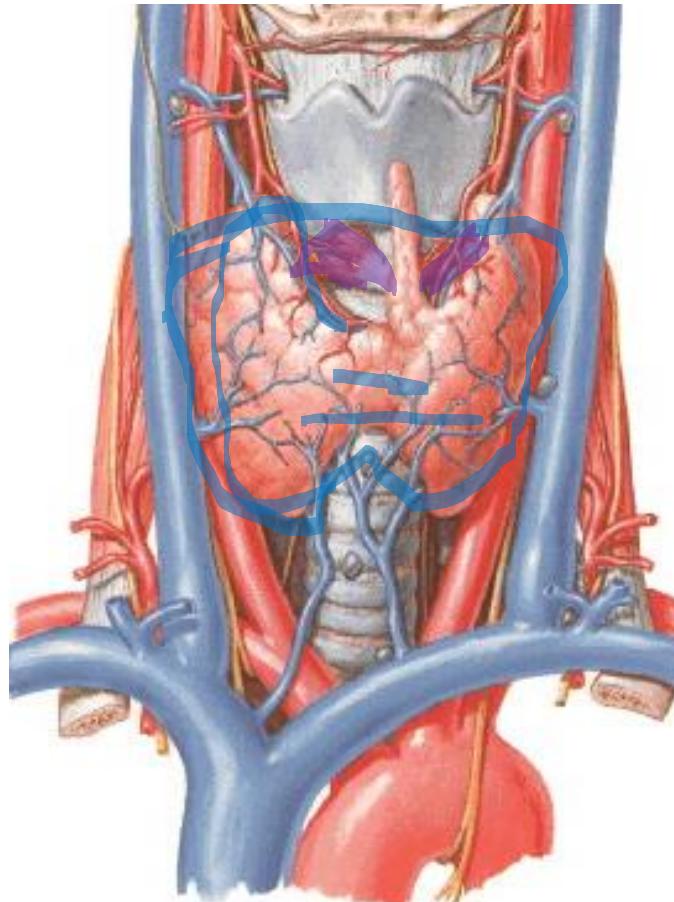

arcus venosus juguli

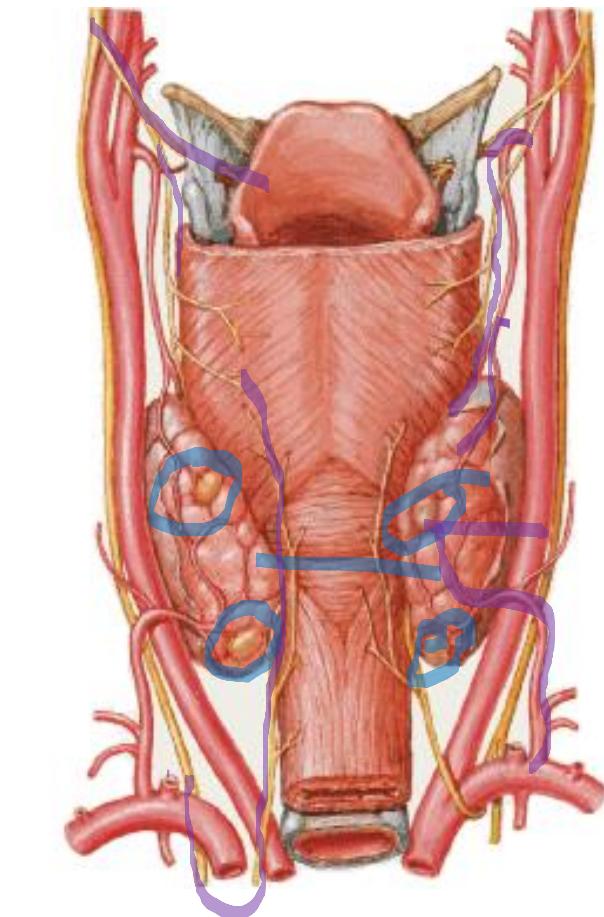

Trigonum omotracheale (visceral layer)

Infrathyroid muscles (ansa cervicalis prof.)
larynx, trachea (C6)
pharynx, oesophagus (C6)

gl. thyroidea
ggl. parathyroideae
pharynx, oesophagus (C6)

a., v. thyroidea sup. et inf,
a., v. laryngea sup.
n. laryngeus sup. (ramus int. et
ext.)
n. laryngeus inf.

Trigonum submandibulare

Borders: m. digastricus

mandibule

tractus angularis - divides gl.

parotis and gl. submandibularis

Content: platysma, superficial lamina of cervical f.

glandula submandibularis

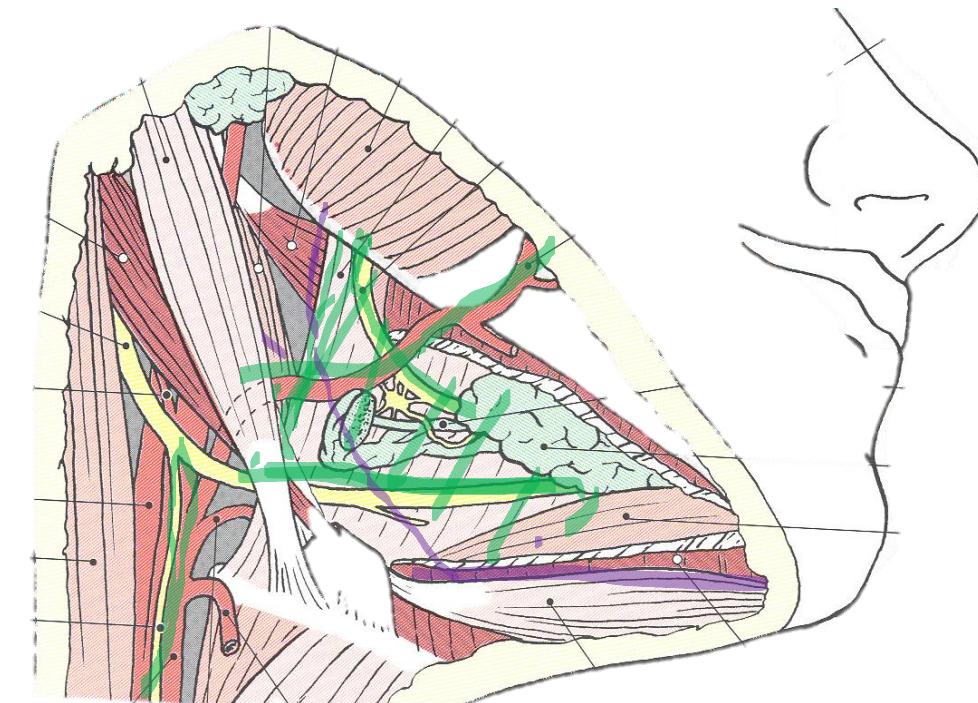

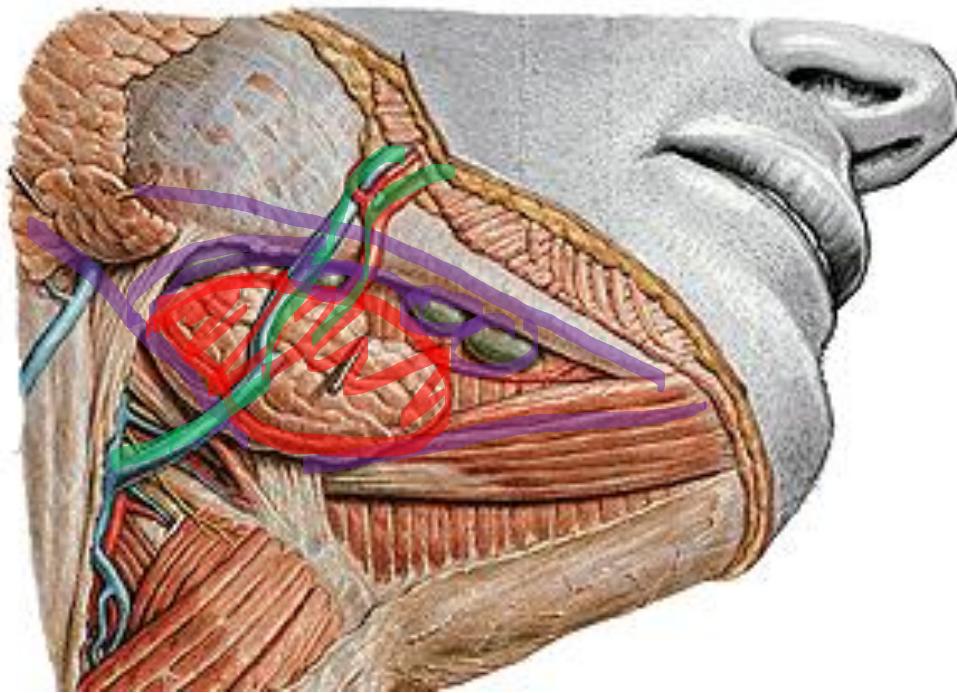

a., v. facialis (a., v. submental)

n. mylohyoideus

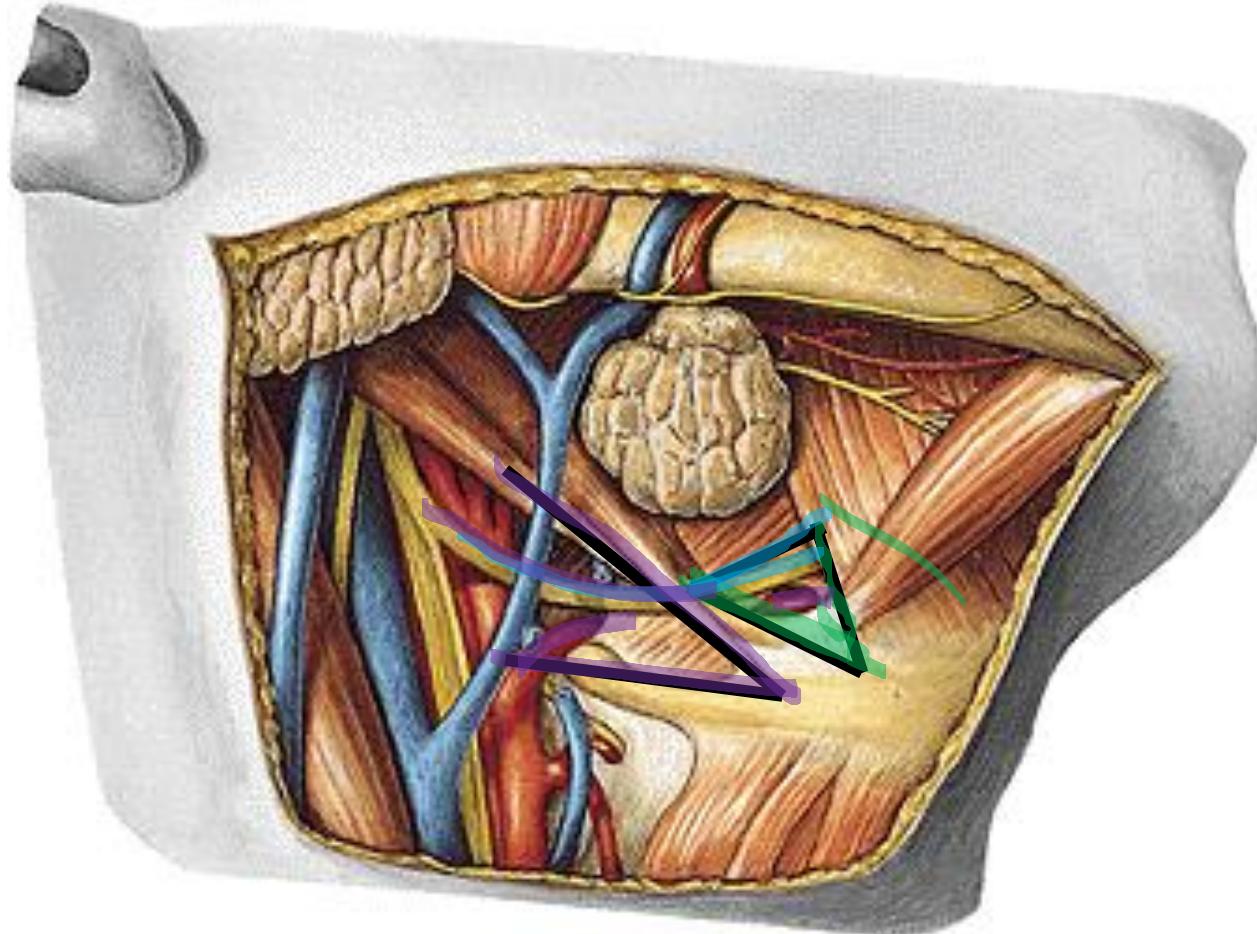

n. lingualis + ggl. Submandibulare

n. hypoglossus (arcus)

n. lymphatici submandibulares

Trigonum submandibulare

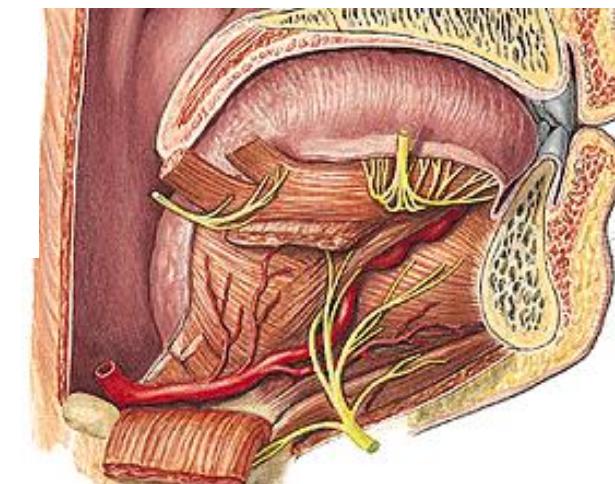

Trigonum Pirogovi (ligation of lingual a.):

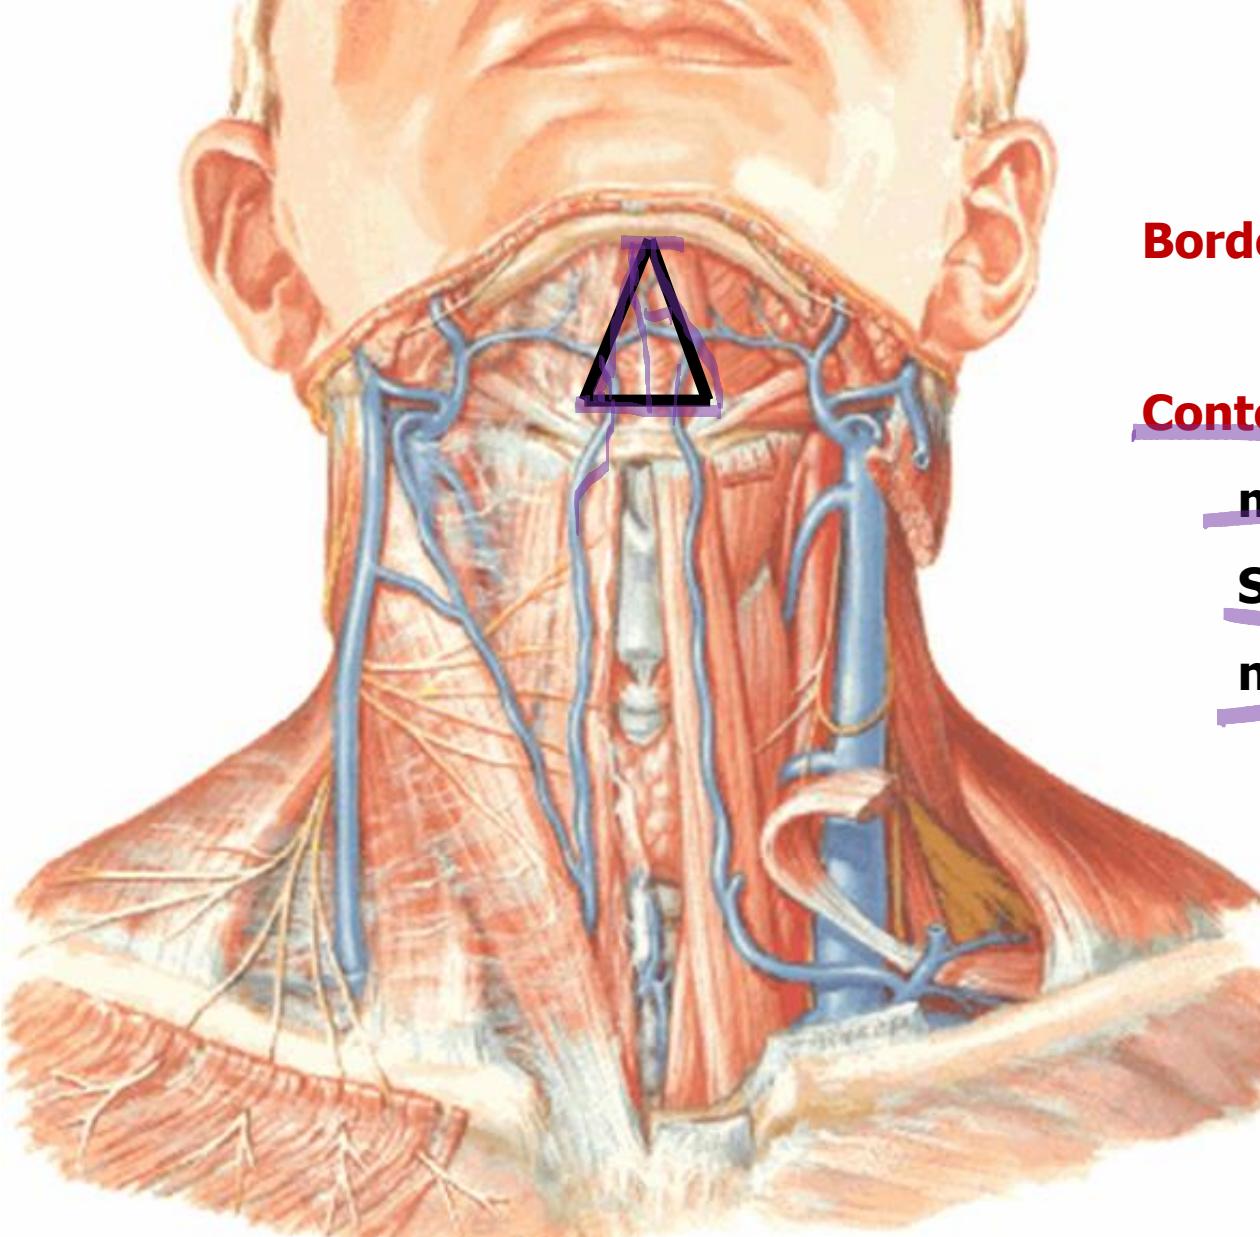

- m. digastricus
- n. hypoglossus
- m. mylohyoideus

Béclard's angles (beginning of lingual a.):

- cornu majus ossis hyoidei
- n. hypoglossus

Trigonum submentale

Borders: **m. digastricus – anterior belly (bilat.)**
hyoid bone

Content:

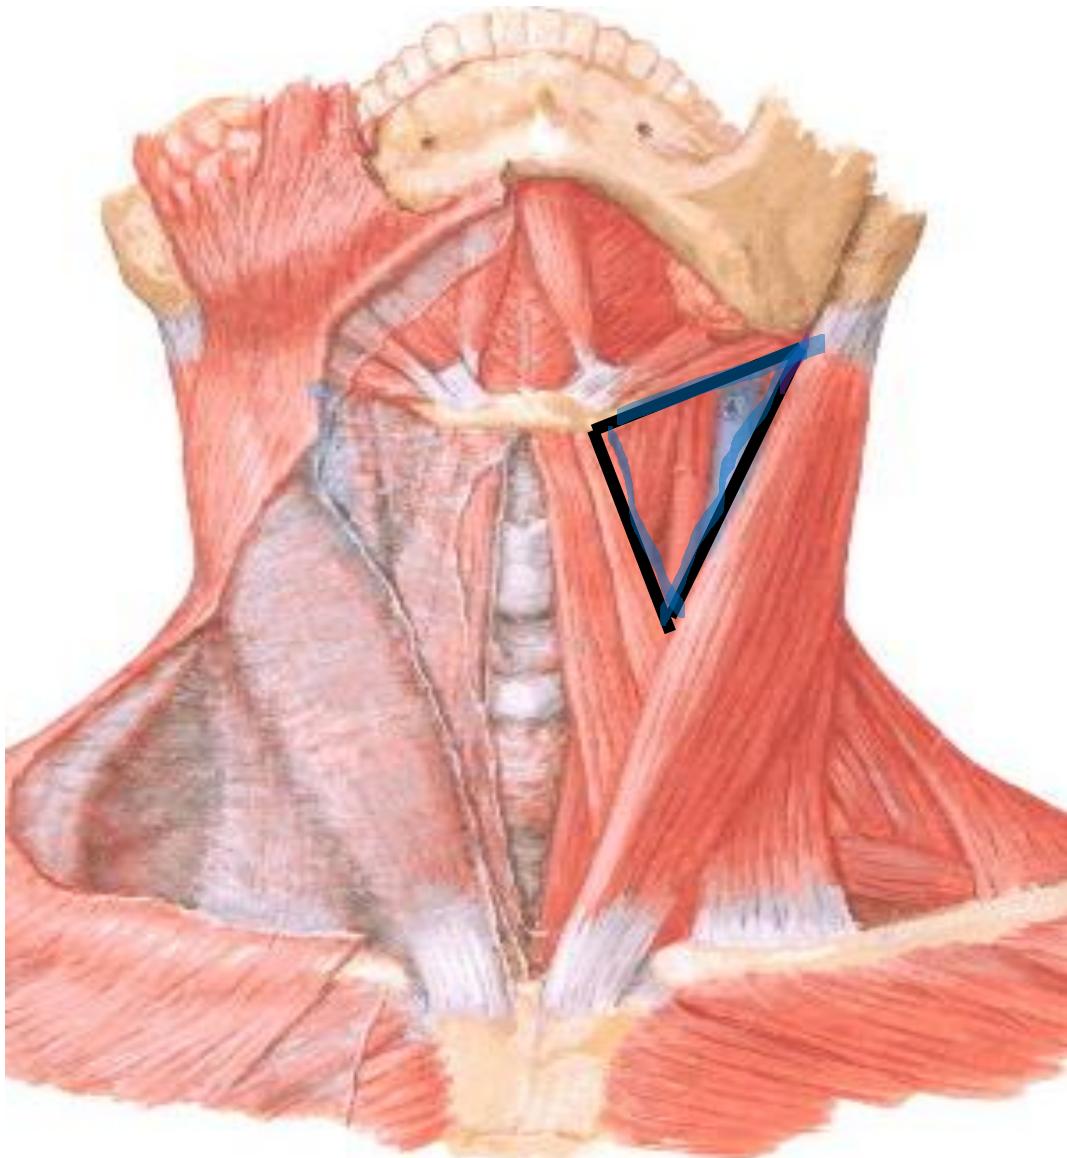

m. platysma

Spf. lamina of cervical fascia

nodi lymphatici submentales

Trigonum caroticum

Borders:

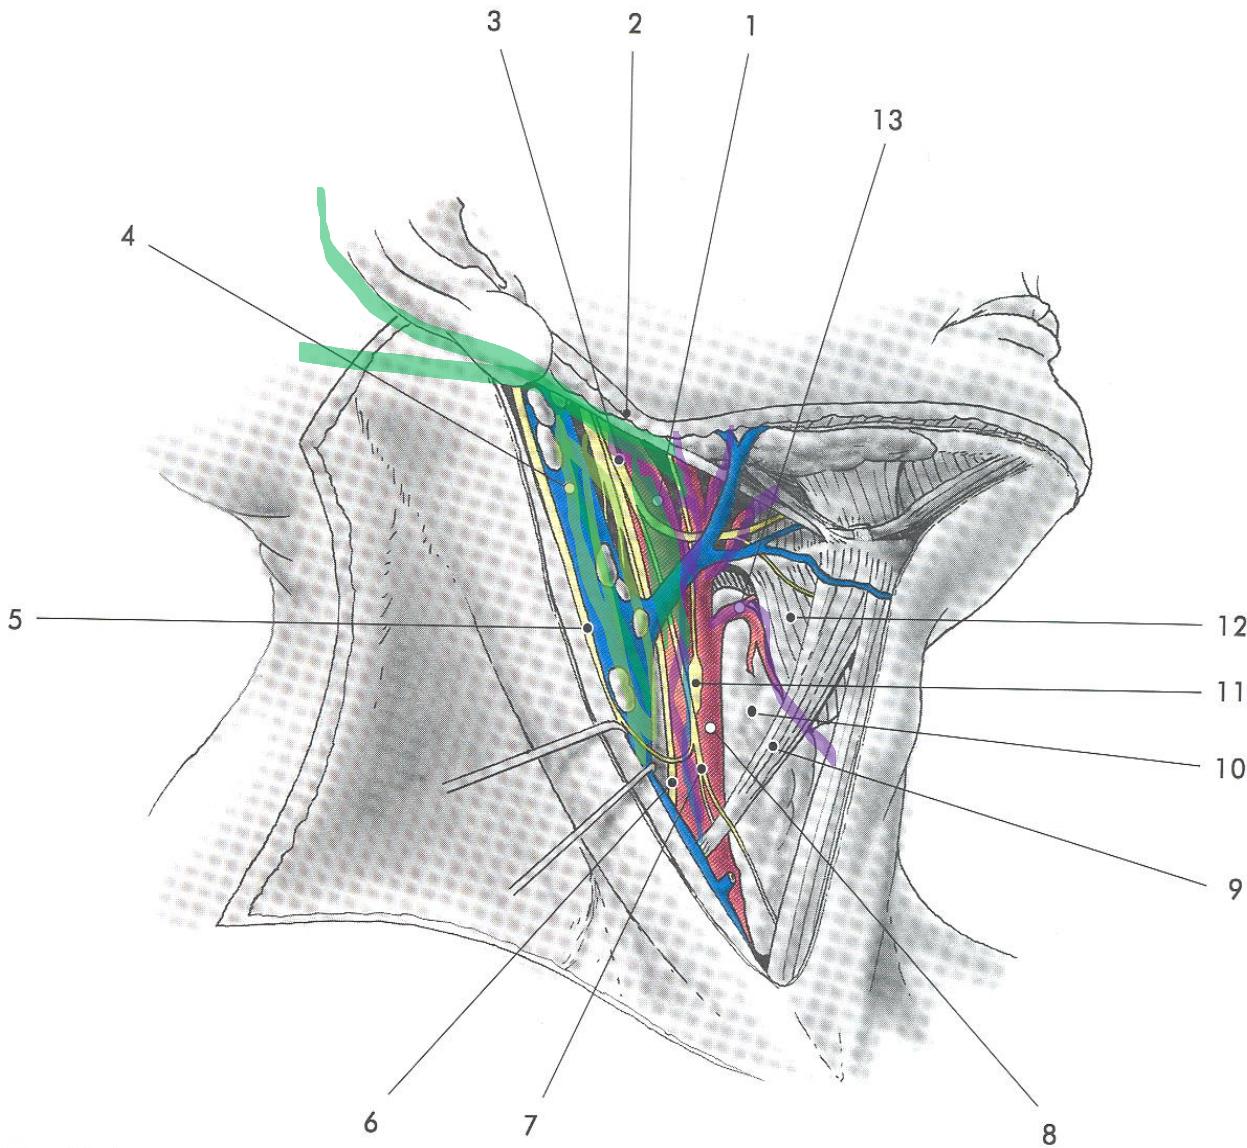

Anterior margine of m. sternocleidomastoideus
venter superior m. omohyoidei
venter posterior m. digastrici

Major content:

bifurcatio carotidis (C4)
(a. carotis com. -> a. carotis ext. et int.)
glomus caroticum

Trigonum caroticum – vessels

vena jugularis int. and tributaries

(nodi lymphatici cervicales prof.)

a. carotis com.

a. carotis int. – dorsomedially (no branches!!!)

a. carotis ext.

a. thyroidea sup.

a. lingualis

a. facialis

a. pharyngea sup.

a. occipitalis

a. auricularis post

Trigonum caroticum – nerves

n. vagus

n. laryngeus sup.

n. hypoglossus (arcus)

radix sup. ansae cervic. prof.

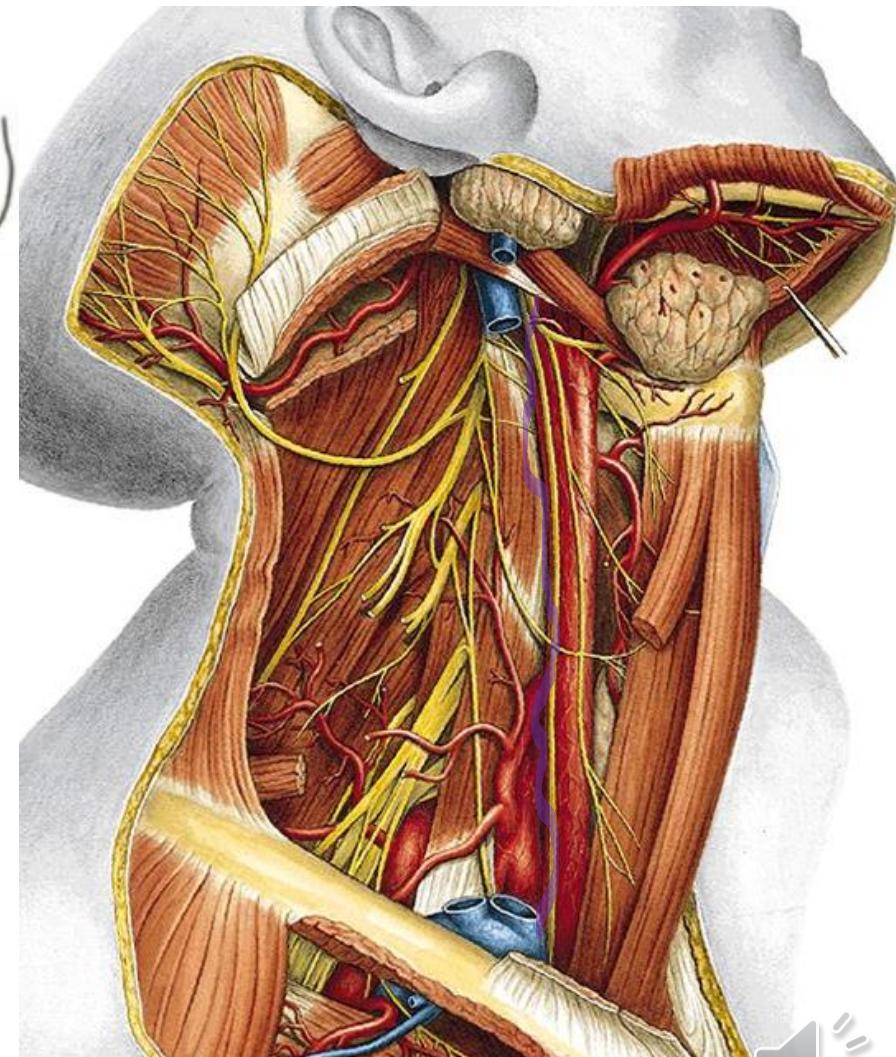

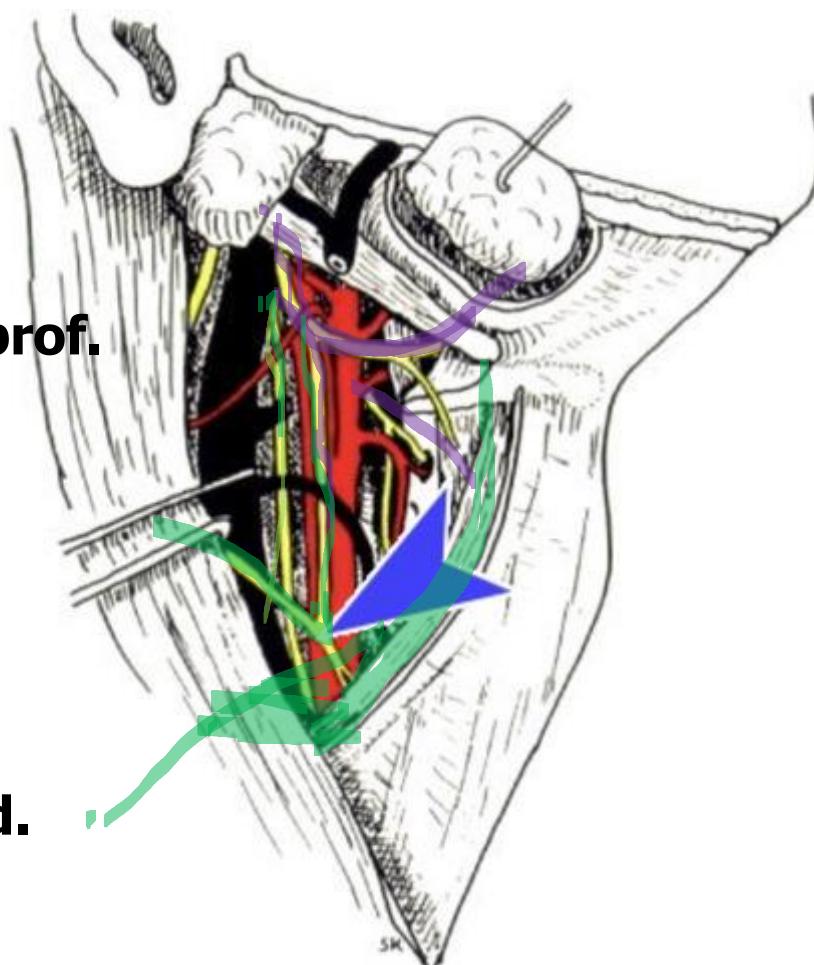

ansa cervicalis prof.

(infrahyoid mm.)

truncus sympatheticus

(praevertebral fascia)

ggl. cervicale sup. et med.

Regio sternocleidomastoidea

Borders: m. sternocleidomastoideus

(fossa supraclavicularis minor)

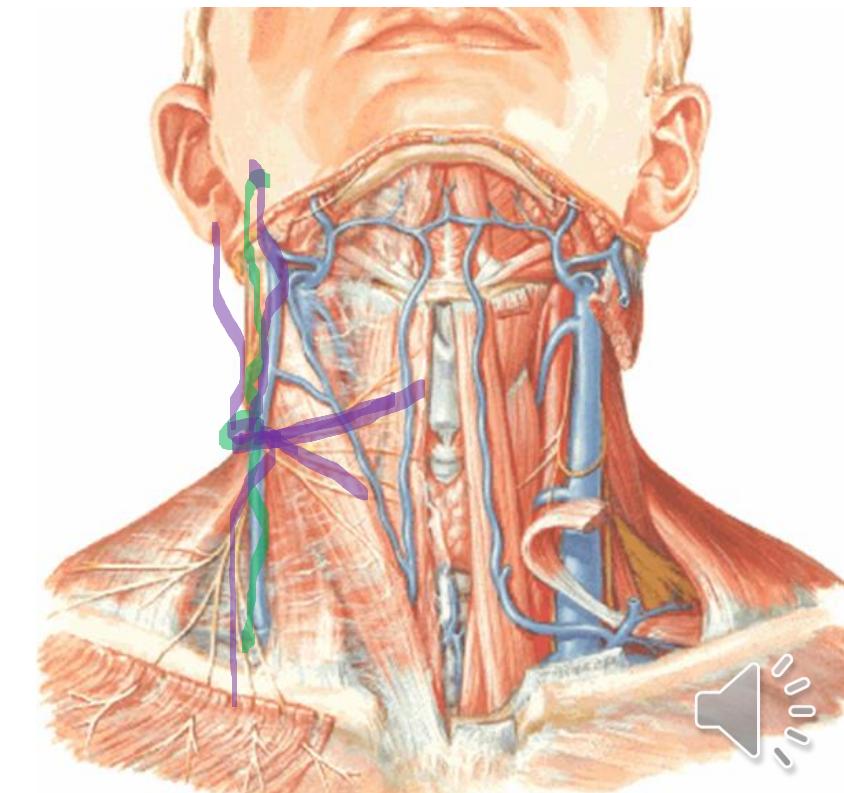

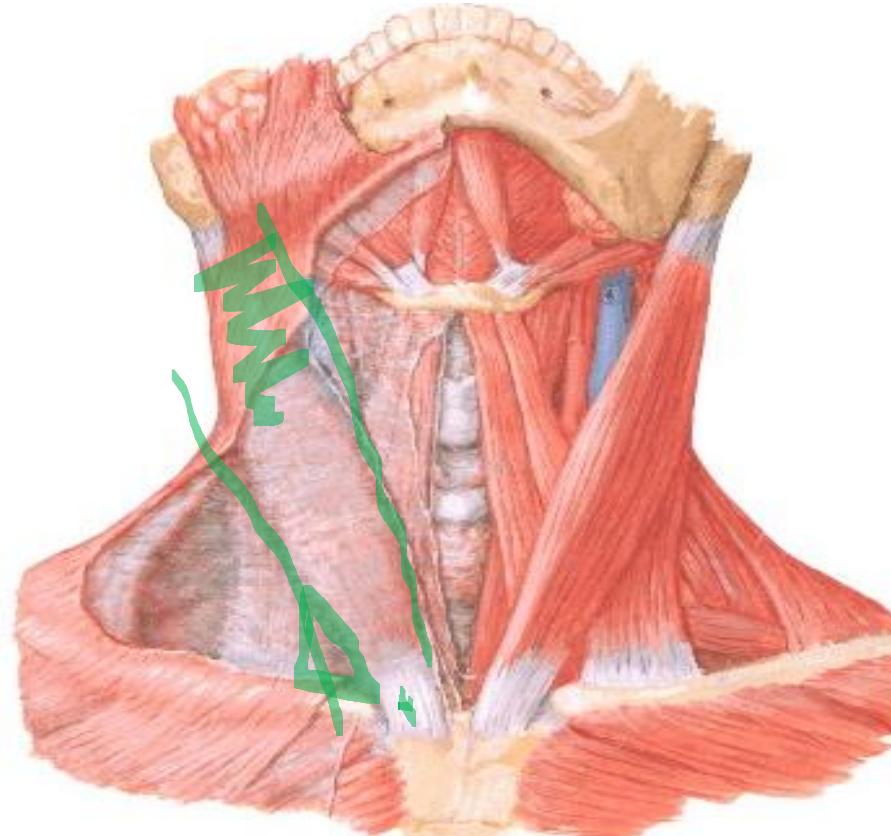

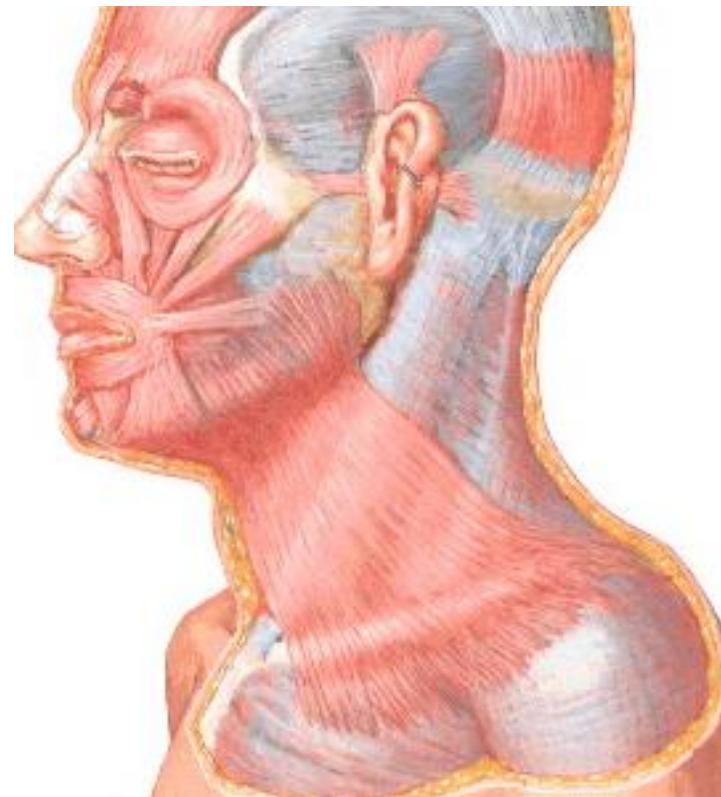

Layers: skin and m. platysma

v. jugularis ext. + n. lymph. cervicales spf.

punctum nervosum

lamina spf. fasciae cervicalis + m. sternocleidomastoideus

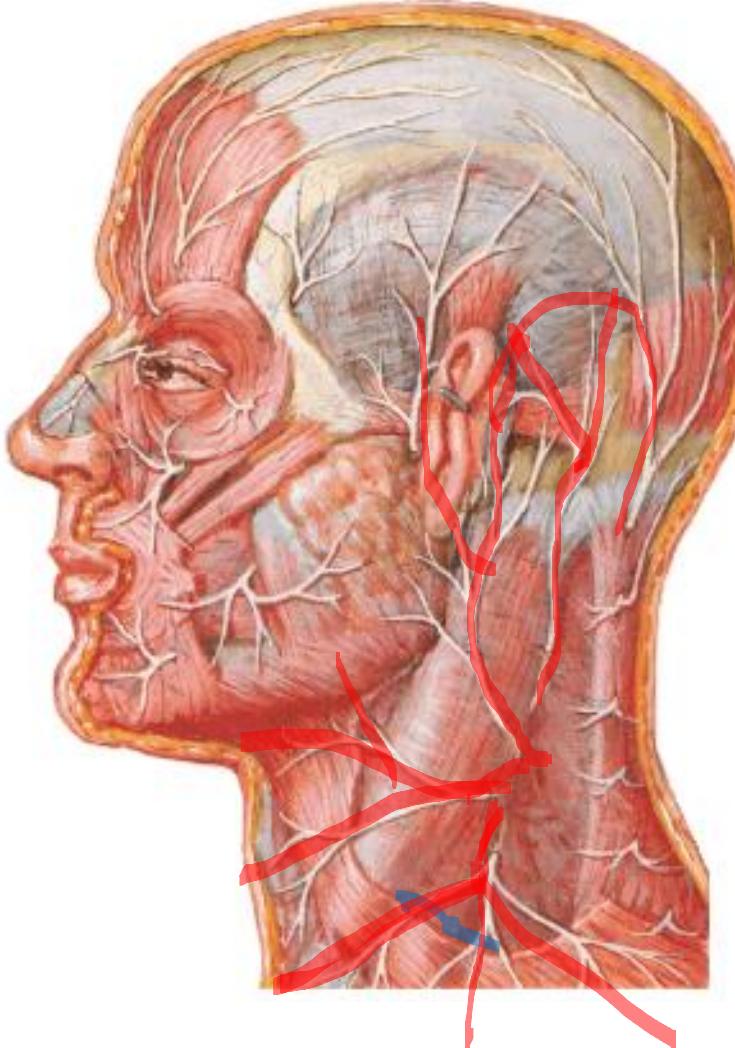

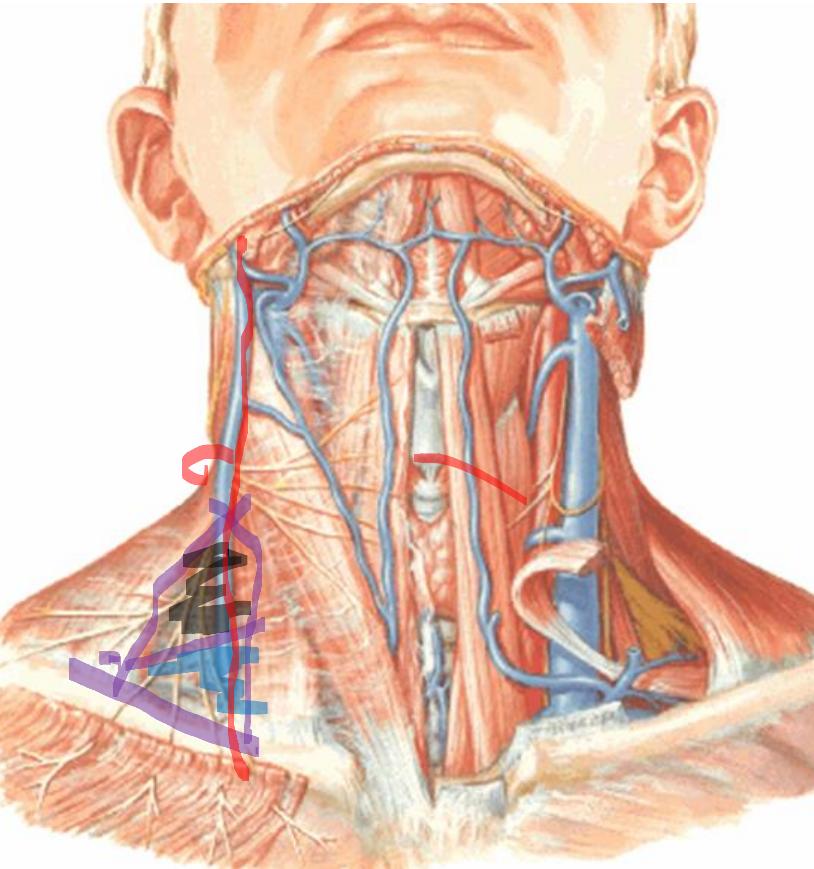

n. accessorius + a. sternocleidomastoidea (a. carotis ext.)

Regio colli laterale – superficial layer

Borders: post. margin of m. sternocleidomastoideus, ant. margin of m. trapezius, clavicula

venter inferior m. omohyoidei -> **trigonum omoclaviculare** and **trigonum omotrapezium**

Skin and m. platysma

v. jugularis ext. + n. lymph.

cevicales spf.

punctum nervosum

n. transversus coli

**(r. coli n. facialis – ansa
cervicalia spf.)**

n. auricularis magnus

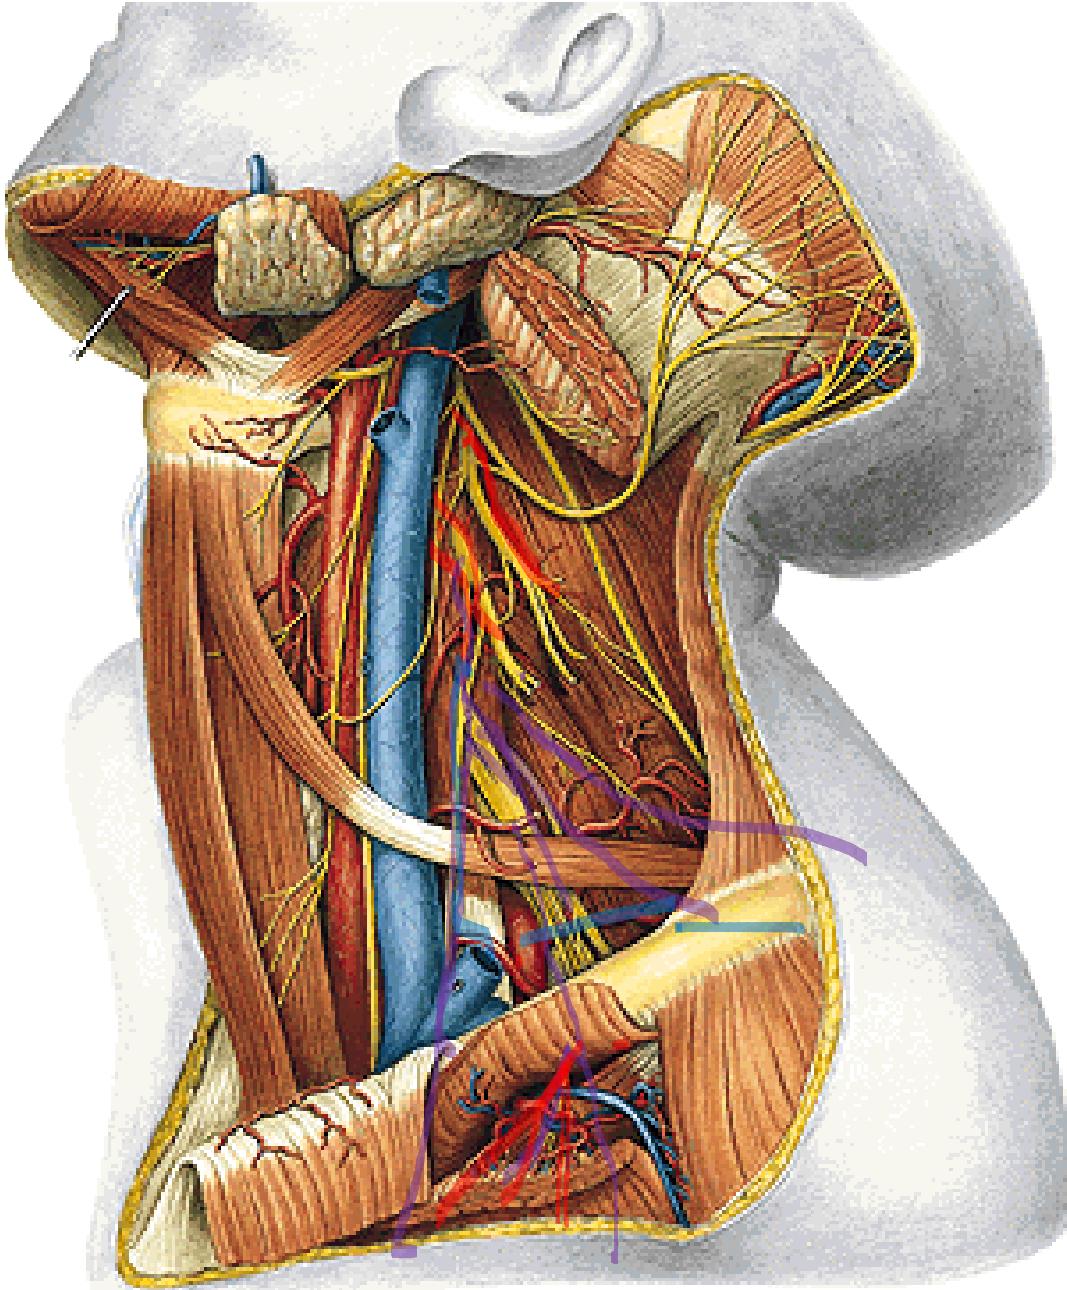

n. occipitalis minor

nn. supraclaviculares

lamina spf. fasciae cervicalis

Regio colli laterale – deep layer

n. accessorius (m. trapezius)

▶ plexus cervicalis (n. phrenicus)

◀ supraclavicular part of plexus brachialis

n. dorsalis scapulae

n. suprascapularis

n. thoracicus longus

nn. pectorales

nn. subscapulares

n. thoracodorsalis

◀ Arteries (braches of a. subclavia):

a. cervicalis ascendens

a. cervicalis spf.

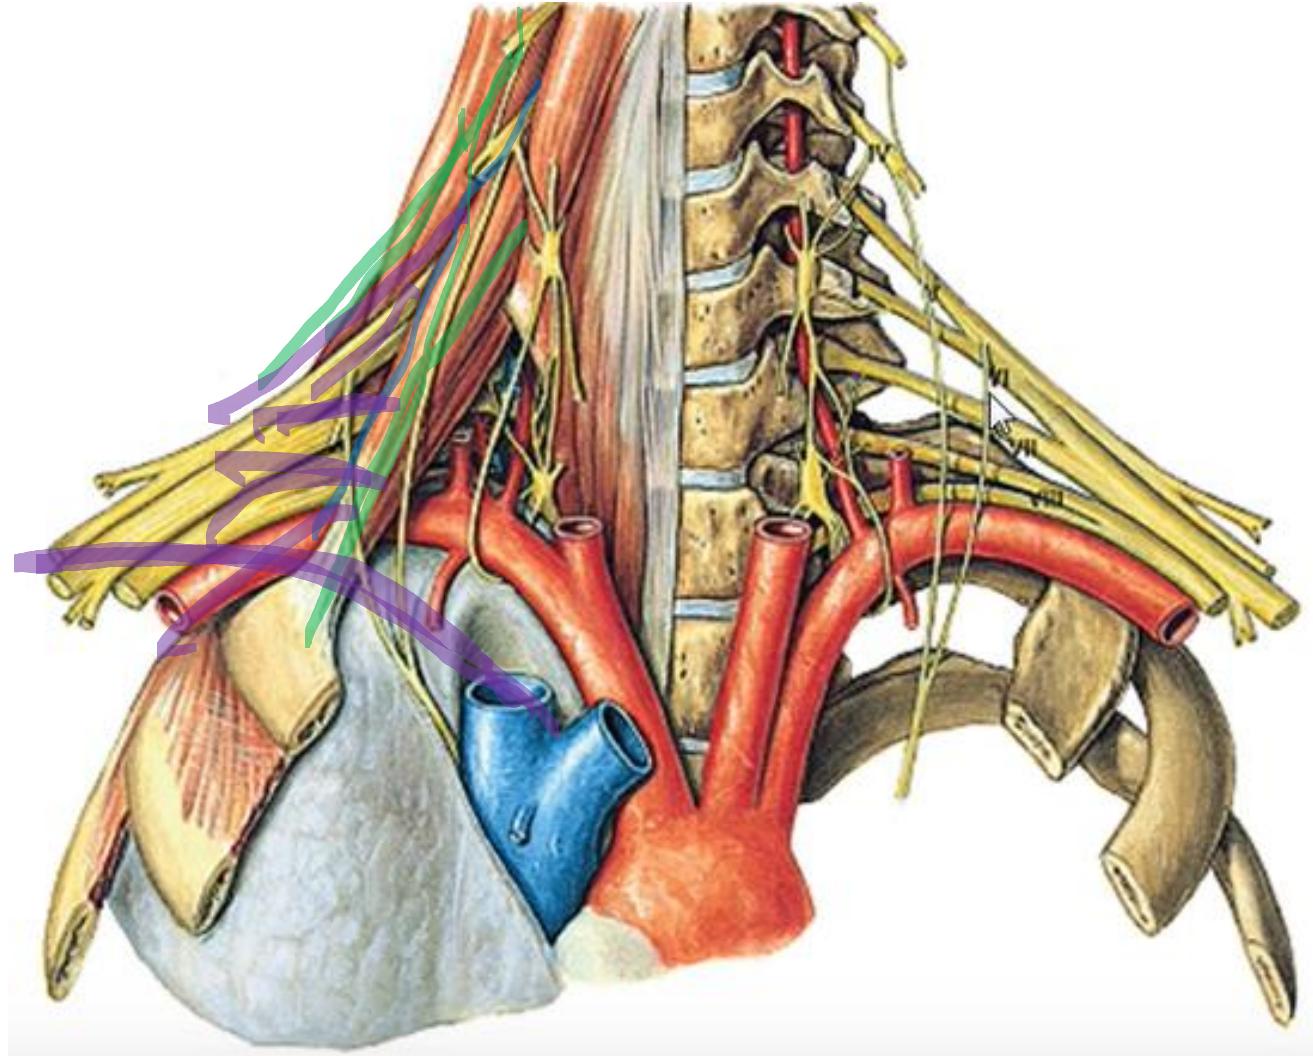

a. transversa colli

a. suprascapularis

nodi lymph. cervicales prof.

Regio coli laterale – deep layer

- v. subclavia
- fissura
- scalenorum:
 - a. subclavia
 - plexus
 - brachialis

Trigonum scalenovertebrale (trigonum a. subclaviae)

Borders:

caudal: cupula pleurae (2 cm above the clavicle)

lateral: m. scalenus ant.

medial: organs (trachea, thyroid gland, esophagus)

dorsal: m. longus colli

ventral: m. sternocleidomastoideus

Content:

angulus venosus – v. subsclavia + v. jugularis int.

(dx. tr. lymphaticus dx.; sin. ductus thoracicus)

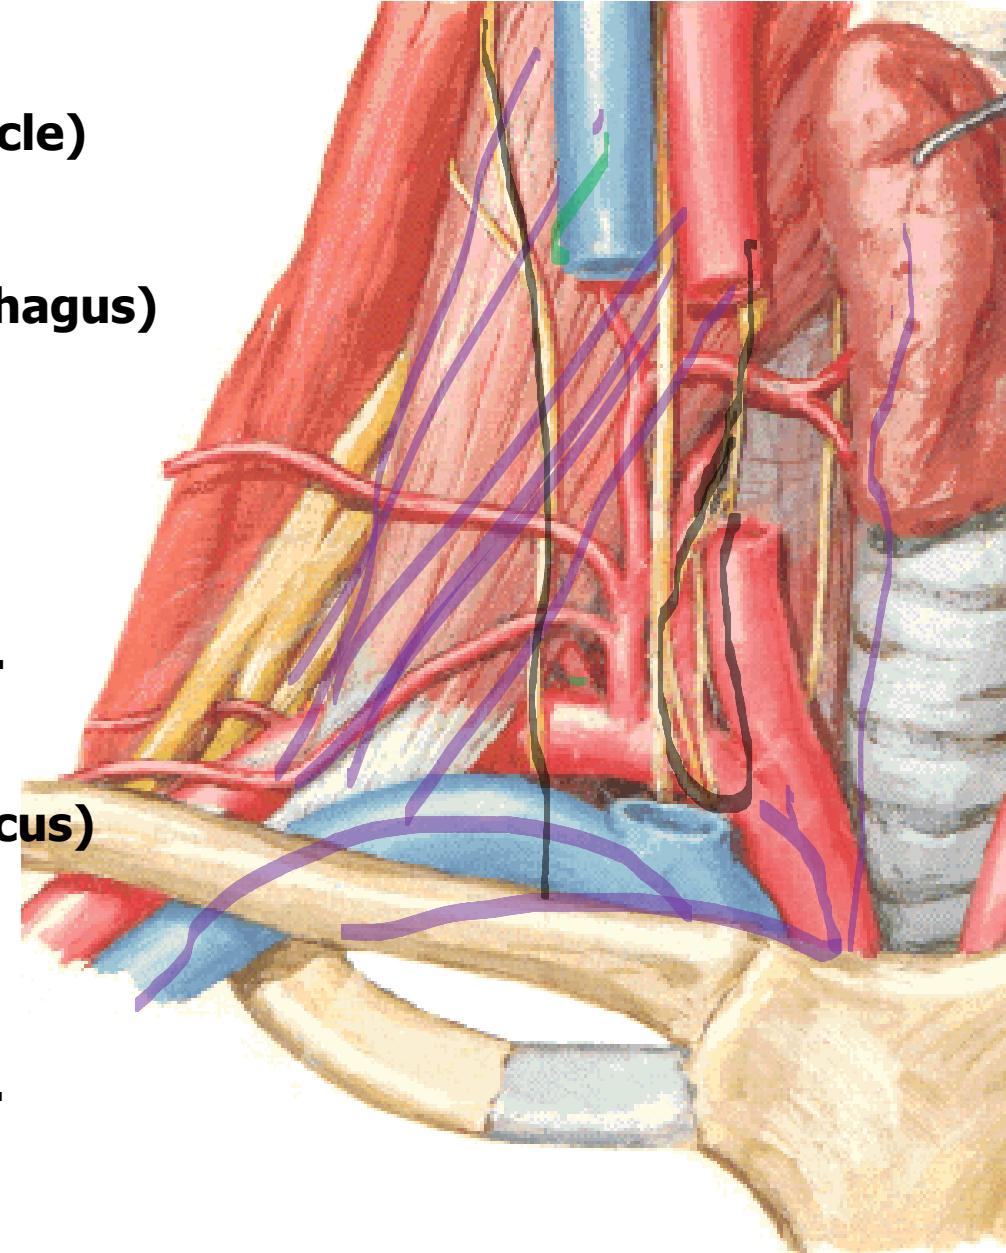

a. subclavia and branches (dx. tr. brachiocephalicus)

n. vagus – n. laryngeus recurrens

tr. sympatheticus and branches – ansa subclavia

ggl cervicale inf.

n. phrenicus

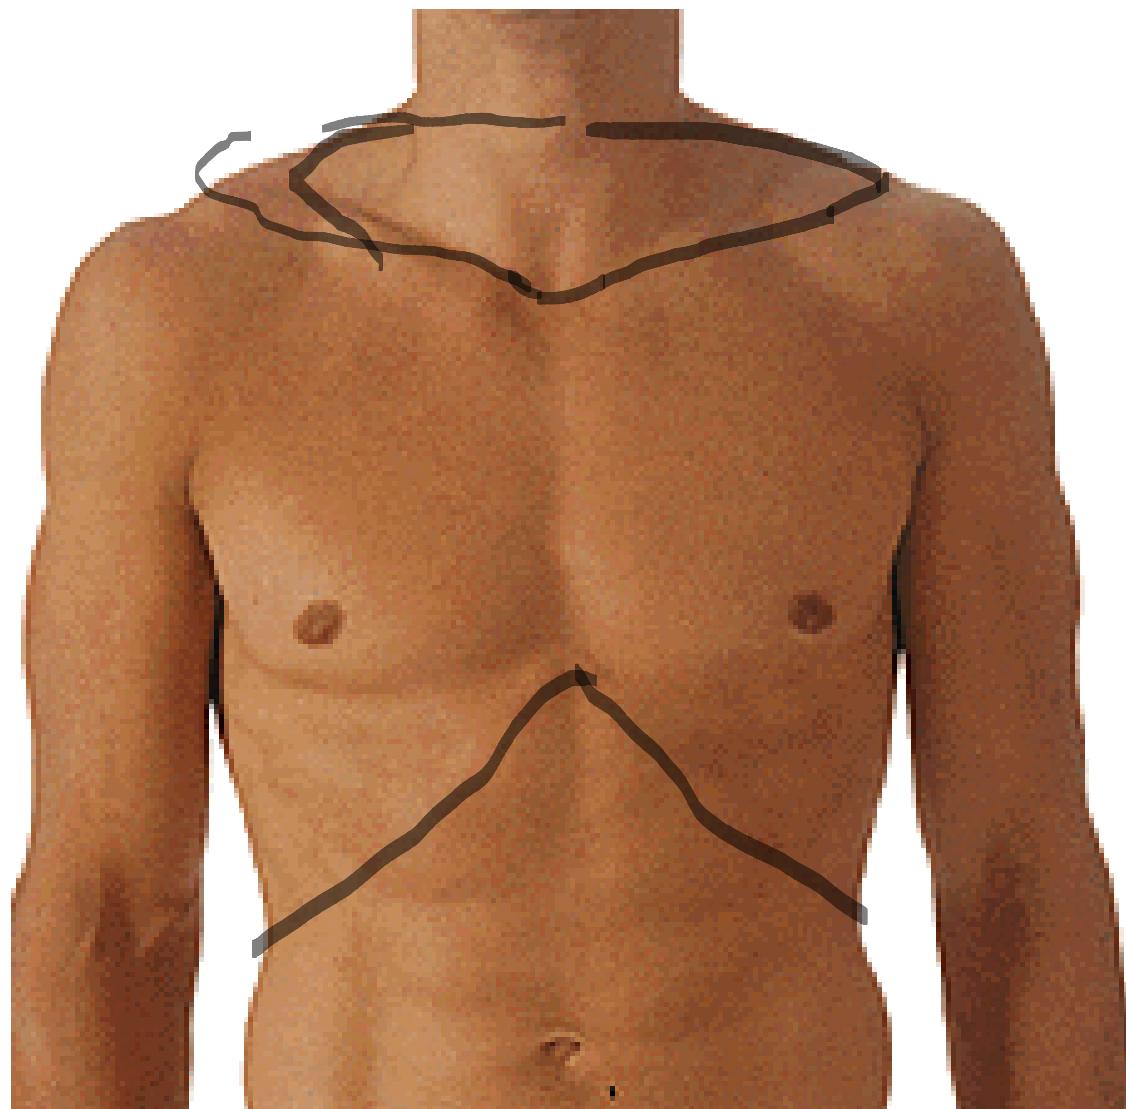

MUNI
MED

REGIONAL ANATOMY OF THE CHEST

CHEST

Superficial border against neck:

Incisura jugularis sterni

clavicula

acromion

vertebra prominens (C₇)

Superficial border against abdomen:

arcus costarum

Deep border against neck:

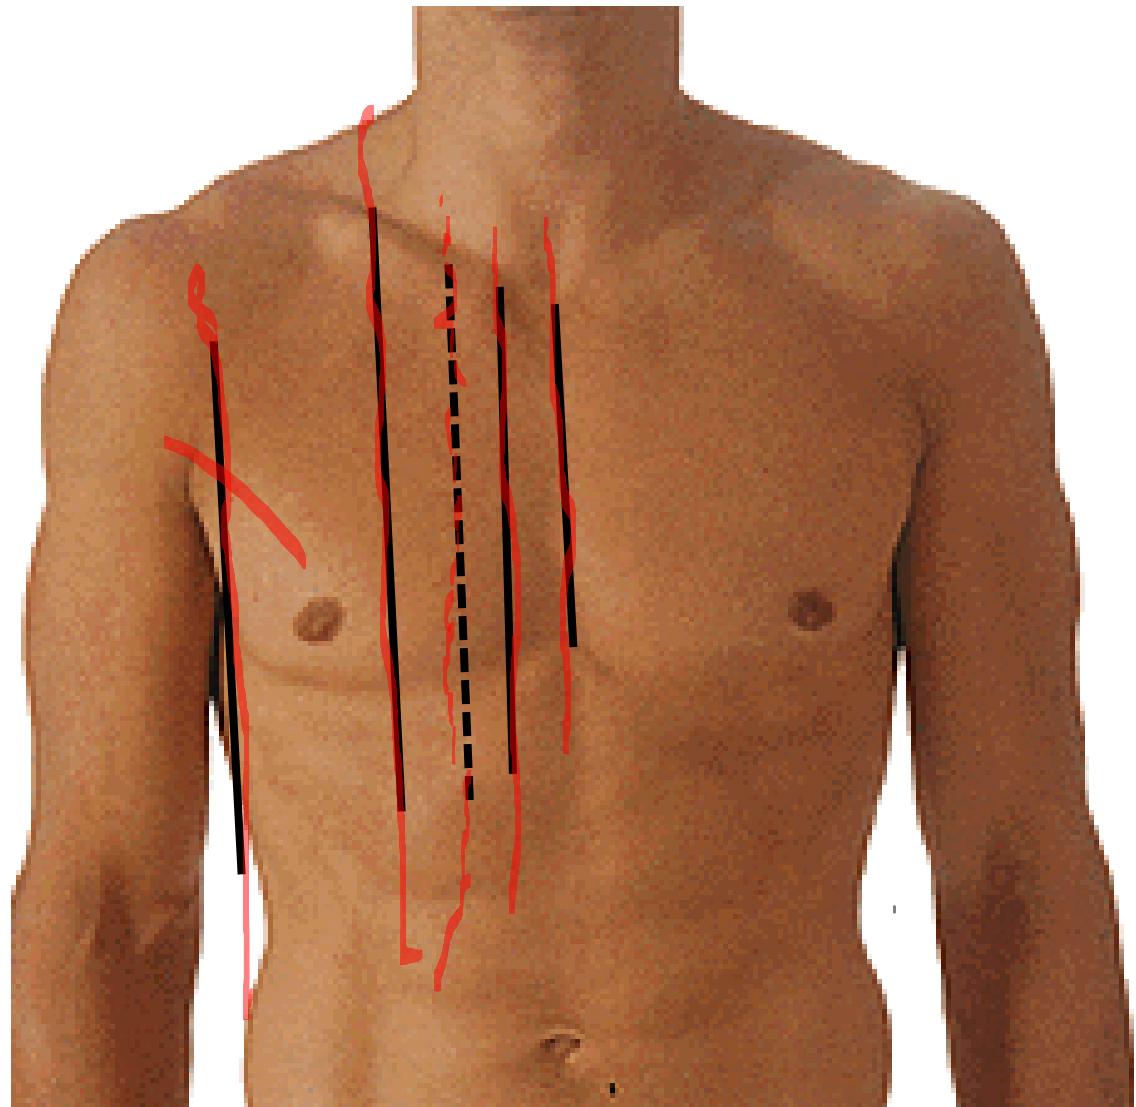

➡ **apertura thoracis superior**

Deep border against abdomen:

diaphragm

Orientation lines on the chest

Linea mediana anterior

Linea sternalis

Linea parasternalis

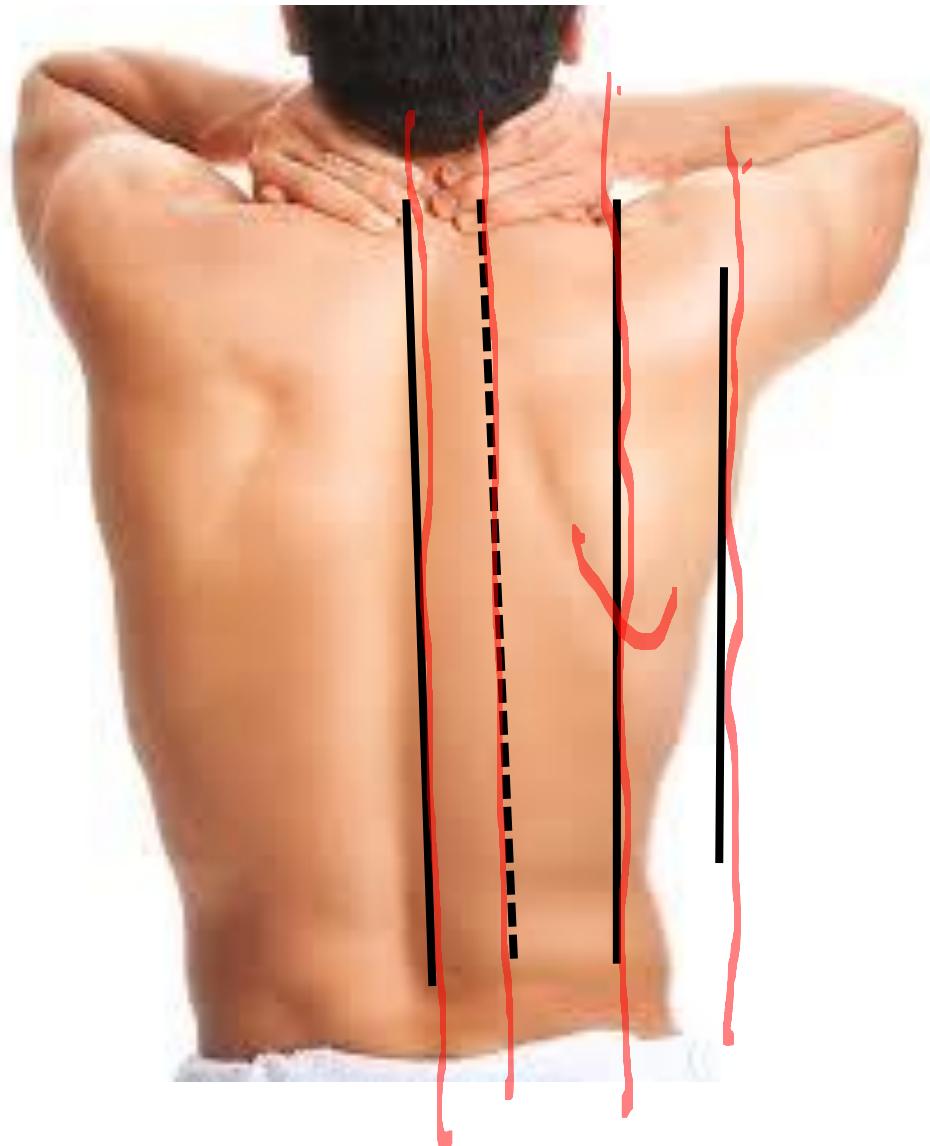

Linea medioclavicularis

Linea axillaris ant.

Linea axillaris media

Orientation lines on the chest

Linea mediana post.

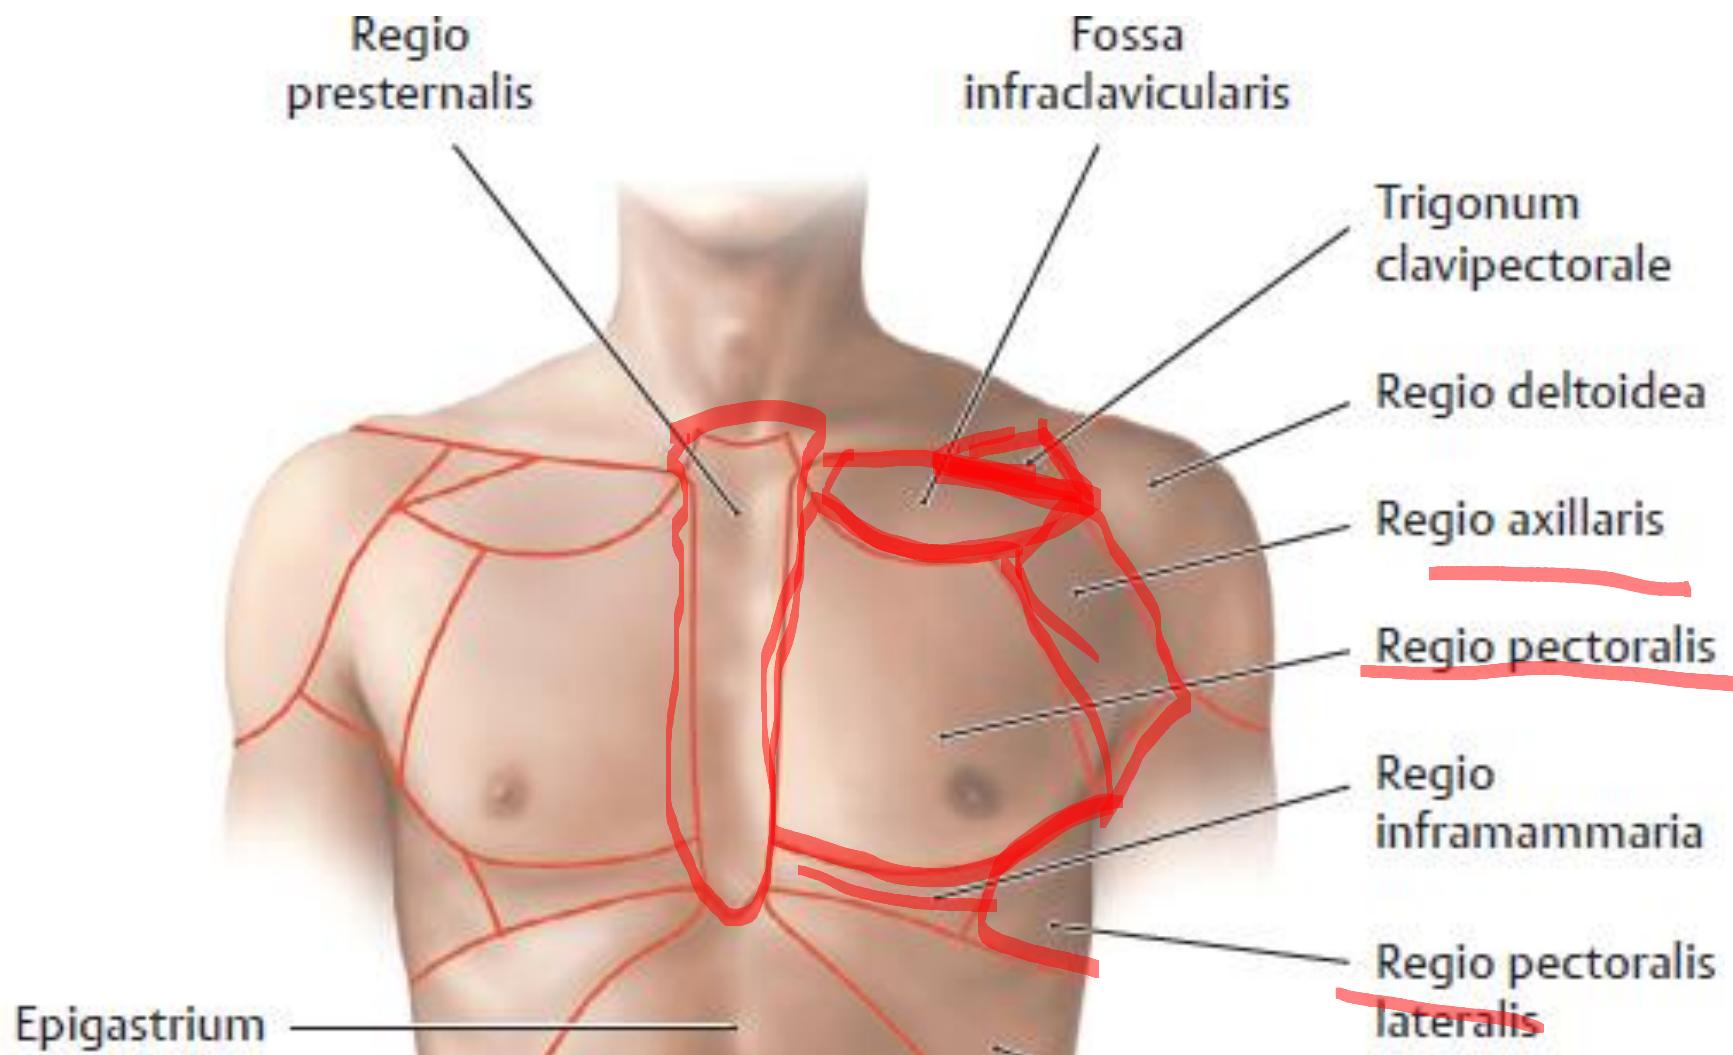

Linea paravertebralis

Linea scapularis

Linea axilaris post.

Regiones thoracis

Thoracic wall

Skin and subcutaneous tissue

v. thoracoepigastrica

rr. cutanei ant. et lat. (nn. intercostales)

fascia pectoralis

Heterochtonous muscles of the chest

mm. intercostales:

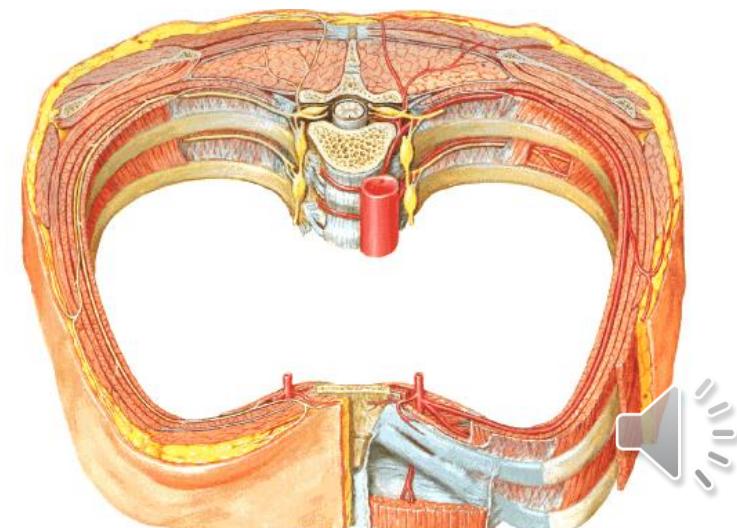

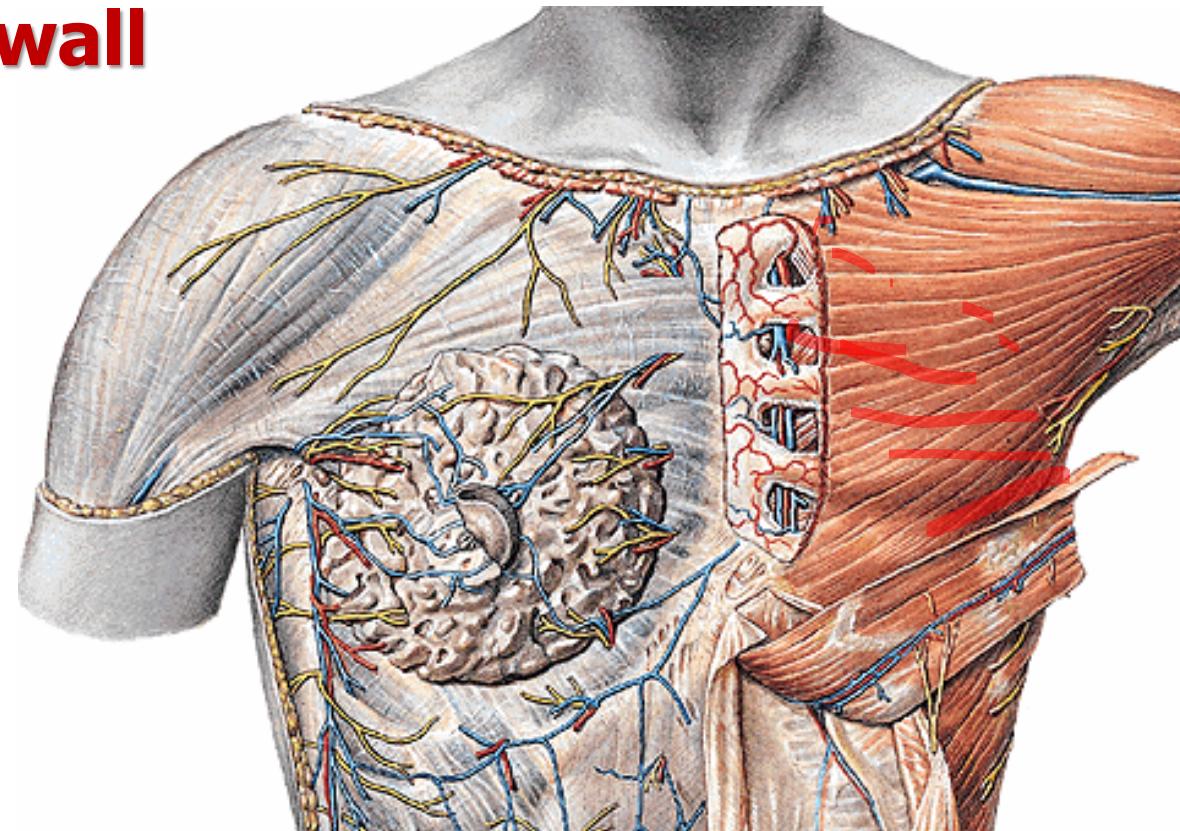

ext. + membrana intercostalis ext.

int. + membrana intercostalis int.

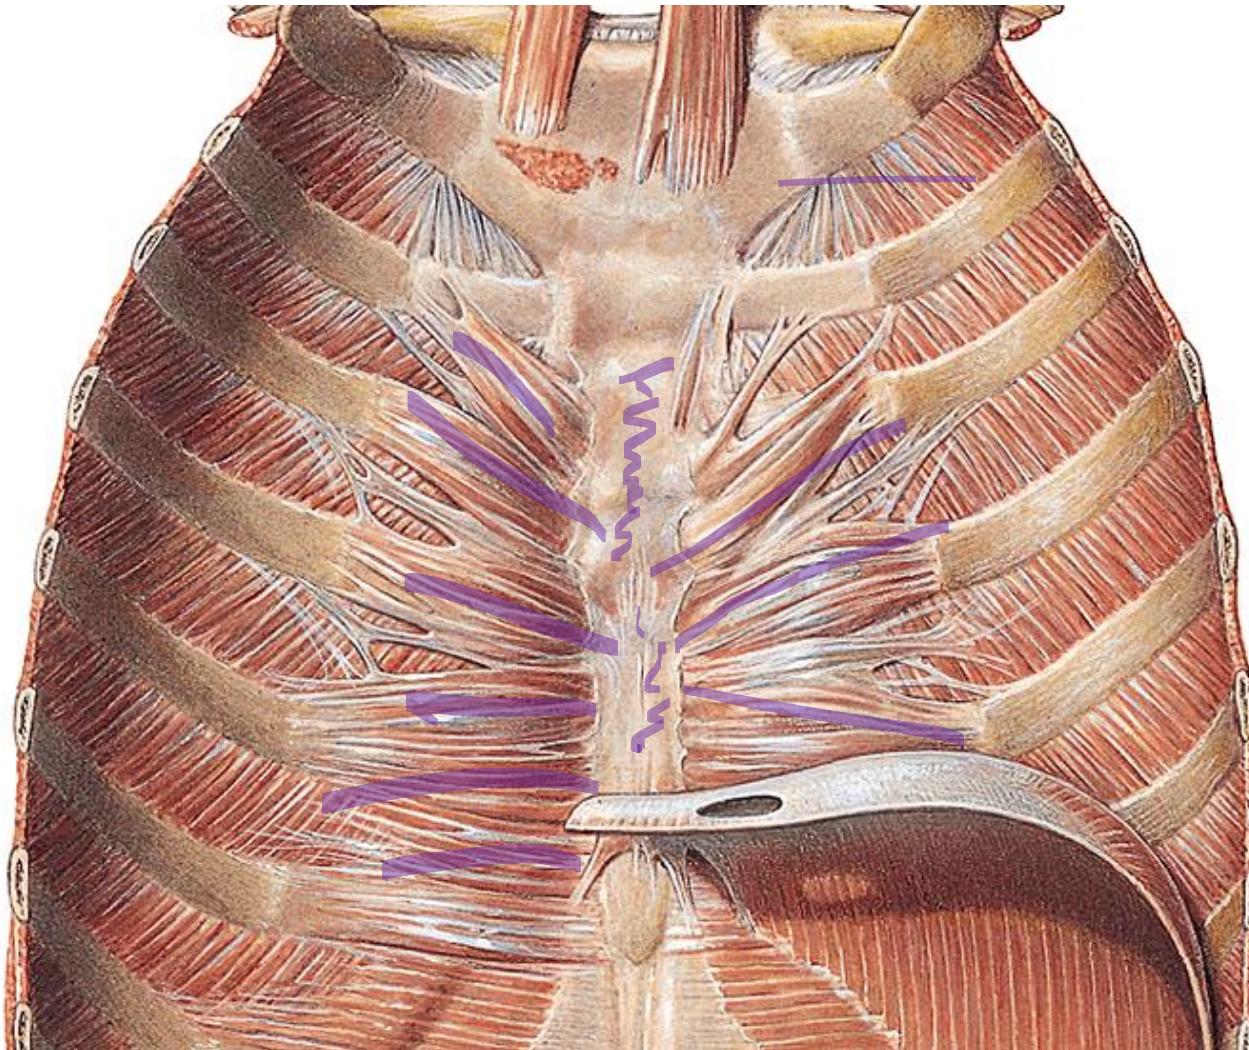

intimi

v., a., n. intercostalis (VAN) v sulcus costae

fascia endothoracica

Presternal region

Borders:

sternum

Content:

skin – hairs, glands

Subcutaneous tissue

innervation nn. supraclaviculares

periost (membrana sterni ext.)

sternum

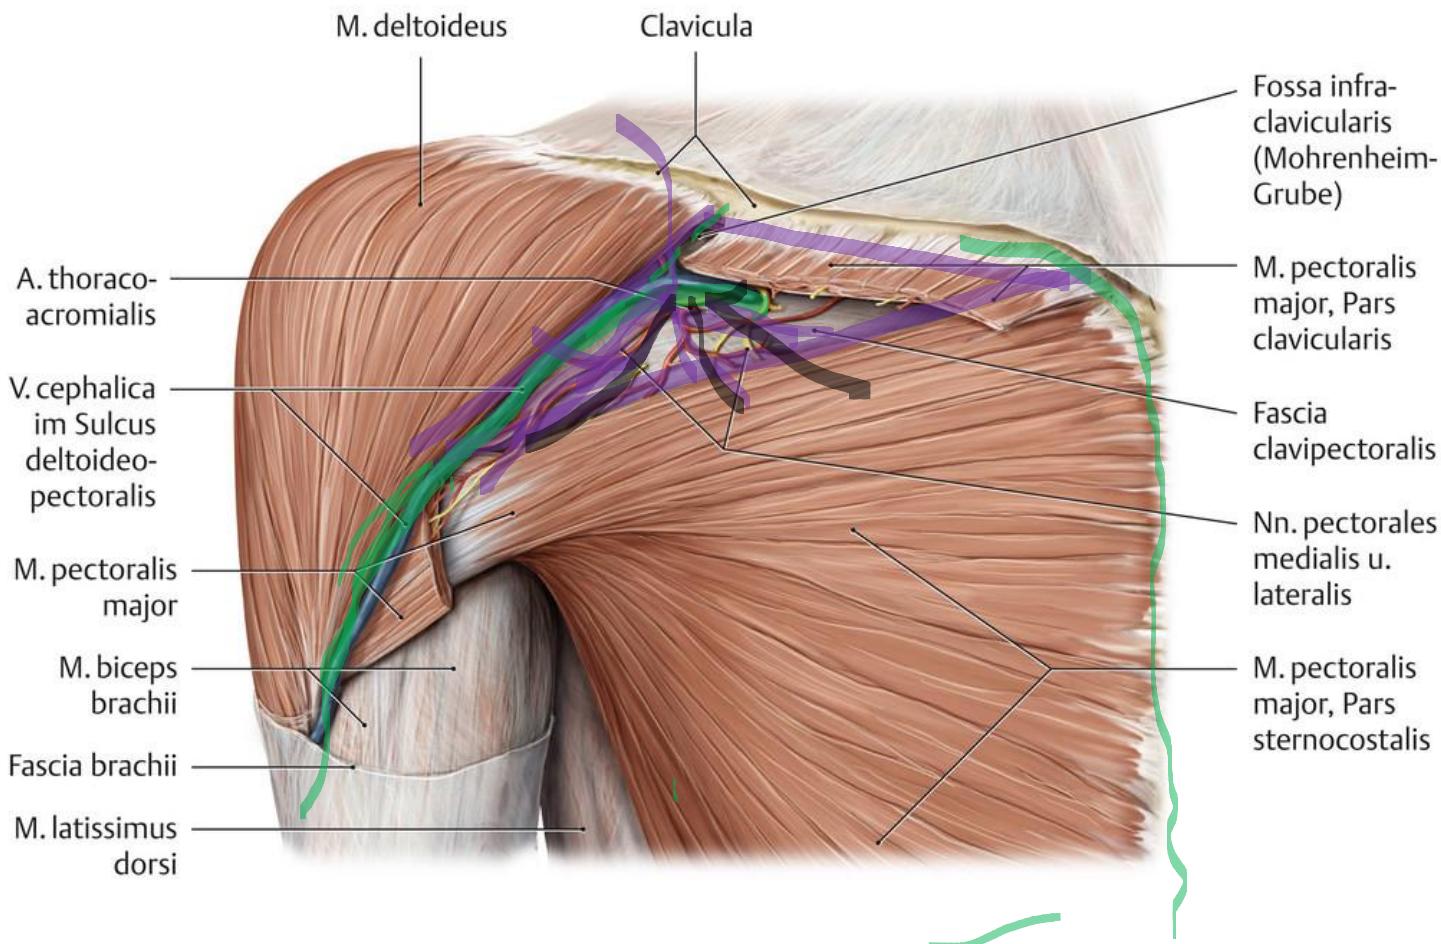

membrana sterni int.

m. transversus thoracis

fascia endothoracica

Trigonum deltoideopectorale (clavipectorale)

Borders:

clavícula

m. deltoideus

m. pectoralis major

Content:

Skin and subcutaneous tissue

v. cephalica (sulcus deltoideopectoralis)

innervation nn. supraclaviculares

fascia clavipectoralis

a. thoracoacromialis (a. axillaris)

nn. pectorales

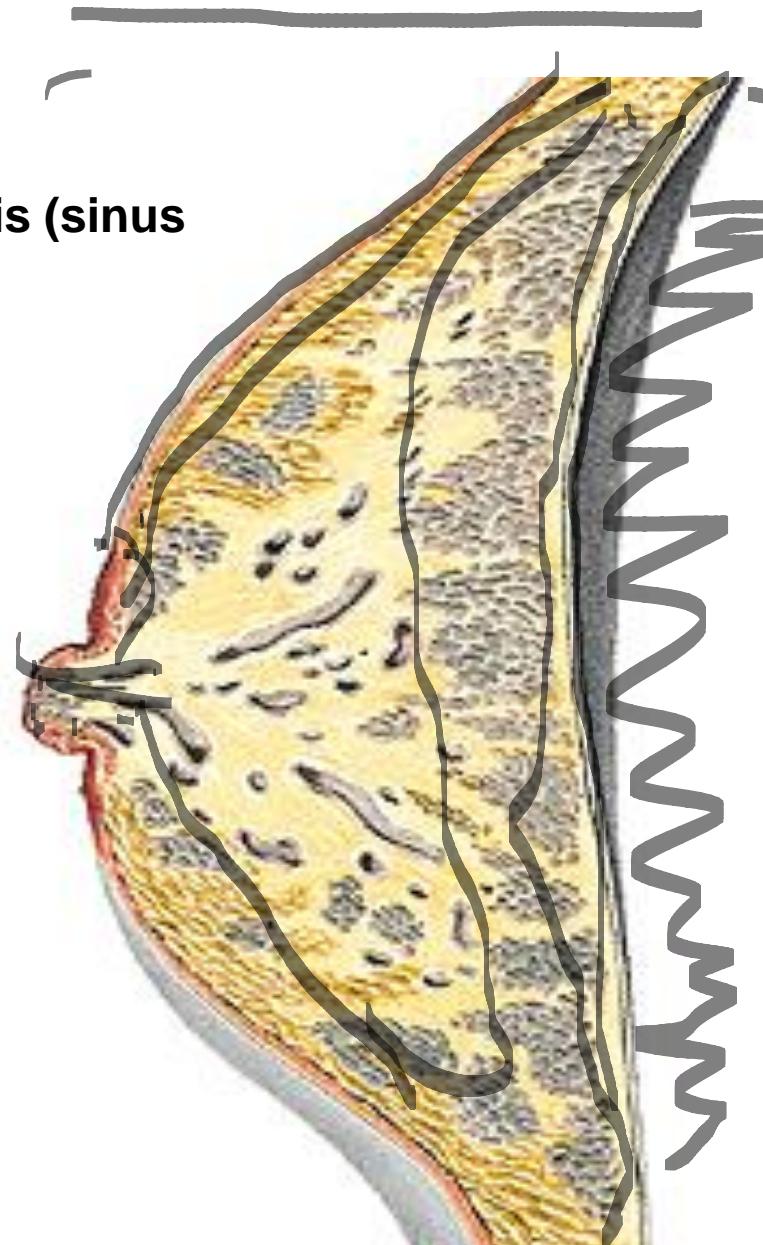

Regio mammaria

Borders:

from 3rd to 6th intercostal space

linea axillaris ant. – linea parasternalis (sinus
mammarum)

Breast morphology:

skin

areola mammae

(gll. areolares mammae)

papilla mammae

(area cribriformis, ductus lactiferi)

Subcutaneous tissue:

m. subareolaris

praemammary fat

corpus mammae with proc.

axillaris

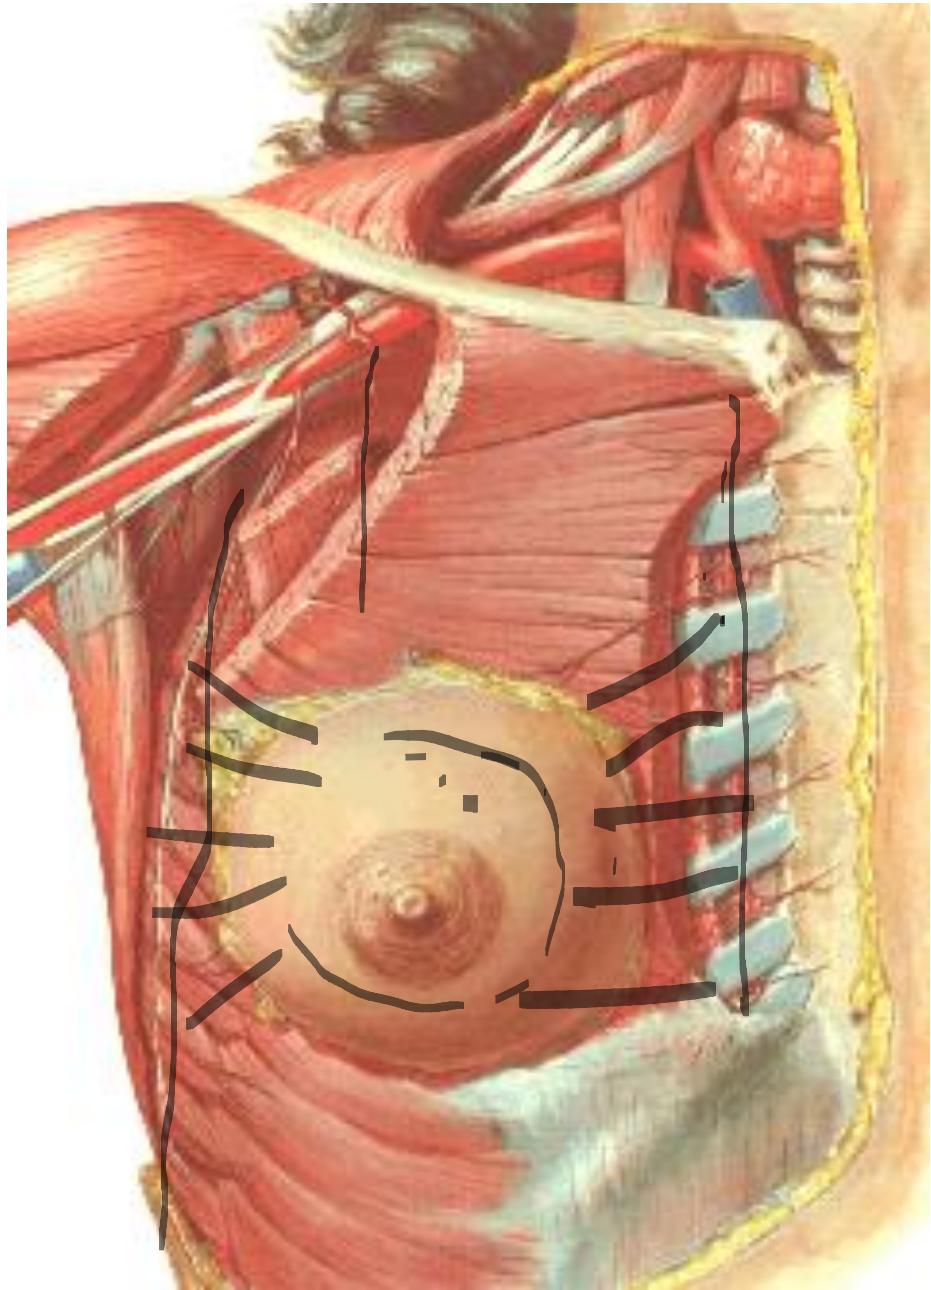

retromammary fat

fascia pectoralis

mm. pectorales

Regio mammaria

Arteries:

- a. thoracica interna (rr. mammarii med.)
- a. thoracica lateralis (rr. mammarii lat.)
- a. thoracica suprema
- aa. intercostales post. (from 4. – Piet´s papillary artery)

Veins

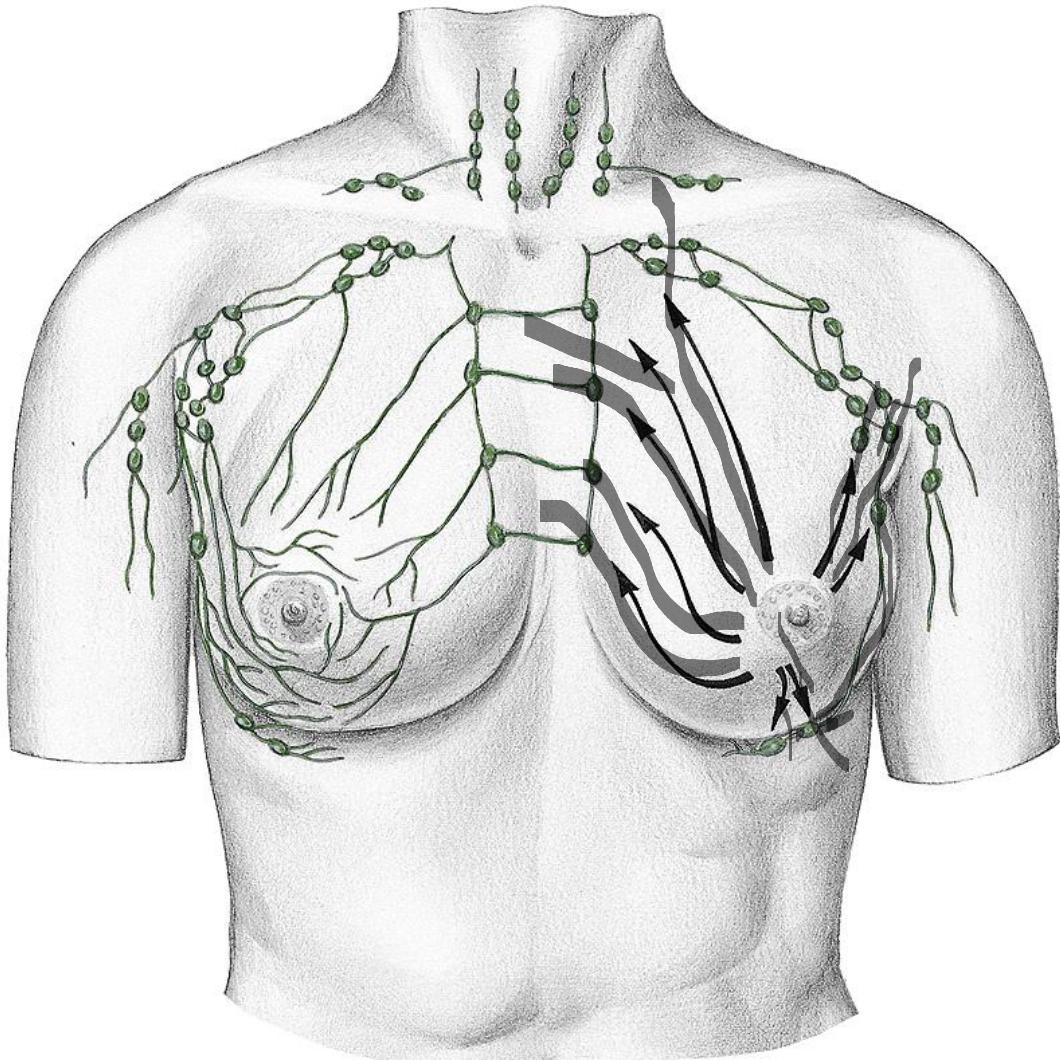

circulus venosus Halleri

Innervation:

nn. intercostales

Regio mammaria – lymphatic drainage

nll. axillares

↳ Sorgius l.n. (m. serratus ant.)

nll. parasternales

nll. supraclaviculares

nll. intercostales

nll. mediastinales ant.

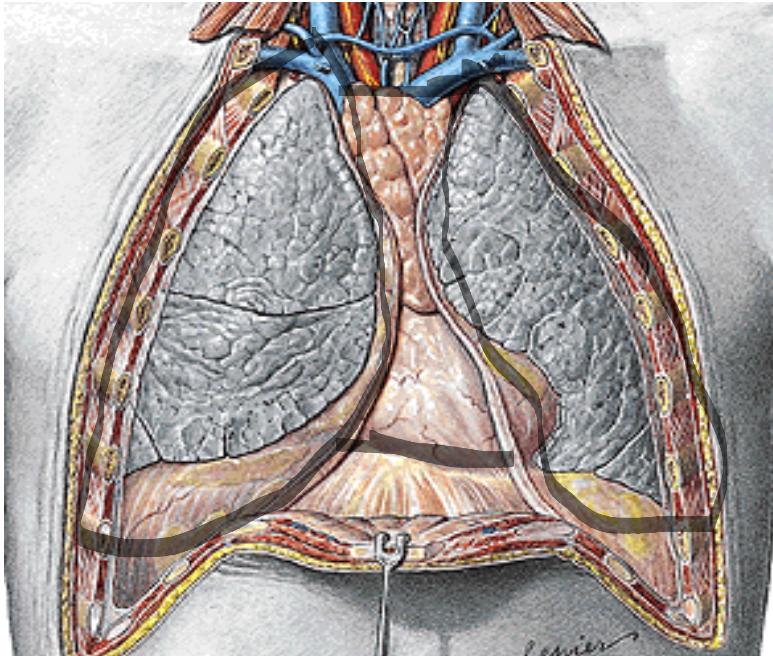

Cavitates pleurales

pleura parietalis et visceralis

cavitas pleuralis dextra et sinistra

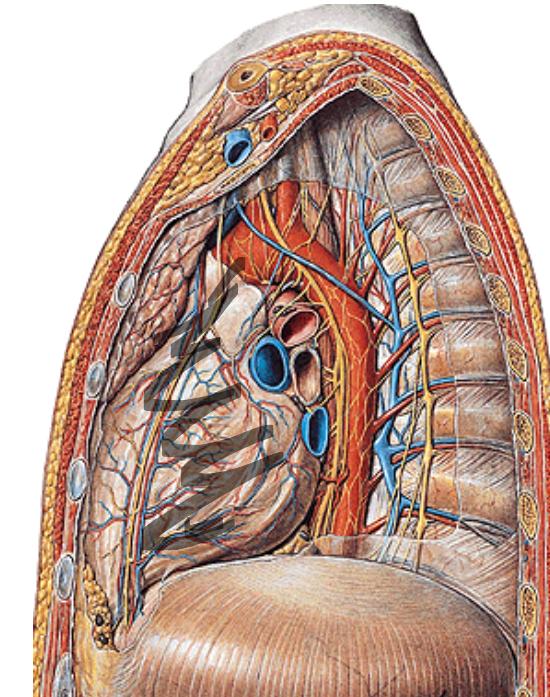

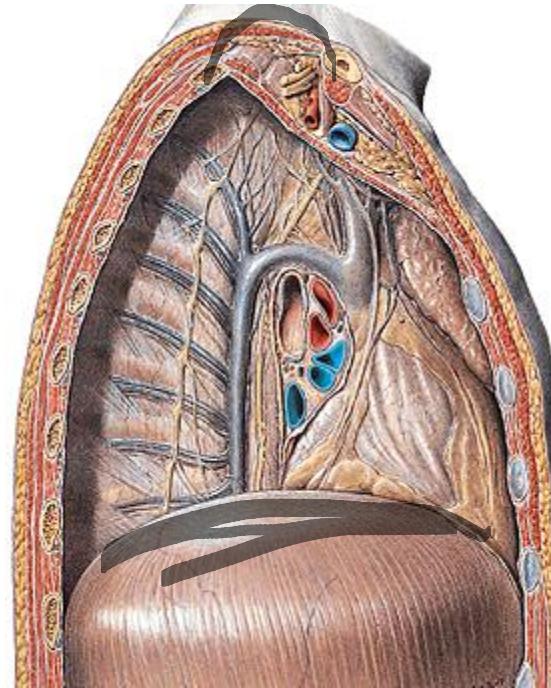

lig. pulmonale, mediastinum

cupula pleurae (2 cm above clavicle)

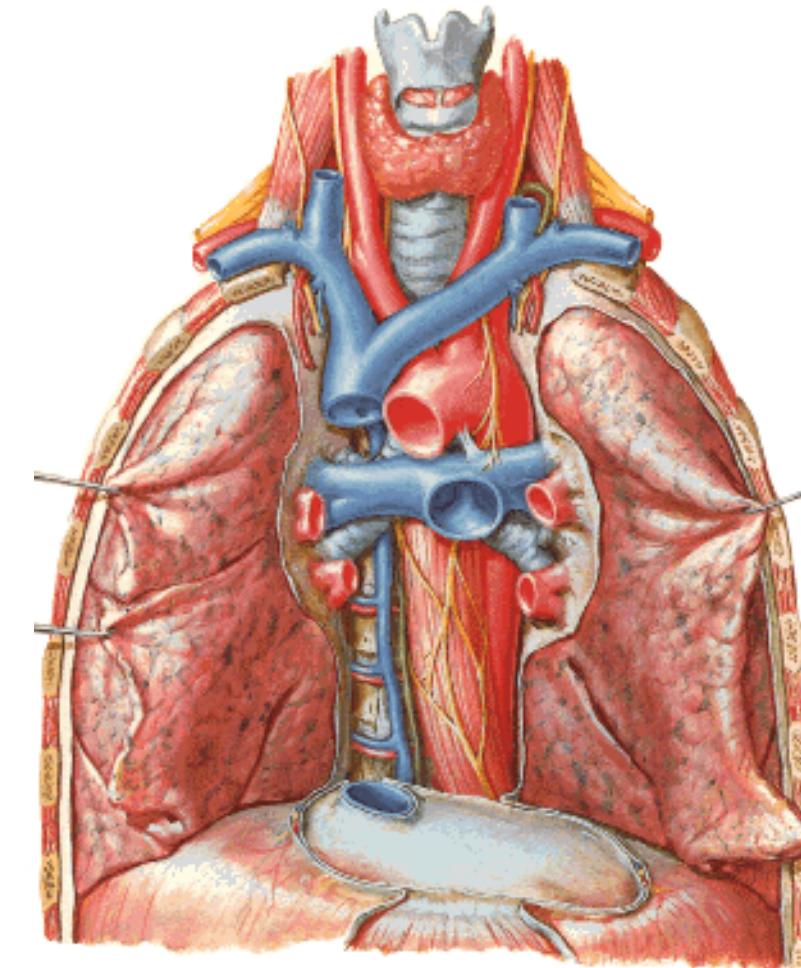

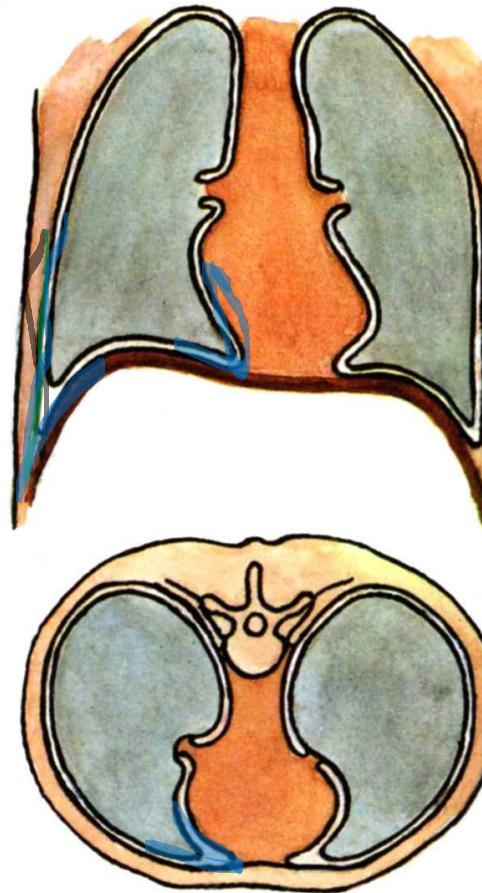

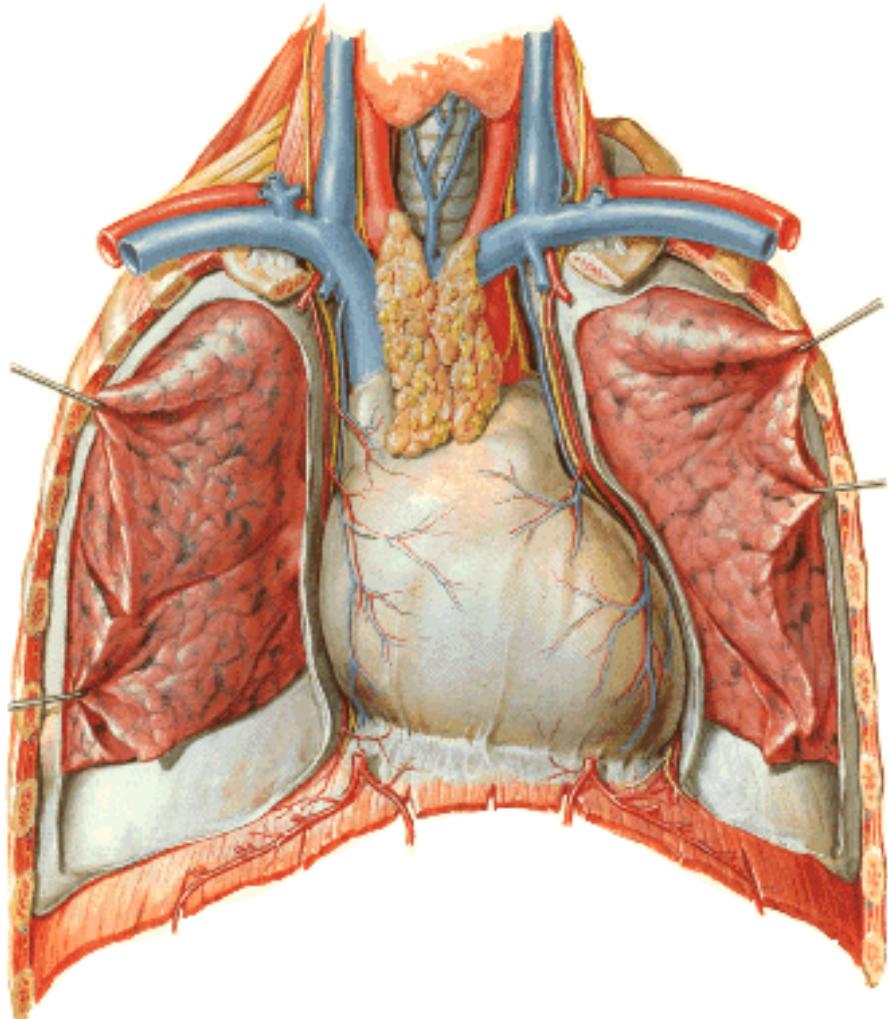

pleura parietalis:

costalis, diaphragmatica, mediastinalis

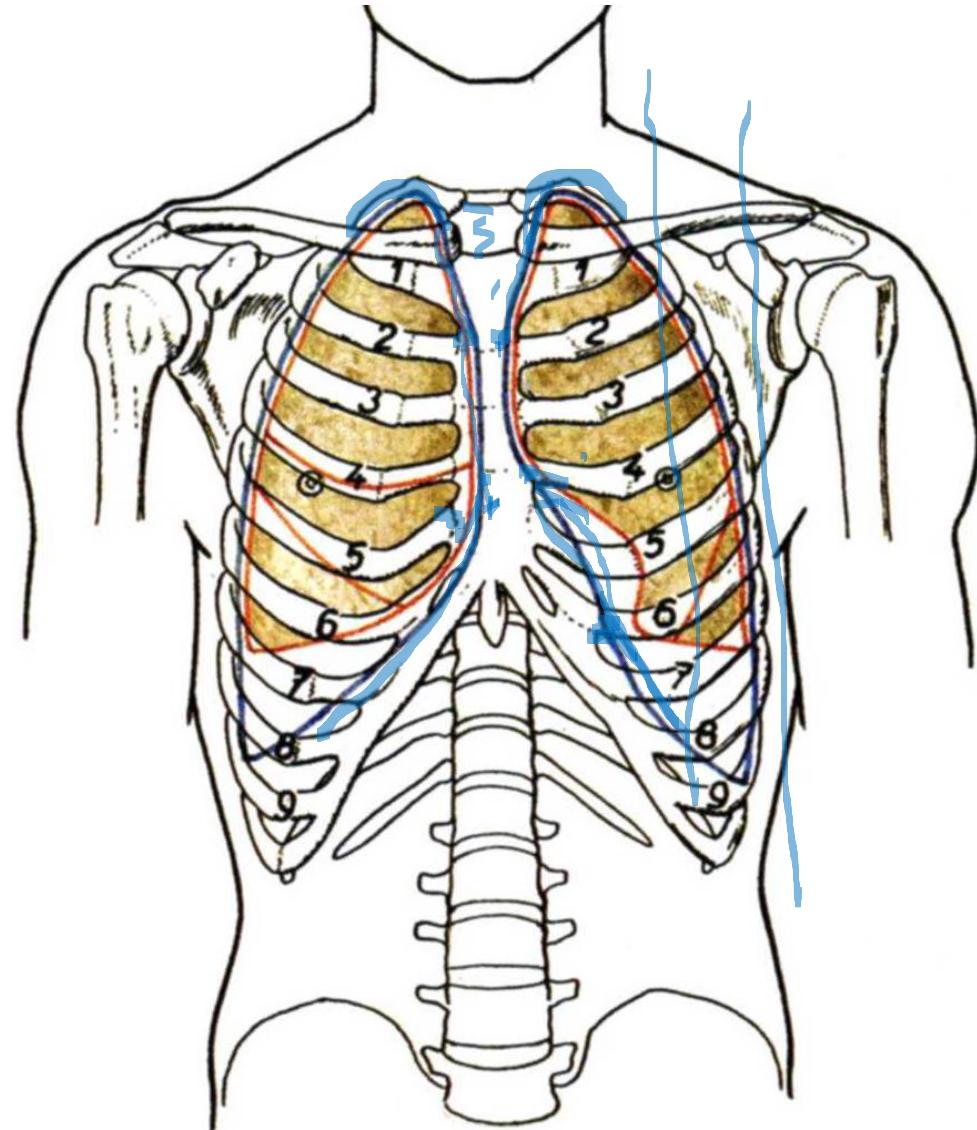

Recessus pleurales

recessus costodiaphragmaticus, costomediastinalis, phrenicomediestinalis

Projection of the pleura and lungs

cupula pleurae – 2 cm above clavicle

art. sternoclavicularis – 2nd sternocostal connection

area interpleuralis sup. (thymica)

4th sternocostal connection –incisura cardiaca (left) to 6th rib

area interpleuralis inf. (pericardiaca)

linea medioclavicularis – 7th rib

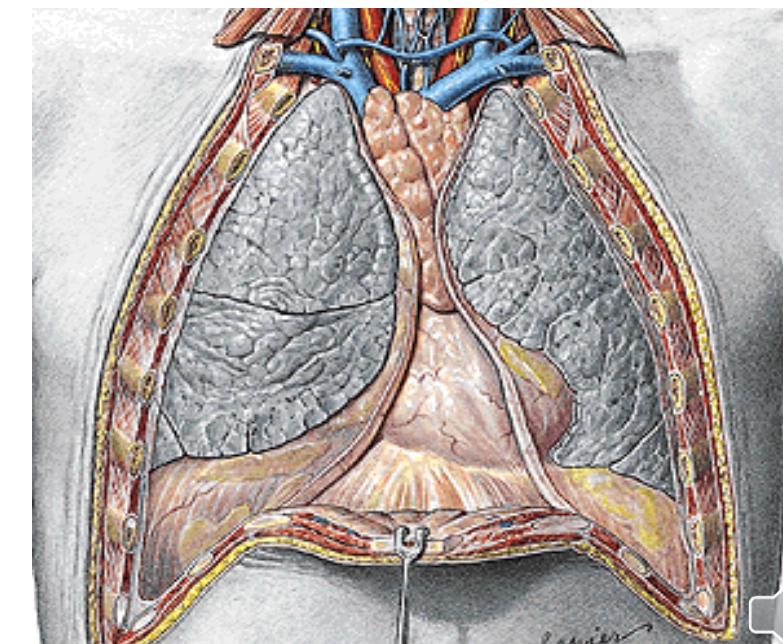

linea axillaris ant. – 8th rib

Lungs

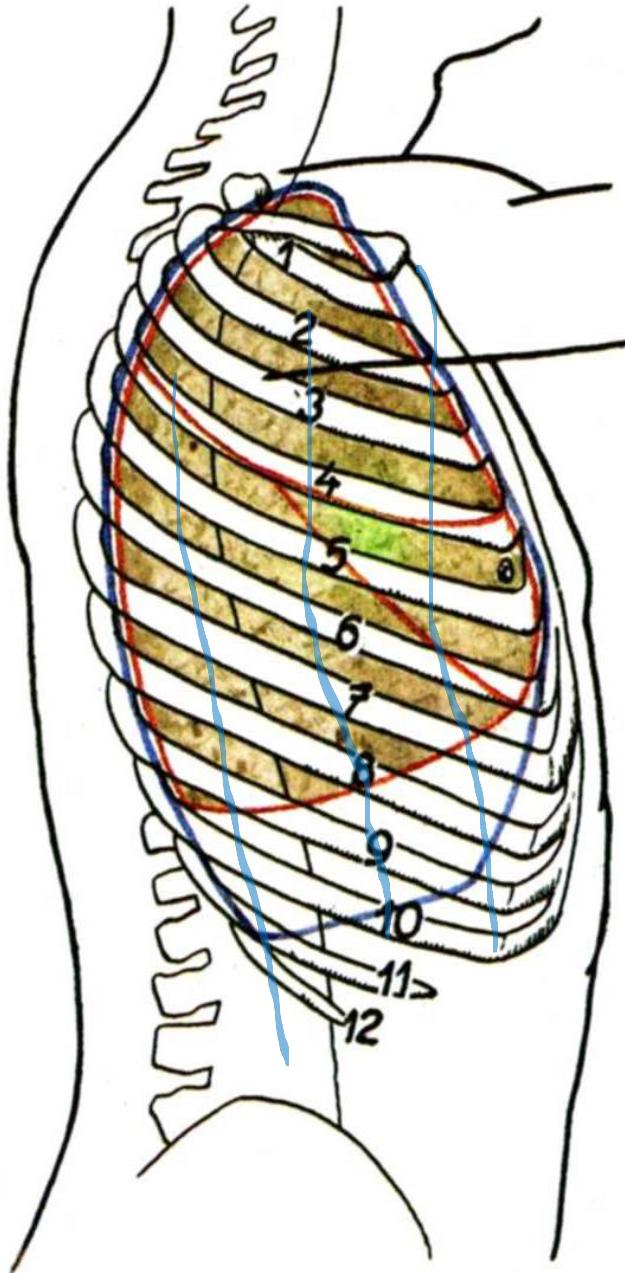

ventrally – similar to pleura

caudally – 1 to 2 intercostal

spaces canially

Projection of the pleura and lungs

Pleura:

linea medioclavicularis – 7th rib

linea axillaris ant. – 8th rib

linea axillaris med. – 9th rib

linea axillaris post. – 10th rib

Lungs:

1 or 2 intercostal spaces cranially

Projection of the pleura and lungs

Caudal border - pleura:

linea axillaris post. – 10th rib

linea scapularis – 11th rib

linea paravertebralis – 12th rib

Posterior border - pleura:

From 12th rib in paravertebral line to cupula pleurae

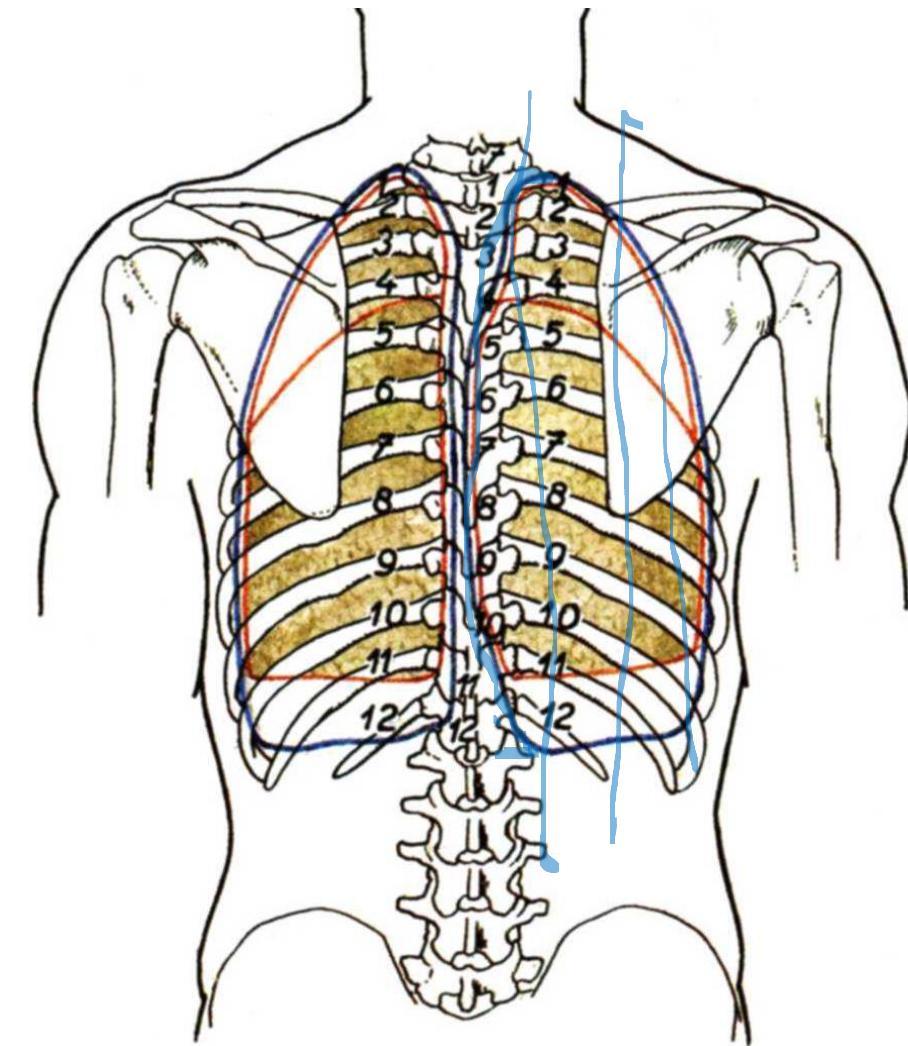

Th₁₂ - Th₄ on the right – recessus retrooesophageus

Caudal border - lungs:

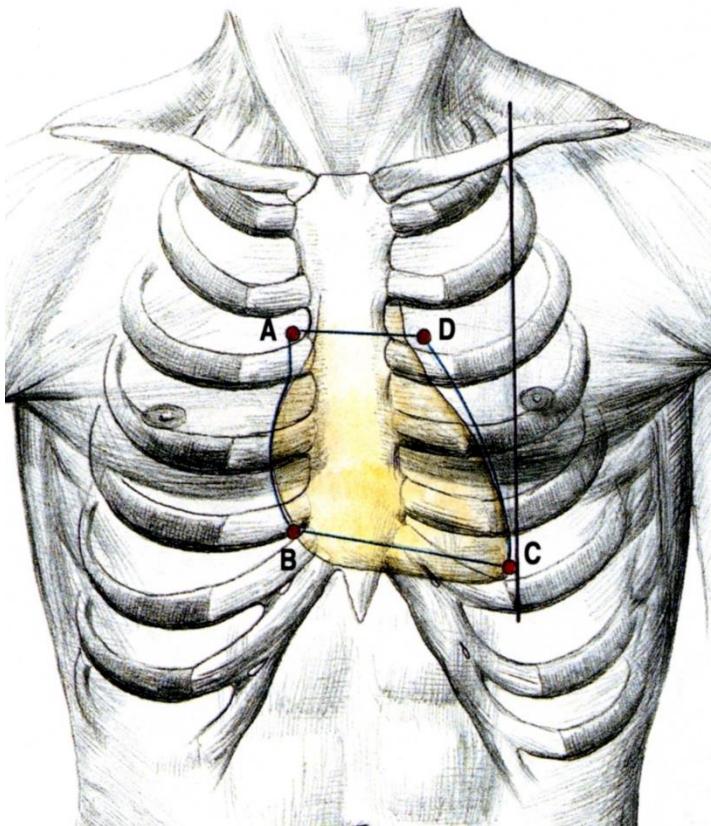

1 or 2 intercostal spaces cranially

Posterior border:

Paravertebral line (bilat.)

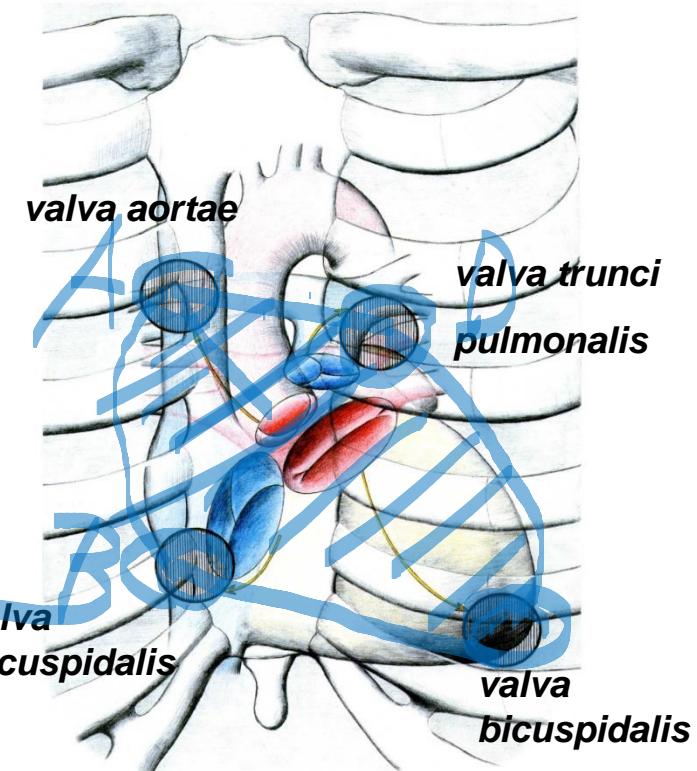

Projection of the heart

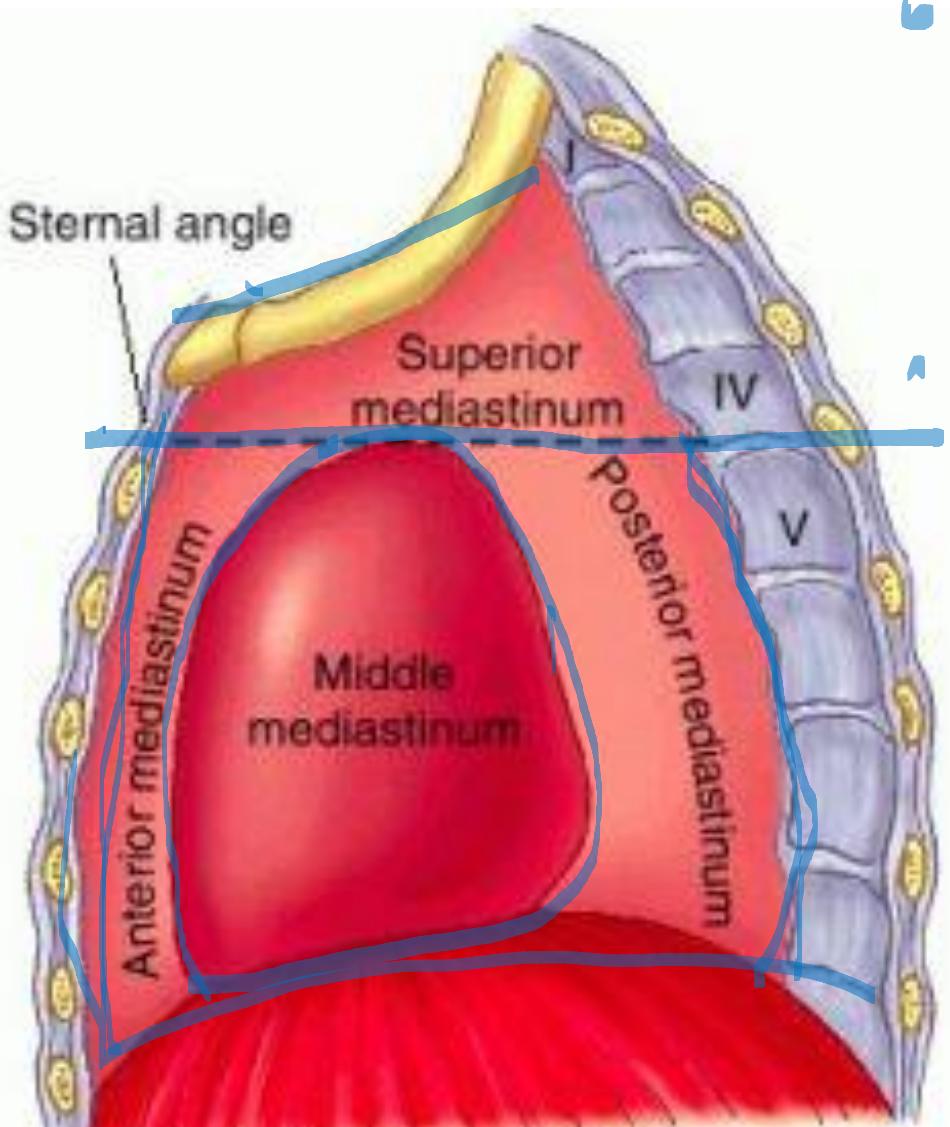

Auscultation points:

- A** 2nd right intercostal space – 1 cm from sternum
- B** 5th right intercostal space – next to the sternum
- C** 5th left intercostal space– 1cm medially from linea medioclav.
- D** 2nd left intercostal space – 2cm from sternum

Mediastinum

Space between pleural cavities

Mediastinum superius

apertura thoracis sup. → plane of sternal angle and 4th intervertebral disc

Mediastinum inferius:

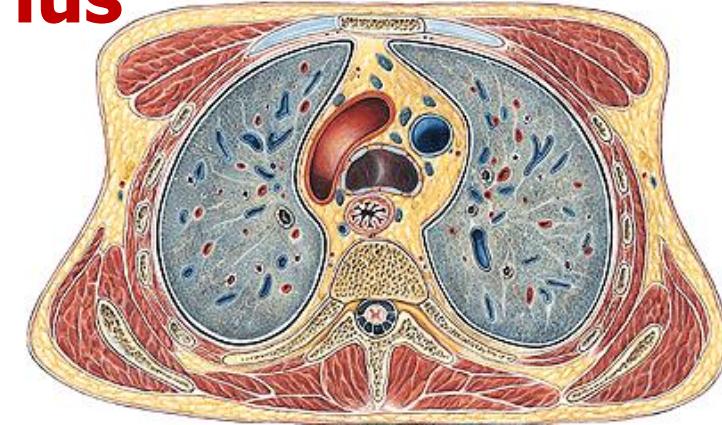

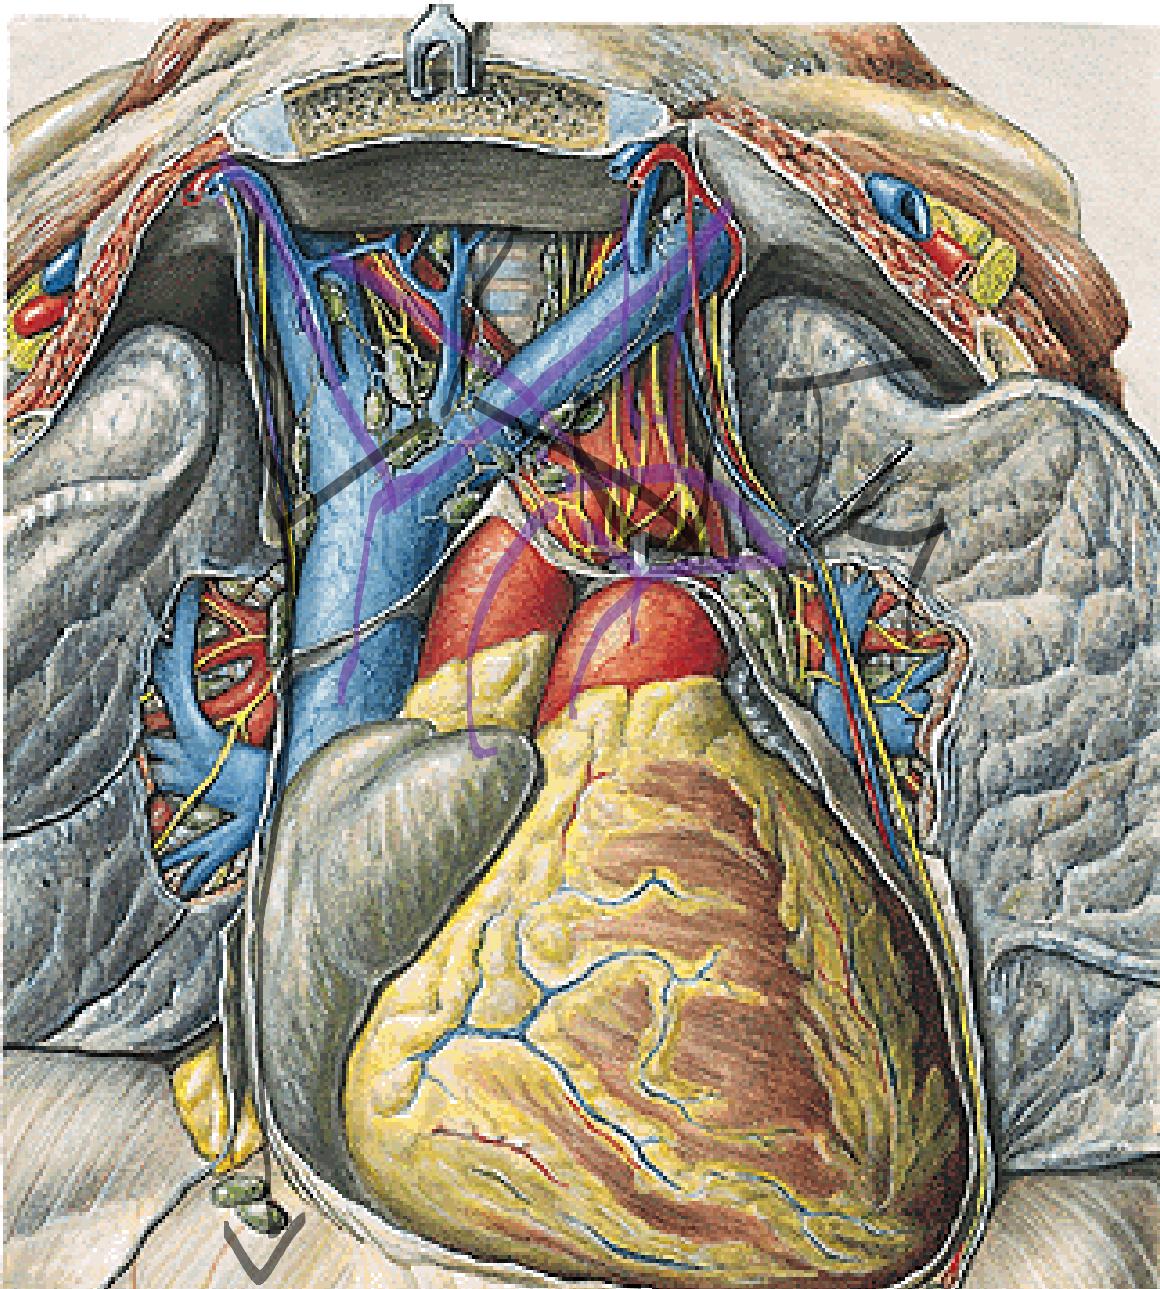

anterius – between sternum and pericardium

medium – pericardiac sac with heart

posterior – between pericardium and vertebrae

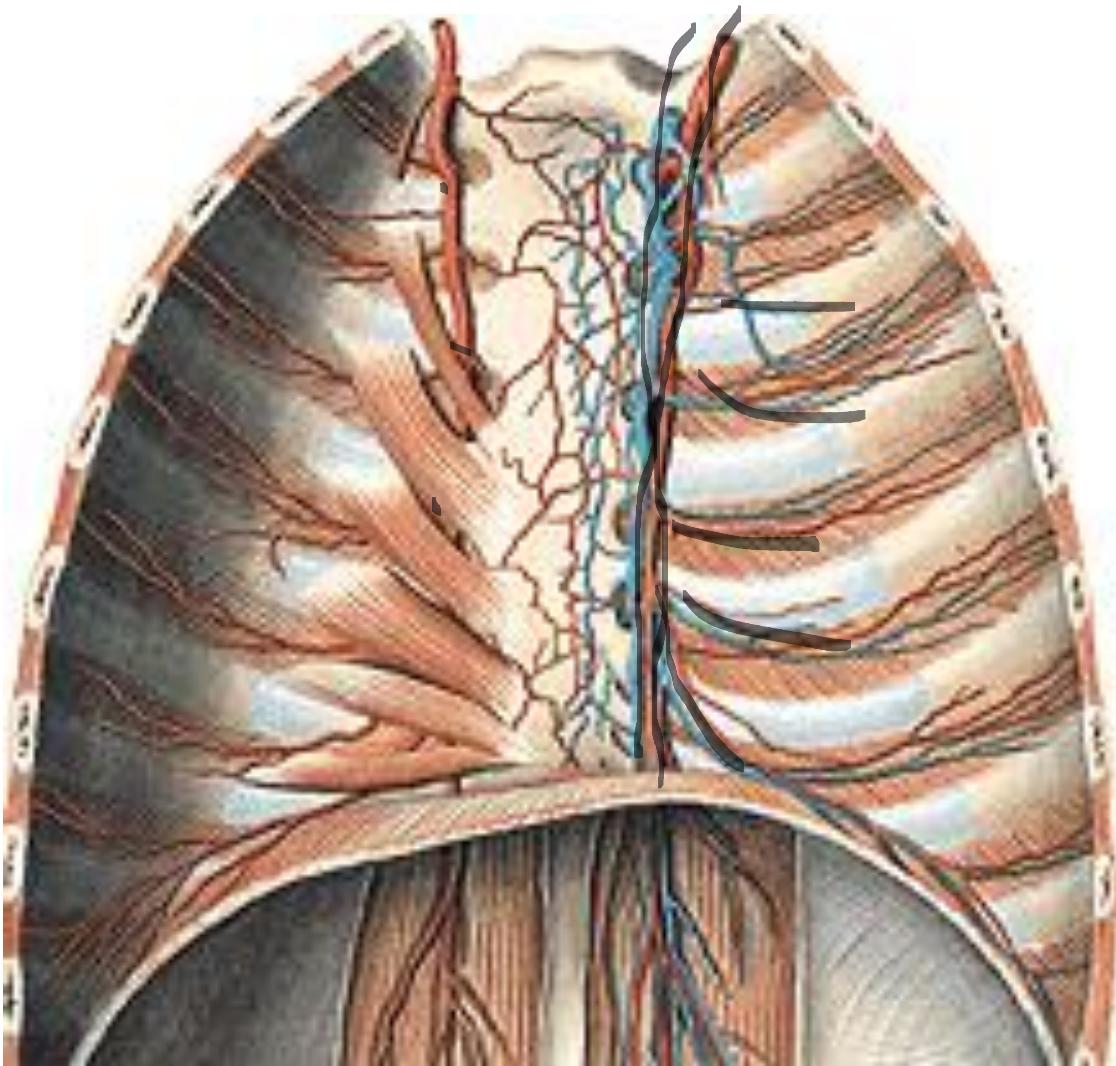

Mediastinum superius

- thymus
- Venous layer
 - vv. brachiocephalicae + v. cava sup.
- Arterial layer
 - tr. pulmonalis, aorta asc., arcus aortae + branches
 - tr. sympatheticus + branches
 - n.vagus – n. laryngeus recursens !
 - n. phrenicus
- trachea – bifurcatio + bronchi
- esophagus
- nnl. mediastinales anteriores

Mediastinum anterius

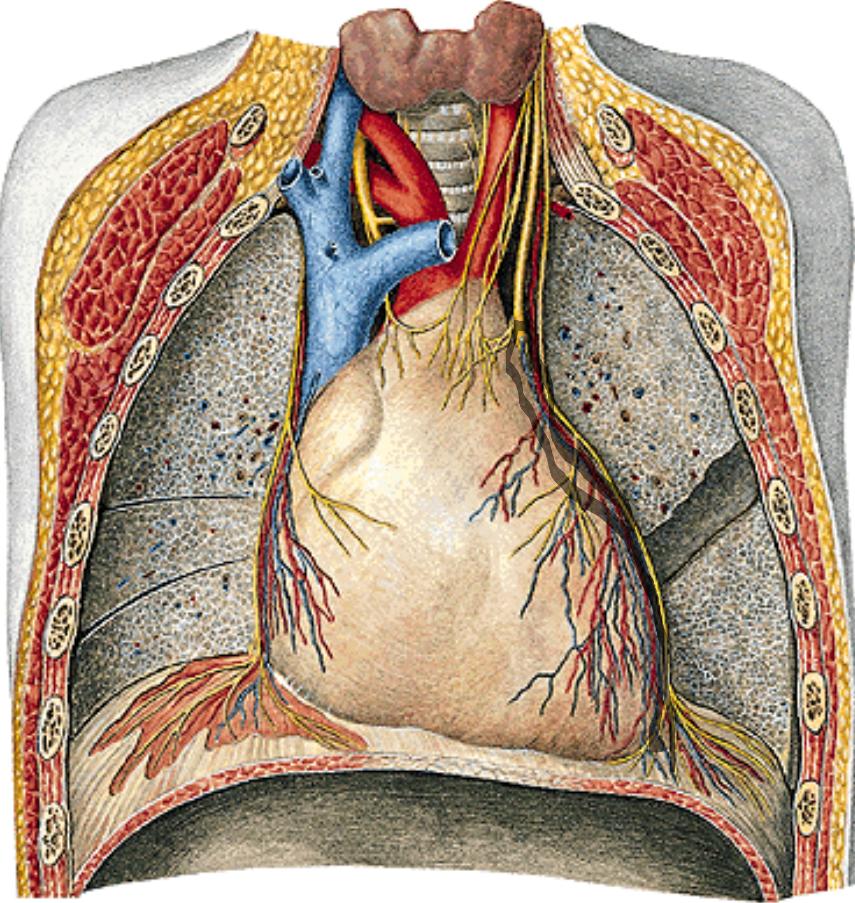

ligg. pericardiophrenica

vasa thoracica int. – branches and tributaries

nnl. parasternales

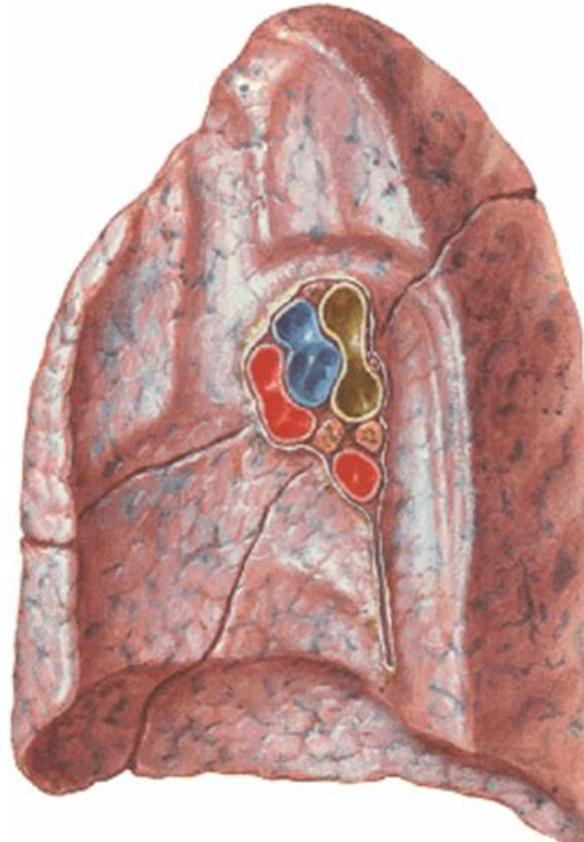

Mediastinum medium

vasa pericardiacophrenica

n. phrenicus

nll. mediastinales ant.

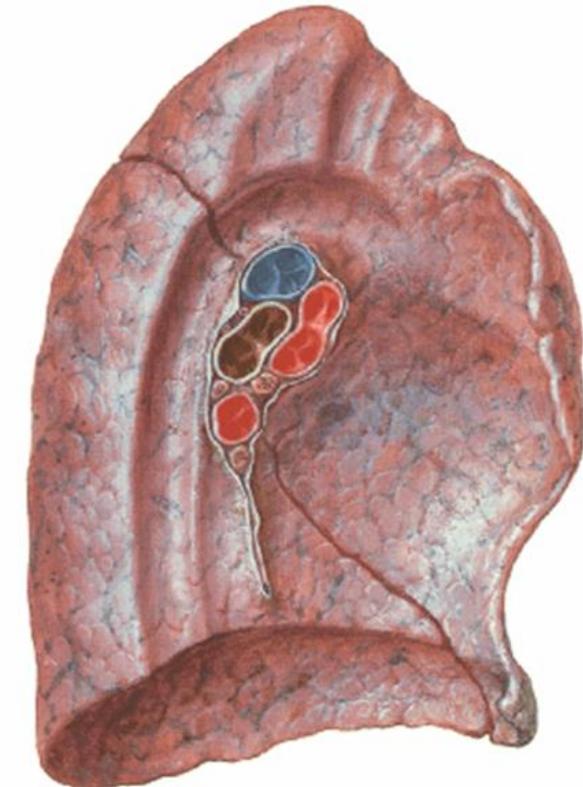

hilus pulmonis dx. (BAV)

bronchus principalis dx.

a. pulmonalis dx.

vv. pulmonales dx.

hilus pulmonis sin. (ABV)

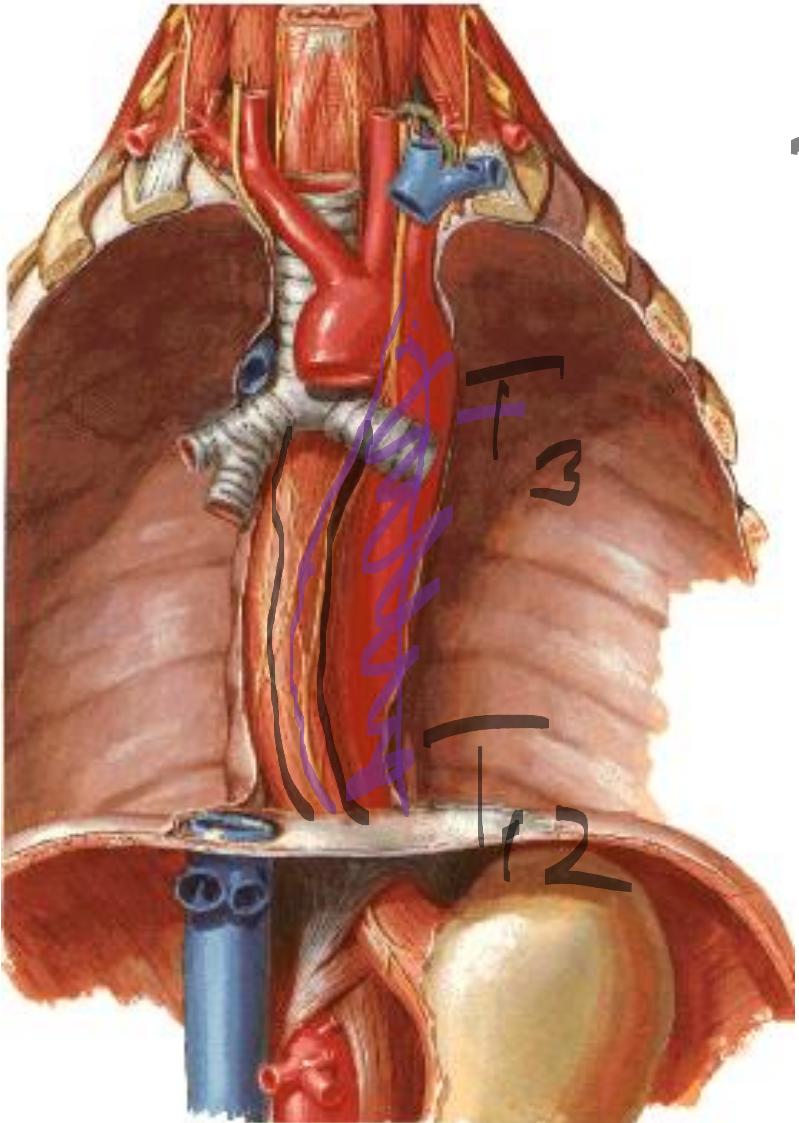

a. pulmonalis sin.

bronchus principalis sin.

vv. pulmonales sin.

Mediastinum posterius

oesophagus

n. vagus

plexus oesophageus

aorta thoracica

v. azygos

Th₇-Th₉ v. hemiazygos, v. hemiazygos acc.

ductus thoracicus

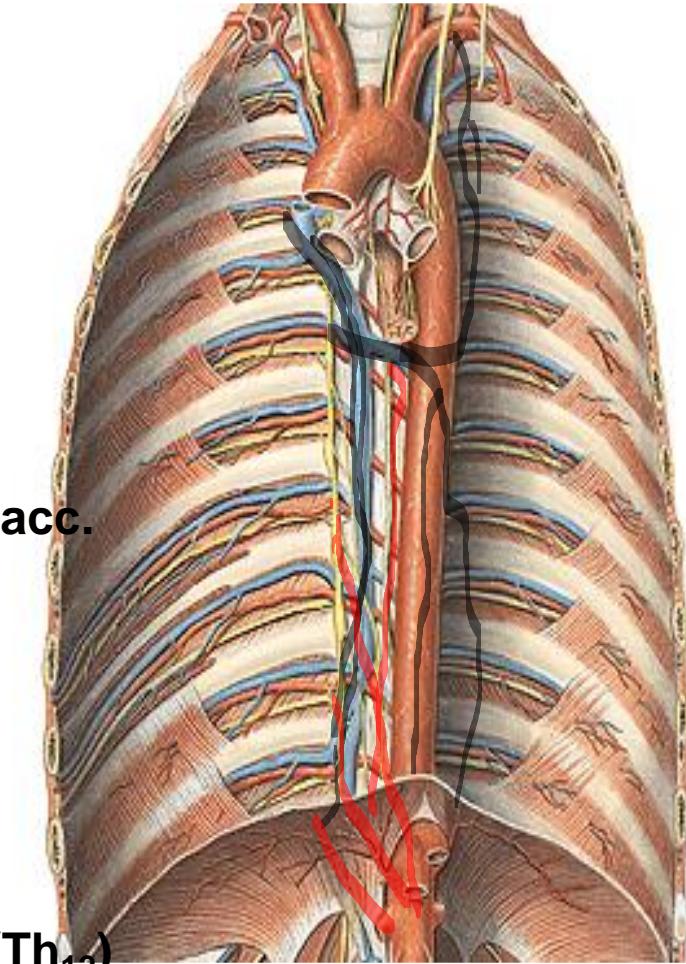

between v. azygos, aorta

truncus sympatheticus

nn. splanchnici

major (Th₆₋₉), minor (Th₁₀₋₁₁), imus (Th₁₂)

nnl. mediastinales post.
