

# COMPARATIVES, SUPERLATIVES

## GRAMMAR

### A) Comparison of adjectives

Adjectives are compared in Latin in the same manner as in English. There are three degrees of comparison

- a. **POSITIVE** expresses quality of one person or thing on its own.
- b. **COMPARATIVE** compares one person or thing with another and enable us to say whether a person or thing has more or less of a particular quality.
  - a. All comparative forms are declined according to paradigms: **DOLOR** (M., F.) and **CORPUS** (N.)
  - b. All three genders share the same Genitive ending – **IORIS** and Ablative ending **-ORE**
  - c. Neuters have a special ending **-IUS** in Nominative (=Accusative) Sg. and – **ORA** in Pl.

|            | singular  |         | plural      |           |
|------------|-----------|---------|-------------|-----------|
| nominative | brevior   | brevius | breviores   | breviora  |
| genitive   | brevioris |         |             | breviorum |
| accusative | breviorem | brevius | breviores   | breviora  |
| abative    | breviore  |         | brevioribus |           |

- c. **SUPERLATIVE** describes one person or thing as having the most of a quality of all other people or things in a group.
  - a. All superlative forms end in **-US**, **-A**, **-UM** and are declined like adjectives of 1<sup>st</sup> and 2<sup>nd</sup> declension
- d. **Irregular and incomplete forms:**

magnus, a, um > maior, maius > maximus a, um      (*big, bigger, the biggest*)  
parvus, a, um > minor, minus > minimus, a, um      (*small smaller, the smallest*)

ante >      anterior, ius > ø  
post >      posterior, ius > postremus a, um  
supra >      superior, ius > supremus, a, um  
infra >      inferior, ius > infimus/imus, a, um  
intra >      interior, ius > intimus, a, um

## COMPARATIVES, SUPERLATIVES

---

### EXERCISES

#### **Task 1: Form comparatives and superlatives from given adjectives:**

|                  |       |       |
|------------------|-------|-------|
| parvus, a, um    | ..... | ..... |
| brevis, e        | ..... | ..... |
| fortis, e        | ..... | ..... |
| acutus, a, um    | ..... | ..... |
| magnus, a, um    | ..... | ..... |
| longus, a, um    | ..... | ..... |
| gravis, e        | ..... | ..... |
| profundus, a, um | ..... | ..... |
| latus, a, um     | ..... | ..... |

#### **Task 2: Fill in comparatives and superlatives in correct forms:**

|                          |                                   |
|--------------------------|-----------------------------------|
| <i>minimus, a, um</i>    | musculus abductor digiti .....    |
| <i>minor, minus</i>      | cornu ..... ossis hyoidei         |
| <i>superior, ius</i>     | defectus arcus dentalis .....     |
| <i>intimus, a, um</i>    | musculi intercostales .....       |
| <i>inferior, ius</i>     | amputatio membra .....            |
| <i>imus, a, um</i>       | arteriae lumbales .....           |
| <i>anterior, ius</i>     | peritoneum parietale .....        |
| <i>latissimus, a, um</i> | ruptura musculi ..... dorsi       |
| <i>posterior, ius</i>    | arteria temporalis profunda ..... |

## COMPARATIVES, SUPERLATIVES

---

### **Task 3:** Form comparatives and superlatives from the given forms of adjectives:

|                            |       |       |
|----------------------------|-------|-------|
| in foraminibus parvis      | ..... | ..... |
| post traumata gravia       | ..... | ..... |
| laesio partis mollis       | ..... | ..... |
| ulcus frequens             | ..... | ..... |
| in tunica interna          | ..... | ..... |
| cum dolore acuto           | ..... | ..... |
| fractura cornuum magnorum  | ..... | ..... |
| propter infarctum recentem | ..... | ..... |
| medicamenta fortia         | ..... | ..... |

### **Task 4:** Give the opposites:

|  |  |
|--|--|
| lobus inferior / .....                                     |  |
| facies externa / .....ossis frontalis                      |  |
| circulatio sanguinis minor / .....                         |  |
| foramen ischiadicum majus / .....                          |  |
| musculus adductor brevis / .....                           |  |
| pars posterior / .....linguae                              |  |
| tunica interna / .....vasorum                              |  |
| segmentum anterius / .....lobi superioris pulmonis dextri. |  |
| meatus nasi superior / .....                               |  |

## COMPARATIVES, SUPERLATIVES

---

### **Task 5:** Create meaningful diagnoses:

a) pro / dosis / infantibus / maxima

---

b) oris / chronicum / superioris / ulcus / labii

---

c) sepsim / propter / lateris / amputatio / membra / sinistri / inferioris

---

d) gastritidis / minoris / suspicio / gradus

---

e) inferioris / dextri / rami / et / ossis / fractura / superioris / pubis / lateris

---

### **Task 6:** Translate:

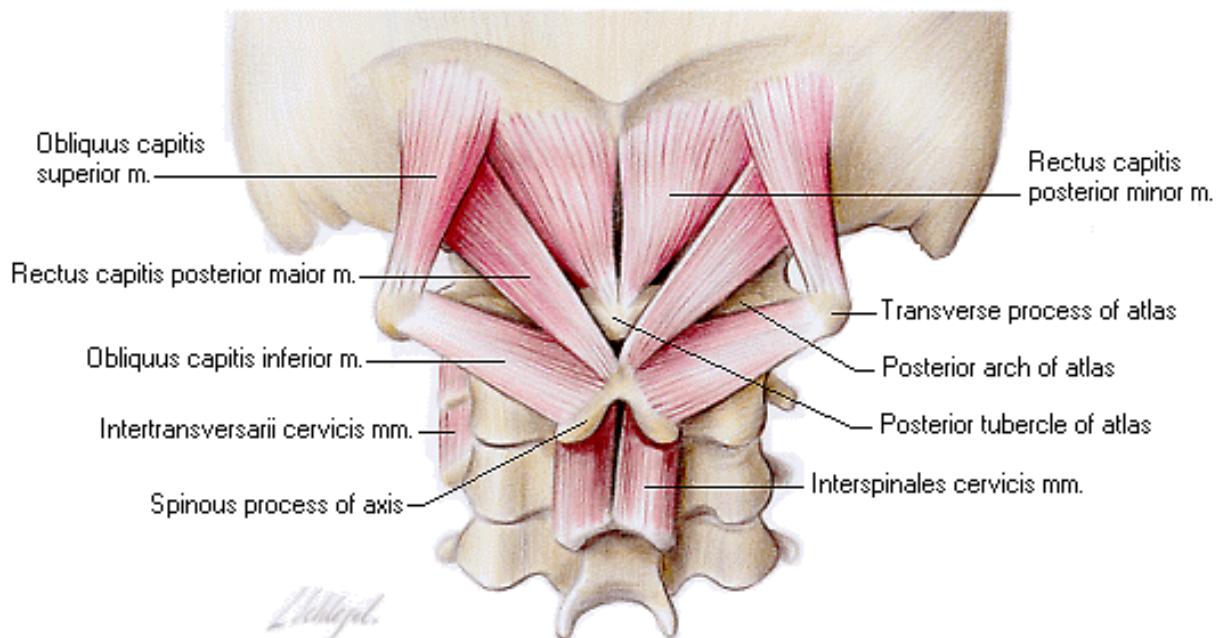

|  |  |
|--|--|
| shorter bone   |  |
| more severe injury                                       |  |
| bigger danger  |  |
| bigger sublingual duct                                   |  |
| in the upper hollow vein                                 |  |
| the longest muscle of the upper limb                     |  |
| lesser curvature of ventricle of heart                   |  |
| posterior deep temporal artery                           |  |
| fracture of the middle phalanx of the<br>smallest finger |  |
| the most recent infarction                               |  |

## COMPARATIVES, SUPERLATIVES

|   |  |
|---|--|
| the most frequent disease   |  |
| the innermost layer of oesophagus   |  |
| amputation of the lower limb due to gangraena caused by diabetes mellitus |  |

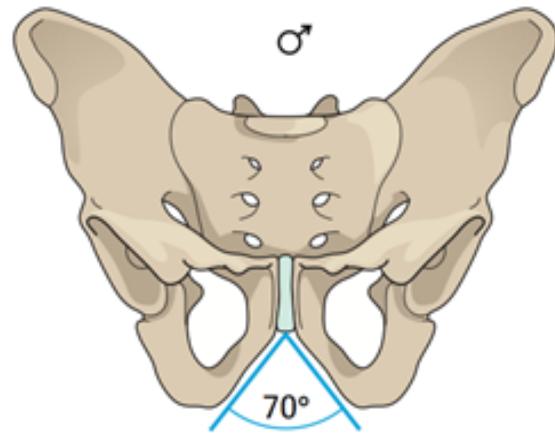

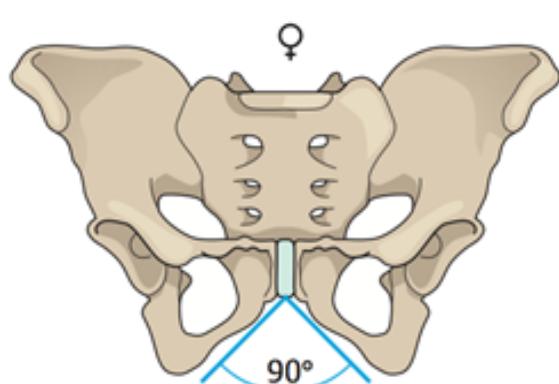

**Task 7:** Put the correct Latin anatomical terms:

**SHORT NECK MUSCLES, POSTERIOR VIEW**

## COMPARATIVES, SUPERLATIVES

**Task 8:** Decide whether the following sentences are true/false:

|     |  | TRUE | FALSE |
|-----|--|------|-------|
| 1.  | Pelvis feminina levior est.                        |      |       |
| 2.  | Pelvis masculina latior est.                       |      |       |
| 3.  | Apertura superior pelvis femininae major est.      |      |       |
| 4.  | Cavitas pelvis femininae angustior est.            |      |       |
| 5.  | Os sacrum pelvis masculinae brevius est.           |      |       |
| 6.  | Os sacrum pelvis femininae latius est.             |      |       |
| 7.  | Foramina obturatoria pelvis femininae majora sunt. |      |       |
| 8.  | Acetabula feminina majora sunt.                    |      |       |
| 9.  | Coccyx feminina brevior est.                       |      |       |
| 10. | Angulus alarum ossis ilii masculini minor est.     |      |       |
| 11. | Promontorium femininum minus est.                  |      |       |
| 12. | Symphysis pubica feminina longior est.             |      |       |
