

## Group works

Every group has different theme to focus on. Groups will present their own theme for the whole group. You can present it for example as Power Point- presentation, poster or on a chalkboard.

- 1) Discuss about Pictures as a tool of learning (make notes for presentation)
  - What information can be seen in these pictures?
  - What cannot be seen? What information you need to search elsewhere?
  - What kind of pictures would you need besides these pictures in order to get more information?
  - If some of these pictures would be in students textbooks how would you need to unfold and explain them?
  - What kind of misconceptions could children have if only seeing that picture?
- 2) Plan a lesson for kids about your theme. Base your lesson somehow on pictures. Make a detailed plan for the lesson.
  - Decide which grade, what materials would you need etc.
  - How would you start a lesson? How would you use pictures?
  - Make a list of accurate questions which would help children to focus on the theme.
