

How to prepare your final presentation

1. The **first part** of your presentation will be about your life, work and studies; you should find some interesting information on Masaryk University.
 2. The **second part** will be the topic you are interested in within your specialization.
- Think about **your interest** in your field of study, e.g. in Special Needs Education working with autistic children, in Social Education behavioural disorders in children, etc.
 - **Find a text** about that matter written in English by an English (British/American/Canadian/Australian) author (it can be quite short - about two A4 pages). You can find a book :-)! You can speak about any activity you are doing which is connected with disabled or elderly people, e.g. Dobrovolnické centrum Motýlek
 - **Read it, write out** key words and a **short summary**. (= [reading comprehension sheet](#))
 - **Don't forget to write the resource of your text, article, book, etc.**
 - **Present** your field of interest (+ study) based on the text to your schoolmates in **4 - 6 minutes**.
