Gynecology Obstetrics
State exam. questions
2002/2003

Obstetrics

Diagnosis of pregnancy, signs of pregnancy
Organogenesis, embryonal and fetal development
The effects of placental hormones
Placenta, fetal membranes
Amniotic fluid, umbilical cord and possible disorders
Physiologic changes of pregnancy
Fetal lie (orientation) in the uterus
Physiology and pathology of the birth canal
Physiology and pathology of birth forces
Stages of labor
Management of labor
Puerperium
Spontaneous abortion
Preterm labor
Prolonged pregnancy
Isoimmunisation in pregnancy
Hyperemesis gravidarum
Cardiovascular diseases and pregnancy
Diabetes and pregnancy
Anemia in pregnancy
Alimentary tract diseases in pregnancy
Infectious diseases in pregnancy
Congenital anomalies
Intrauterine growth retardation
Multiple pregnancy
Placental pathology
Breech presentation
Abnormal lie and presentation (situs transversus et obliquus, deflections, asynclitismus)
Shoulder dystokia
Pathology of the III. stage of labor, maternal injury
Emergency in obstetrics
Gynecological inflammation in puerperium
Mastitis puerperalis
Induction of labor
Forceps, vacuum extractor
Sectio casearea
Perinatal medicine, demography

Gynecology Obstetrics
State exam. questions
2002/2003

Reproductive gynecology

Therapeutic abortion, legal aspects
Ectopic pregnancy
Family planning, contraception, IUD
Puberty
Neurohormonal regulation of menstrual cycle
Abnormalities of menstruation
Amenorrhoea, metrorrhagia, abnormal bleeding
Dysmenorrhoea, premenstrual syndrome
Polycystic ovary syndrome (Stein-Leventhal)
Congenital anomalies of female reproductive organs
Malposition of the uterus
Vulvitis, Kolpitis
Inflammation of the uterus
Pelvic inflammatory disease
Endometriosis
Basic examinations in infertility
Female infertility
Male infertility
Assisted reproduction
Habitual abortion
Genital injuries
Gynecological inflammation in childhood
Urinary incontinence
Gynecological surgery
Gynecological endoscopy
Prenatal diagnostics

Oncogynecology

Vulvar and vaginal precancerosis
Vulvar malignant tumours
Vaginal tumours
Cervical and endometrial precancerosis
Cervical carcinoma
Benign ovarian tumours
Malignant tumors of uterine body
Benign ovarian tumours
Hormonally active tumours
Malignant ovarian tumours and tubal tumours
Breast dysplasia

Gynecology Obstetrics
State exam. questions
2002/2003

Malignant breast tumours
Gynecological tumours in childhood
Gestational trophoblastic disease
Radiotherapy in oncogynecology
Chemotherapy in oncogynecology
Hormonal therapy in oncogynecology
Radical, paliative and symptomatic therapy in oncogynecology
Oncogynecological patients in terminal status
Malignant tumours during pregnancy

Practical skills

Gynecologic and obstetrics history
Bimanual and speculum examination in gynecology
Breasts selfexamination
Prepartum examination, amnioscopy
Intrapartum examination
Biochemical tests in gynecology and obstetrics
Hematological tests in obstetrics and gynecology
Microbiological tests in obstetrics and gynecology
Kolposcopy
Oncological and functional cytology
Cervical mucus examinations
Menstrual calendar
Sperm count
Invasive methods of prenatal diagnosis
Cardiotocography
Intrapartum fetal pulse oximetry
Ultrasound diagnostics in gynecology
Ultrasound diagnostics in obstetrics
Urodynamic examinations
Gynecologic examinations in childhood, vaginoscopy
Instruments in gynecology
Curretage, evacuation of the uterine cavity
Hysterosalpingography
Imaging methods in senology
