

PART I : EXERCISES**1. Read aloud:**

- *vertebra, ante, palpebra, medulla, vēna, trachēa, venēnum* (2)
- *sine, pilula, vitrum, inter, spīna, rīma, vīnum, salīva* (3)
- *post, anodus, oleum, prostata, bōlus, prō, prōcessus, dolorōsus* (4)
- *apud, gutta, glandula, uterus, ūrīna, rūptūra, nātūra* (5)
- *aegrōtus, praemātūrus, lagoena, foetor, aēr, dyspnoē, diploē, proerythroblastos, coenzymum* (6)
- *felleus, balneum, āreola, aorta, interosseae, pleura, pȳogenēs, euryōpia* (9)
- *celulla, cibus, caecum, cystis, costa, cutis, fasciculus, clāvicula, frāctūra* (11)
- *coccȳgeus, occipitālis, ūscilococcinum, accessōrius, saccus, sacci, vaccīna* (12)
- *caecum, caeci, bucca, buccae, verrūca, verrūcae, thōrācica, thōrācicae, saccus, sacci, coenzymum* (13)
- *digitus, tībia, destillāta, hernia, tunica, audītus* (15)
- *fūnctiō, articulātiō, vitium, īnsufficientia, sānātiō, ūstium, testium, mixtiō, combustiō* (16)
- *aqua, liquor, quadrātus, lingua, sanguis, unguentum, unguis, unguium, inguinālis* (17)
- *resistentia, incīsūra, spongiōsus, basis, crisis, nasālis, pulsus, morsus, mēnsis, plasma* (18)
- *comissūra, prōcessus, scissus, accessōrius, ossa, ossium, hypoglōssus, tussis, pertussis* (19)

2. Read aloud the nominative and genitive forms of the nouns. Write down the number of the declension; follow the example:

ex: caput, capit-is - 3	coxa, coxae_ _ _;	cervix, cervicis_ _ _;	hypogastrium, hypogastrii_ _ _;
oculus, oculi_ _ _;	sulcus, sulci_ _ _;	crus, cruris_ _ _;	processus, processus_ _ _;
arcus, arcus_ _ _;	coccyx, coccygis_ _ _;	bucca, buccae_ _ _;	metatarsus, metatarsi_ _ _;
ilia, ilium_ _ _;	fibula, fibulae_ _ _;	pubes, pubis_ _ _;	antebrachium, antebrachii_ _ _;
axilla, axillae_ _ _;	hallux, hallucis_ _ _;	patella, patellae_ _ _;	capilli, capillorum_ _ _;
thorax, thoracis_ _ _;	nasus, nasi_ _ _;	os, ossis_ _ _;	phalanx, phalangis_ _ _;
tarsus, tarsi_ _ _;	humerus, humeri_ _ _;	collum, colli_ _ _;	symphysis, symphysis_ _ _;
facies, faciei_ _ _;	corpus, corporis_ _ _;	femur, femoris_ _ _;	clavícula, claviculae_ _ _;

3. Decide what the stem of the nouns is and underline it; follow the example:

ex: caput, capit-is	atlas, atlantis	linea, lineae	foramen, foraminis
axis, axis	sternum, sterni	crus, cruris	manubrium, manubrii
sinus, sinus	eminētia, eminentiae	torus, tori	articulatio, articulationis
ischium, ischii	tibia, tibiae	tendo, tendinis	antebrachium, antebrachii

maxilla, maxillae	pollex, pollicis	larynx, laryngis	cornu, cornus
bronchus, bronchi	cortex, corticis	os, oris	margo, marginis

4. Use the chart with endings to change the following words into plural; translate both forms to see the difference in the meaning:

ex: coxa, ae, f. (1) cervix_____ oculus_____ sulcus_____

gen. sg. **cox-ae** _____

nom. pl. **cox-ae** _____

crus_____ arcus_____ bucca_____ metatarsus_____

_____ _____ _____ _____

_____ _____ _____ _____

fibula_____ hallux_____ os_____ antebrachium_____

_____ _____ _____ _____

_____ _____ _____ _____

axilla_____ tarsus_____ patella_____ genu_____

_____ _____ _____ _____

_____ _____ _____ _____

5. Use the chart with endings to connect two nouns to name anatomical structures; translate the phrases:

caput + **costa** > **ex: caput costae** _____ **head of rib** _____

femur > _____ _____

fibula > _____ _____

humerus > _____ _____

phalanx > _____ _____

radius > _____ _____

talus >	-----	-----
ulna >	-----	-----
corpus + clavicula >	-----	-----
mandibula >	-----	-----
orbita >	-----	-----
penis >	-----	-----
sternum >	-----	-----
tibia >	-----	-----
vertebra >	-----	-----

6. Connect nouns with prepositions in order to complete the table; use the chart with endings:

sub + Abl. (where?) under	shoulder blade	skin	tongue
	<i>sub scapula</i>		
sub + Acc. (where to?) under	eye	rib	kneecap
		<i>sub costam</i>	
in + Abl. (where?) in, at	tooth	mouth	bone
in + Acc. (where to?) to	skull	orbit	hypogastrium
ad + Acc. towards	collar bone	chest	belly
ex + Abl. from	ear	nose	finger

PART II : GRAMMATICAL NOTES

INTRODUCTION TO SYNTAX

NOUN IN APPosition I.

If a noun follows another to describe it, the noun which follows is said to be in *apposition* to the noun which comes before it. In Latin, if the second noun is in the relation of dependency it is expressed by genitive singular or genitive plural.

ex:	fractura costae	fracture of the rib
	fractura costarum	fracture of ribs
	spina scapulae	thorn of the shoulder blade
	spinae scapularum	thorns of shoulder blades
	camera¹ bulbi²	chamber of the eye
	camerae bulbi	chambers of the eye
	camerae bulborum	chambers of eyes

PREPOSITIONS AND PREPOSITIONAL PHRASES

Prepositions are parts of speech denoting spatial or temporal relations; in Latin they are combined with nouns to form so called prepositional phrases. Prepositions combine with accusative, ablative or both accusative and ablative cases, e.g.:

Place	in which	in	in, on, upon	ABLATIVE CASE
	from which	a, ab	from	
	out of which	e, ex	out of	
	under/at the foot of	sub	under	
	into which	in	into	ACCUSATIVE CASE
	to which	ad	to, towards	
	through which	per	through	
	under/close up to which	sub	under	

¹ **camera**, ae, f. chamber

² **bulbus**, i, m. bulb

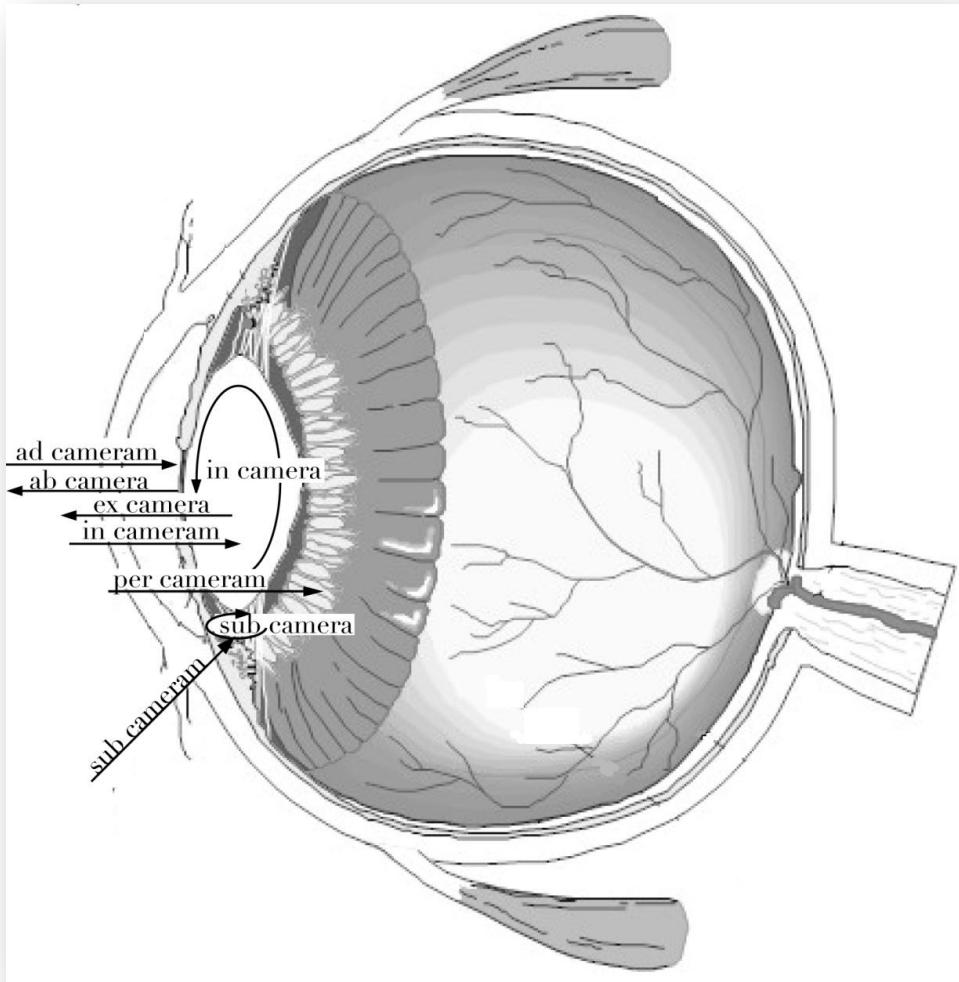

Fig. Posterior chamber of the eye bulb (*Camera bulbi posterior*), lateral view

DECLENSION

In English, change in the word order or preposition is used to express the meaning of the noun. In Latin, the suffix is attached to the end of the word instead. **Declensions are noun groups that use the same suffix for each case.**

Latin Ist DECLENSION

In the first declension we decline nouns that have³:

Genitive sg. ending	-AE
Nominative sg. ending	-A
Gender	mostly F

³ For the whole paradigm check the book p.6; or the chart with Latin and Greek declensions paradigm VENA.

NOTE! A specific group of nouns are *names of specialists* that have feminine endings but are of male gender, e.g. **oculista**, oculistae m. [ophthalmologist]; **dentista**, dentistae, m. [dentist]; **pharmacista**, ae, m. [pharmacist] etc.; *names of muscles*, e.g. **antagonista**, ae, m. [antagonistic muscle, it acts in opposition to the specific movement generated by agonistic muscle]; **agonista**, ae, m. [agonistic muscle]. *These words are used rarely in medical terminology.*

PART III : VOCABULARY

allergia, ae, f.	allergy	insufficientia, ae, f.	insufficiency
anaemia, ae, f.	an(a)emia	lagoena, ae, f.	bottle
angina, ae, f.	angina	lamina, ae, f.	membrane, lamina
aorta, ae, f.	aorta	lingua, ae, f.	tongue
apertura, ae, f.	opening, aperture	maxilla, ae, f.	upper jaw, maxilla
arteria, ae, f.	artery	medulla, ae, f.	marrow
causa, ae, f.	cause, reason	olla, ae, f.	gallipot, cup
cera, ae, f.	wax	palpebra, ae, f.	eyelid
colica, ae, f.	colic	pasta, ae, f.	paste
columna, ae, f.	column	pneumonia, ae, f.	pneumonia
crista, ae, f.	crest	rima, ae, f.	fissure, free space
cura, ae, f.	care	ruptura, ae, f.	rupture
diphtheria, ae, f.	diphtheria	scarlatina, ae, f.	scarlet fever
epilepsia, ae, f.	epilepsy	scatula, ae, f.	box
et	and	sclera, ae, f.	sclera (outer coat of the eyeball)
fascia, ae, f.	fascia	spina, ae, f.	1. vertebral column, spine 2. ridge, spine
fossa, ae, f.	hollow, fossa	therapia, ae, f.	treatment, therapy
fractura, ae, f.	fracture	valvula, ae, f.	valve (lit. small valve, valvule)
glandula, ae, f.	gland	vena, ae, f.	vein
haemorrhagia, ae, f.	bleeding, haemorrhage	vesica, ae, f.	bladder
hernia, ae, f.	hernia		
incisura, ae, f.	notch
