TBL LESSON: 11 – Arnold Holmes: Impaired consciousness and convulsions [Tamara Skříšovská]

Upon completion of this instructional unit:

- Student can describe the basic classification and causes of consciousness disorders.
- Student is able to assess a patient for the presence of delirium and, in case of a positive finding, suggest appropriate intervention.
- Student can apply the correct steps in approaching a patient with seizure activity.
- Student is capable of implementing appropriate pharmacological interventions for terminating seizures.
- Student can name the fundamental principles of approaching a patient with acute intoxication.
- Student can recognize symptoms, determine appropriate examinations, and initiate therapy for patients poisoned by acetaminophen and toxic alcohols.
