

# Lesson 6

## 1. Fill in missing expressions in correct cases:

|                    |                         |                     |                   |
|--------------------|-------------------------|---------------------|-------------------|
| 1. musculus biceps | 1.                      | 1.                  | 1.                |
| 2.                 | 2.                      | 2.                  | 2. ossium brevium |
| 4.                 | 4. marginem occipitalem | 4.                  | 4.                |
| 6.                 | 6.                      | 6. colo descendenti | 6.                |

## 2. Join the following nouns with correct forms of adjectives and form nom. and gen. pl.:

|              |                     |
|--------------|---------------------|
| foramen      | (occipitalis, e)    |
| fractura     | (simplex, icis)     |
| medicamentum | (cardinalis, e)     |
| dens         | (permanens, entis)  |
| morbus       | (recurrens, entis ) |
| ulcus        | (mollis, e)         |

## 3. Change the following expressions into singular/plural:

per cola ascendentia  
ad tuber frontale  
fissura ligamenti teretis  
cum doloribus acribus  
fractura costae simplex  
cum morbo gravi

## 4. Correct the endings of the words in brackets:

|                                 |                              |
|---------------------------------|------------------------------|
| periculum (sclerosis multiplex) | contra (sclerosis multiplex) |
| (icterus gravis)                | (icterus gravis)             |
| (vulnus lacerum)                | (vulnus lacerum)             |
| cum (sclerosis multiplex)       |                              |
| (icterus gravis)                |                              |
| (vulnus lacerum)                |                              |
