Types of Caesarean Section

LSCS - Lower Segment Caesarean Section – today the most commonly used type of Caesarean section

The term is derived from Latin verb *caedo*, ... *caesum* meaning „to cut“, „to free by cutting“

From this verb Latin nouns with stem: *-cisio* (English - cision) are derived:
excisio, incisio, discisio...

partus caesareus / sectio caesarea

The facial expression produced in the by impending death or long illness (accompanied by pain), excessive evacuations, excessive hunger, and the like, e.g. by peritonitis (inflammation of peritoneum) or cholera. Its synonym is **facies abdominalis**.

The nose is sharp, the eyes sunken, the temples fallen in, the ears cold and drawn in and their lobes distorted, the skin of the face hard, stretched and dry, and the colour of the face pale or dusky.

facies Hippocratica /
facies abdominalis

facies composita – normal,
calm facial expression of
healthy person

facies dolorosa – facial
expression showing signs
of pain

meatus acusticus externus et internus
