PZ10 Clinical microbiology I – general

To study: Sampling, specimen transport (from textbooks, www etc.)

From spring term: Microscopy

Task 1: Indications for microbiological examination

For following casuistries, fill in the table.

- Fill in always the case description (left column).
- 2 Try to find out your solution. Try to structure your answer as follows:

Microbiological examination: yes/no

- \diamond yes \rightarrow select a specimen
- \bullet no \rightarrow select other steps, e. g. direct treatment what antibiotics etc.)

3 After the three minute limit, write down a correction according to the teacher's explanation.

S	Sterile? (yes or no) Description

Task 3: Other sampling methods than swabs and vessels

Fill in the following table:

Sampling method	Typical example(s) of use
smear on a slide	
imprint with an agar	
moulage method	
uricult	

Task 4: The order form

a) Filling in the order form

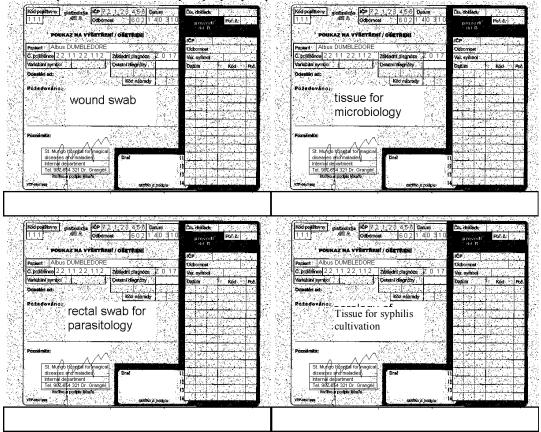

Fill in the following order form with a patient name and data and the requested examination related to the disease, according to a card that has been given to you by the teacher.

Kód pojišťovny požaduje IČ	IČP Datum Odbornost		Čís. d	Čís. dokladu

b) Order form common mistakes

To each of the following order forms write down what is wrong. There are some mistakes at filling in the order form, but you should also identify improperly requested examinations.

Task 5: Interpretation

a) Direct diagnostic interpretation

Using the table in the slideshow, write likely interpretation for first five of various findings written on cards available on your table. Use terms "pathogen", "common flora", "accidental finding", "colonization" and "contamination"

E. 1.	T , , , , .
Finding	Interpretation

b) Indirect diagnostic interpretation

Interpret several clinical situations with data given on the card. Do not forget to make your interpretation on the base of both clinical findings and laboratory results (clinical findings). Chose only four of five situations.

Rewrite from the card (simplify the s	Conclusion
