

Theoretical Bases of Clinical Medicine 2-3

Learning outcomes

TBL Lesson: 04 Victoria Meral – Digestive Tract Disorders [Matěj Hrunka]

Upon completion of this learning unit, students will be able to:

- describe the definition of diarrhea
- enumerate the fundamental causes of diarrhea and abdominal pain, and outline differential diagnosis
- identify the basic warning signs ("red flags") of severe disease in cases of acute abdominal pain
- determine which patient with chronic gastrointestinal disease requires more detailed diagnosis ("red flags")
- propose an appropriate diagnostic algorithm for the most common gastrointestinal diseases
- list the basic manifestations of celiac disease
- distinguish the fundamental differences in treatment of Crohn's disease and ulcerative colitis
- propose basic therapeutic approaches for the most common gastrointestinal diseases
- evaluate potential complications of untreated or improperly treated gastrointestinal diseases
- list some autoimmune diseases associated with celiac disease
