

# Awakenings (Čas probuzení)

Dagmar Weisbuerová  
Patopsychologie

Dr. Malcolm Sayer (Robin Williams), a new doctor, finds himself with a ward full of comatose patients. He is disturbed by them and the fact that they have been comatose for decades with no hope of any cure. When he finds a possible chemical cure he gets permission to try it on one of them (Robert DeNiro).

When the first patient awakes, he is now an adult having gone into a coma in his early teens. The film then delights in the new awareness of the patients and then on the reactions of their relatives to the changes in the newly awakened. How their lives have changed them and all those who witness their Awakening.
