Syntactic analysis practice

1. Put down any simple sentence in which every sentence element is expressed by a one-word phrase:

2. Change the above simple sentence into one in which every sentence element will be expressed by a two-word phrase:

3. Put down one simple sentence with two objects and add its tree diagram in which you will indicate both functions (sentence elements) and forms (types of phrases):

4. Indicate the clause types of the following sentences:
a/ He has made her happy.
b/ I cleaned the floor in the sitting room yesterday.
c/ He laughed very loudly.
d/ I put your name on the waiting list.

5. Invent your own examples to the following tree diagrams and then add their syntactic analysis (especially phrases and their functions):

6. Put down one simple sentence of at least 6 words of any clause type and then indicate their word classes. Every word class can be used only once in your example:

7. Put down one simple sentence of SVC clause type:
