Designing a learning process in the digital environment: pre-tasks

The course has three pre-tasks that help you:
- orientate yourself into the theme of the course
- get to know your fellow students
- start to use Miro digital collaboration platform

Please complete pre-tasks 1 and 2 before the first online session on March 10th and pre-task 3 by March 5th.

Pre-task 1: Introduce yourself and get to know your fellow students

Please briefly introduce yourself to the study group with a video (1 minute) in the Flipgrid video discussion platform. To access Flipgrid and to see the learning task, go to https://flipgrid.com/08f6becd Log in using your **JAMK or MUNI Microsoft account**. See detailed instructions on How to record a video in Flipgrid.

The videos can only be seen by those who have enrolled in the course and have the link and a JAMK or MUNI Microsoft account, or a Google account.

Pre-task 2: Explore your learning activities

Think about a course you have taken recently. What did you do during the course?

Draw a picture of your learning during the course on a piece of paper. You can draw the different actions you did, for example, on a timeline or as a circle. These actions can include anything you did to learn during the course, not necessarily only the activities your teacher gave to you.

Have a look at the activities your teacher has given to you. Why do you think he or she gave these activities?

Prepare to discuss your picture in a small group at the beginning of the first webinar on March 10th.

Pre-task 3: Sign up for Miro by March 5th and explore the course home base

The home base and teamwork spaces are available in the Miro online visual collaboration platform. To access these areas:
1. Join the education team in Miro by accepting an invitation sent to your Jamk or Masaryk email by Tuulia Kiilavuori via Miro.
2. Sign up to Miro by March 5th.

See the instructions on How to start using Miro.

Note: To get the best experience of collaborating in small groups online, give **your first name and last name** as you sign up! If possible, use a **mouse with a scroll button** instead of the touchpad of your computer because it makes working easier.

Have a look at a [video introducing the home base in Miro](#)!

You can go to the home base and explore it before the course starts. The home base can be found in Miro on www.miro.com after you have signed up and been invited to the project by Tuulia. You an also practice using Miro in the warm-up area of the home base board. This is optional and Miro will be introduced to you during the first online session.
