

Basic medical terminology

Presentation by E. Dávidová

a) Circle all nouns of the 4th and 5th declension.

b) Classify the nouns in the table into five groups according to their declensions. Give their genitive singular form, gender and paradigm.

carcinoma

rabies

pars

sutura

processus

diploe

ophthalmos

species

dentinum

lens

ascites

sensus

crus

dies

abductor

angulus

cochlear

manus

gaster

cornu

gargarisma

Give nominative singular forms to the nouns.

carie infarctu

unguenti

dentes

pulmonum

pleuritidem

gargarismate

temporibus

labio

morsum

arcuum

ligamenta

scabiem

thoracis

laminarum

scatulis

neuroseos

dyspnoes

nephron

encephalo

a) Match the nouns in the oval with the adjectives in the correct form.

b) Change the terms from task a) in genitive of singular.

epilepticus, a, um – asthmaticus, a, um – postoperativus, a, um

genu
decubitus
partus
facies
usus
status
species

externus, a, um – internus, a, um

pallidus, a, um – Hippocraticus, a, um

praematurus, a, um – complicatus, a, um

profundus, a, um – dolorosus, a, um

varus, a, um – valgus, a, um

- a) Decide what the case and number of underlined words are.
b) Connect the terms in the tables with the adjectives below.

in genibus

dolor genus

in genua

dolor genuum

in genu

sanatio decubitus

prope decubitus

sub decubitu

sanatio decubituum

sub decubitibus

prope decubitum

propter cariem

therapia carierum

sub carie

therapia cariei

sub cariebus

propter caries

↑
valgus, a, um

↑
dolorosus, a, um

↑
profundus, a, um

Put the terms into the required form.

abortus completus abl. sg. *abortu completo*

habitus asthenicus gen. sg. *habitus asthenici*

species urologicae acc. pl. *species urologicas*

manus sinistra abl. sg. *manu sinistra*

genu dextrum acc. sg. *genu dextrum*

calvities praematura acc. sg. *calvitiam praematuram*

a) Fill in the adjectives from the table in the correct form.

b) Underline all nouns of the 4th and 5th declension in the terms.

acusticus, a, um

circulatorius, a, um

cruciatus, a, um

internus, a, um

praematurus, a, um

sacer, cra, crum

facies *interna* basis cranii

ligamenta *cruciata* genus

foramina cartilaginis meatus *acustici* externi

decubitus regionis ossis *sacri*

haemorrhagia ante partum *praematurum*

collapsus systematis *circulatorii*

Connect the prepositions with the terms after plus in the correct form.

ad + usus internus

propter + partus complicatus

in (x) + tractus nervosi

in (x) + ductus hepaticus dexter

post + infarctus acutus

sine + effectus medicamenti

in (x) + aditus laryngis

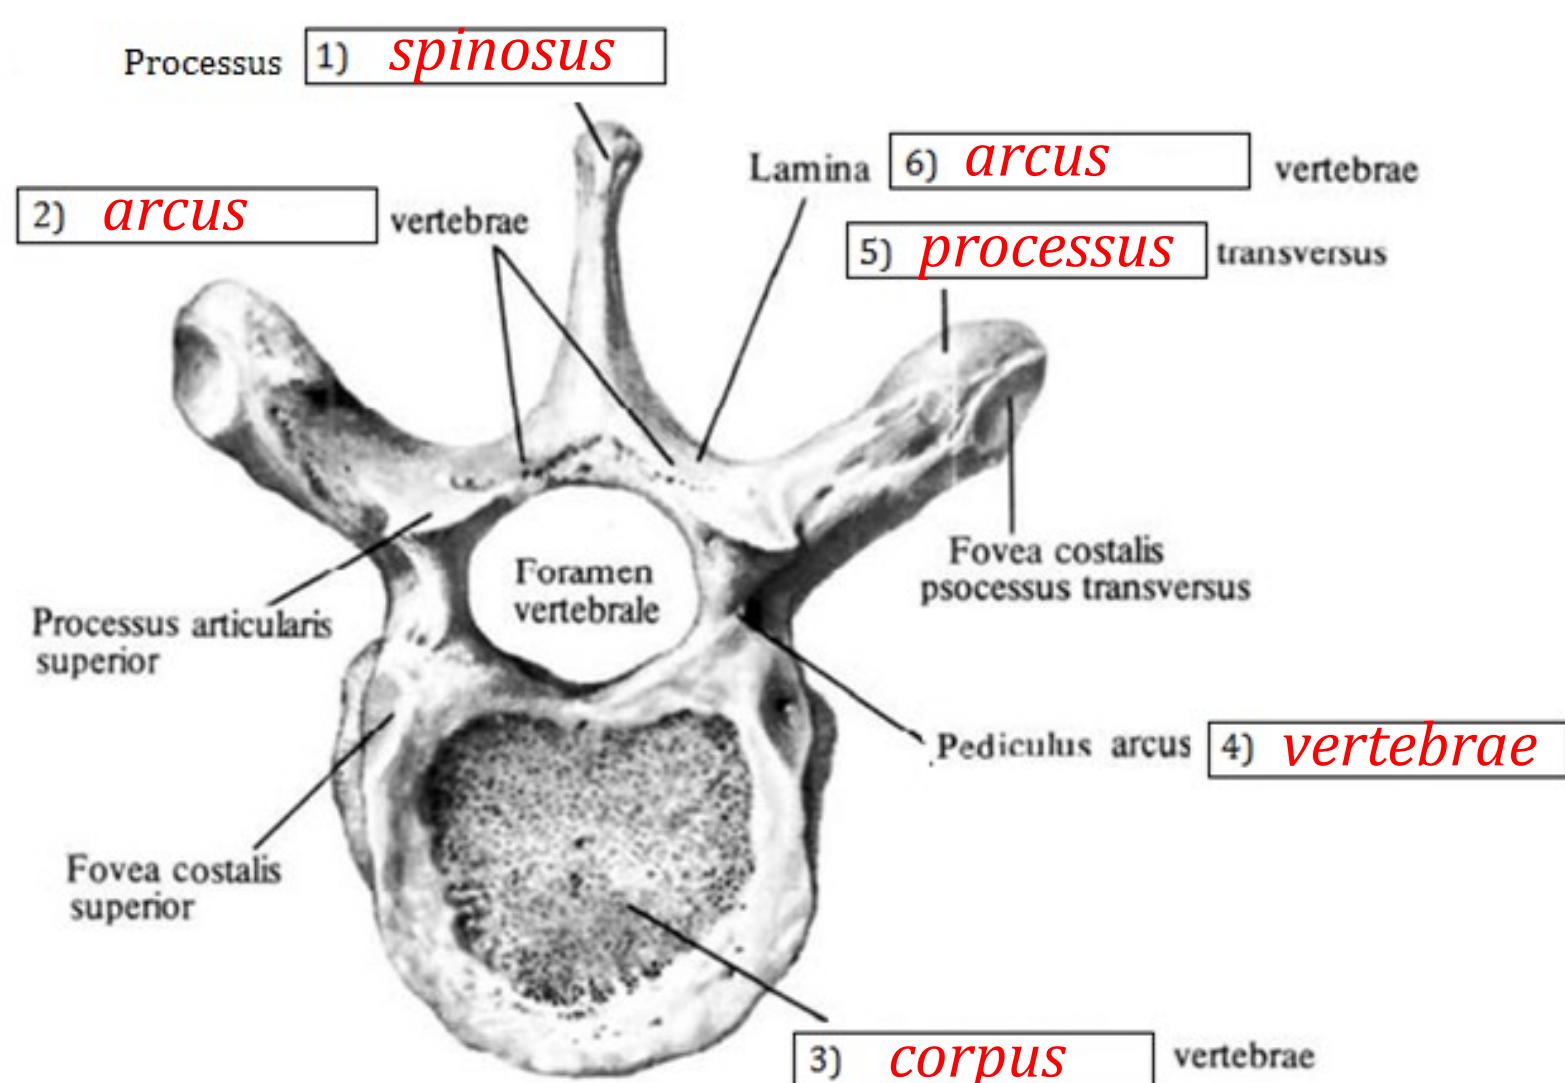

in (x) + cornua uteri

in (x) + caries dentis profunda

a) Fill in missing words in the correct form. Use the words in the table.

b) Connect the terms 1-6 with the term *fractura* in singular and plural.

arcus (2x) processus spinosus, a, um vertebra corpus

Fill in missing endings.

Decursus morb_____

Unguentum contra scabi_____

Symptomata infarct_____

Vulnus punct_____ faci_____

Luxatio articulation_____ gen_____

Situs fet_____ transvers_____

Abscessus meat_____ acustic_____ extern_____

Fractura apert_____ gen_____ sinistr_____

Mors fet_____ post part_____ praematur_____

Exitus post infarct____ myocardi____ acut____

Dosis medicament____ pro di____

Musculus sphincter duct____ choledoch____

Dolores chronic____ dent____ propter cari____ profund____
(all in pl.)

Carcinoma pulmon____ dextr____ in sit____

Abscessus subcutane____ man____ sinistr____

Haemorrhagia ret____ venos____ bulb____ ocul____

Solve the crossword (answers).

1. Organs of eyesight
2. Foreign bodies in the stomach
3. Symptoms of heart attack
4. Human senses
5. Slipping out of the womb after delivery
6. Tear wounds of the eyelid
7. Pains in the tooth caused by a decay
