

## Unit 2

### Task 2

a, rhaps mediana; tuba auditiva; fascia lata; tunica subcutanea; glandula gastrica; ascites chronicus; diabetes mellitus; epilepsia psychomotorica

b, vena profunda; plica palatina; caverna tuberculosa; lamina fusca; arteria coronaria

### Task 3

tunica serosa vesicae felleae; plica venae cavae sinistrae;; causa anaemiae perniciosae; fractura complicata claviculae dextrae; therapia chirurgica tonsillarum palatarum

### Task 4

in (location)/cum/sine cera alba, chole pura, colica complicata, rhaps mediana, fractura ulnae, dyspnoe acuta

in (motion)/propter ceram albam, cholem puram, colicam complicatam, raphen medianam, fracturam ulnae, dyspnoen acutam

### Task 5

lagoena aquae destillatae, tonsillae palatinae, fractura costae verae, costae spuriae, fractura aperta claviculae, propter insufficientiam valvulae venae, prope medullam oblongatam, ruptura fasciae latae, arteria iliaca interna, rima palpebrarum, dyspnoe, post systolen et diastolen, cum diabeta(e), vertebrae thoracicae, causa diphtheriae, therapia chirurgica herniae, diabetes chronicus, in arteria profunda, tunica mucosa vesicae felleae, caverna scapulae

## Unit 3

### Task 1

venenum – 2, septum; olecranon – 2, colon; diabetes – 1, diabetes; collum – 2, septum; colon – 2, colon; brachium – 2, septum; encephalon – 2, colon; oculus -2, nervus; nasus – 2, nervus; glandula – 1, vena; rhaps – 1, systole; acromion – 2, colon; methodus – 2, nervus; diameter – 2, nervus; antagonista – 1, vena; dyspnoe – 1, systole; diastole – 1, systole

### Task 2

vesica, organon/organum, ligamentum, bulbus, diabetes, periodus, ramus, ascites, dentinum, enamelum, rhaps, colon, collum, cancer, systole, virus, cavum

### Task 3

palatum durum, glandula thyreoidea, nervus vagus, ramus dexter, oculus sinister, fissura parva/magna, fractura complicata, morbus acutus/chronicus/contagiosus

### Task 4

large intestine: colon, i, n/intestinum crassum

brain: encephalon, i, n/cerebrum, i, n

suture: fissura, ae, f/rhaps, es, f

eye: ophthalmos, i, m/oculus, i, m

organ: organon, i, n/organum, i, n

### Task 5

fissura transversa cerebri, membrana interossea antebrachii, anomalia congenita bulbi oculi, tunica mucosa vesicae felleae, cancer coli, magister pharmaciae

#### Task 6

post fracturam costae verae, cum ophthalmis dextro, in glandula thyreoidea, ante periodum longam, cum digitis, sub cerebro, per venam, propter fissuram palati congenitam, post morbum acutum, in vitrum, ad cranium

#### Task 7

morbi chronici, methodi novae, ovaria sana, loci frigidi, ligamenta lata, remedia composita, muscoli profundi, labia pallida

#### Task 8

morbus chronicus, ramus sinister, cavum magnum, organum aegrotum, nasus internus, fractura olecrani parva

#### Task 9

fractura antebrachii complicata, icterus neonati/neonatorum, morbus chronicus intestini, extractum chamomillae, ruptura venae cerebri, periculum diabetae, ruptura medullae oblongatae, suturae cranii

#### Task 10

ascites acutus, periculum rupturae venae, medicamentum bonum pro adultis aegrotis, post rupturam ligamenti lateralis uteri, fissura palati congenita, fracturae digitorum, pillula sub lingua, aqua destillata in lagoena/vitro, rami nervorum, sine causa morbi, sub signa veneni
