

aVLCJ0585: Czech V: test 2 (oral) — information

Your goal in test 2 is to get (uncomplete) patient's history.

You are going to be tested this way:

- you pick a paper with patient's hospital history
- I will give you your sheet with topics to be asked about
 - list of all the topics is [here](#)
 - your sheet will have only limited number of topics (see bellow)
- I will be the patient, you will ask questions as follows
 - Personal data: **1 question**
 - Family history 1 (grand/parents): **2 questions**
 - Family history 2 (siblings, children): **1 question**
 - Personal history: **3 questions** in total
 - male patient: only questions from D (3 questions)
 - female patients only: 2 questions from D, 1 question from E
 - Social and work history: **2 questions**
 - Current disease: **1 question**
 - in total = 10 questions
- you will write down the answer to your sheet
- I can repeat every answer only once
- you can speak only in Czech language
- your answers must be in Czech language (grammar irrelevant)

Evaluation:

- comprehensible question: 1–2 points (depends on comprehensibility and vocabulary suitability level)
- correct answer: 1–3 points (depends on comprehensibility and vocabulary suitability level, also on completeness of your answer)

Passmark: 35/50 points
