SEMINAR 6 AND 7

3rd declension: specific features

- **genitive ending: -is**
- **all 3 genders** are included (cortex **m.**, radix **f.**, femur **n.**)
- **nom. sg. – various endings** (sanguis, excisio, abductor, rete, latus, femur, abdomen, cavitas)
 - !The GENDER CANNOT be determined on the basis of the NOMINATIVE and GENITIVE form!

3rd declension nouns

Two main groups:

- **Consonant stems:** typically nouns with different number of syllables in Nom. and Gen. (genitive is longer than and different from nominative) = **absolute majority of 3rd declension nouns**
- **I-stems:** nouns with the same number of syllables in Nom. and Gen. (m. + f.) + nouns with two or more consonants preceding the genitive ending -is (m. + f.) + neuters ending in **-e, -al, -ar** in Nom. sg. (i.e. *rete, calcar, cochlear, animal*)

3rd declension paradigms

DOLOR	CORPUS	PELVIS
M. + F.	N.	M. + F.

Consonant stems: paradigms DOLOR (m., f.)+ CORPUS (n.)

= typically nouns with different number of syllables in Nom. and Gen. (genitive is longer than and different from nominative)

- stem in nom. sg. and gen. sg. differs
 - pulm-o//**pulmon-is**
 - fem-ur//**femor-is**
 - rad-ix//**radic-is**
- In order to decline a 3rd declension noun properly (both consonant stems and i-stems), it is necessary to know its GENITIVE form.

1. pulm-o
2. **pulmon-is**
4. **pulmon-em**
6. **pulmon-e**
