

BASIC MEDICAL TERMINOLOGY I

MOCK TEST

Name: _____ Date: _____ Group: _____

FULL SCORE: 100 POINTS

1. Change all words into singular/plural. (10 points)

caput breve -----

plexus venosi vertebrales -----

extractio dentis incisivi -----

vasa sanguinea -----

2. Put the words into correct form to create meaningful diagnoses. (15 points)

Do not change the word order!

rete + articularis, e + cubitus

corpus + alienus, a, um + in + auris + medius, a, um

status post + operatio + carcinoma + pancreas

musculus (pl.!) + levator + costa (pl.!) + brevis, e

facies + frontalis, e + os + temporalis, e

3. Put the terms in brackets into the correct form after prepositions/nouns. (10 points)

abortus propter (*defectus congenitus fetus*) -----

pus in (*vulnera lacera*) -----

sanatio (*febris continua*) -----

aegrotus cum (*symptomata diabetae melliti*) -----

4. Create meaningful anatomical forms using the adjectives from the box in their correct forms. (10 points)

costalis, e ~ praematurus, a, um ~ tenuis, e ~ choledochus, a, um ~ perforans, ntis

obstrucio ductus -----

status post partum -----

facies ----- scapulae

carcinoma intestini -----

ulcus gastris -----

5. Put the full forms of the underlined abbreviations IN PROPER FORM and translate the whole sentence into English. (15 points)

fractura vertebrae **Th7** cum dislocatione -----

st.p. operationem lobi medii pulmonis sinistri -----

vulnus sectum antebrachii **l.dx.** -----

6. Fill in the nouns from which the underlined adjectives are derived. (15 points)
Put the full dictionary entry according to the example.

EXAMPLE: os temporale tempus, temporis, n.

cristae cutaneae ----- / ----- / -----

rete articulare ----- / ----- / -----

amputatio traumatica ----- / ----- / -----

morbus sanabilis ----- / ----- / -----

plexus nervosus ----- / ----- / -----

7. Translate into Latin. (25 points)

severe burns in the pectoral region

urological tea mixture against the inflammation of kidney

operation of the ascending part of duodenum

short head of the triceps muscle of arm

fissure of the round ligament of liver

stab wound penetrating towards heart

FULL SCORE: 100 POINTS

PASS MARK:

70% (if you failed in both progress tests)

65% (if you passed one of the progress tests)

60% (if you passed both progress tests)

BASIC MEDICAL TERMINOLOGY: MOCK TEST

WS 2016

Name: _____ Date: _____ Group: _____

1. Change into singular/plural. (10 points)

caput breve	CAPITA BREVIA
plexus venosi vertebrales	PLEXUS VENOSUS VERTEBRALIS
extractio dentis incisivi	EXTRACTIONES DENTIUM INCISIVORUM
vasa sanguinea	VAS SANGUINEUM

2. Put the words into correct form to create meaningful diagnoses. (15 points)
Do not change the word order!

rete + articularis, e + cubitus

RETE ARTICULARE CUBITI

corpus + alienus, a, um + in + auris + medius, a, um

CORPUS ALIENUM IN AURE MEDIA

status post + operatio + carcinoma + pancreas

STATUS POST OPERATIONEM CARCINOMATIS PANCREATIS

musculus (pl.!) + levator + costa (pl.!) + brevis, e

MUSCULI LEVATORES COSTARUM BREVES

facies + frontalis, e + os + temporalis, e

FACIES FRONTALIS OSSIS TEMPORALIS

3. Put the terms in brackets into the correct form after prepositions/nouns. (10 points)

abortus propter (defectus congenitus fetus)	DEFECTUM CONGENITUM FETUS
pus in (vulnera lacera)	VULNERIBUS LACERIS
sanatio (febris continua)	FEBRIS CONTINUAE
aegrotus cum (symptomata diabetae melliti)	SYMPTOMATIBUS DIABETAE MELLITI

4. Create meaningful anatomical forms using the adjectives from the box in their correct forms. (10 points)

costalis, e ~ praematurus, a, um ~ tenuis, e ~ choledochus, a, um ~ perforans, ntis

obstrucio ductus	CHOLEDOCHI
status post partum	PRAEMATURUM
facies	COSTALIS scapulae
carcinoma intestini	TENUIS
ulcus gastris	PERFORANS

5. Put the full forms of the underlined abbreviations and translate the whole sentence into English. (15 points)

fractura vertebrae <u>Th7</u> cum dislocatione	Th7 = THORACICAE SEPTIMAE
FRACTURE OF THE SEVENTH THORACIC VERTEBRA WITH DISLOCATION	
<u>st.p.</u> operationem lobi medii pulmonis sinistri	st.p. = STATUS POST
STATE AFTER THE OPERATION OF THE MIDDLE LOBE OF LEFT LUNG	
vulnus sectum antebrachii <u>l.dx.</u>	l.dx. = LATERIS DEXTRI
CUT WOUND OF/IN THE RIGHT FOREARM	

6. Fill in the nouns from which the following adjectives are derived. (15 points)
Put the full dictionary entry according to the example.

EXAMPLE: os temporale tempus, temporis, n.

cristae cutaneae	CUTIS / CUTIS / F
rete articulare	ARTICULATIO / ARTICULATIONIS / F
amputatio traumatica	TRAUMA / TRAUMATIS / N
morbus sanabilis	SANATIO / SANATIONIS / F
plexus nervosus	NERVUS / NERVI / M

7. Translate into Latin. (25 points)

severe burns in the pectoral region

COMBUSTIONES REGIONIS PECTORALIS GRAVES / COMBUSTIONES GRAVES REGIONIS PECTORALIS

urological tea mixture against the inflammation of kidney

SPECIES UROLOGICAE CONTRA NEPHRITIDEM

operation of the ascending part of duodenum

OPERATIO PARTIS ASCENDENTIS DUODENI

short head of the triceps muscle of arm

CAPUT BREVE MUSCULI TRICIPITIS BRACHII

fissure of the round ligament of liver

FISSURA LIGAMENTI TERETIS HEPATIS

stab wound penetrating towards heart

VULNUS PUNCTUM AD COR PENETRANS / PENETRANS AD COR
