- [Using ArcExplorer—Java Edition](#) [PDF] (Not applicable for the education edition)
- [Introduction to ArcExplorer—Java Edition for Education](#) [PDF]

Můžete si nainstalovat obě verze ArcExploreru, každá má své výhody a nevýhody. Pro výuku doporučuji tu druhou verzi, protože umožňuje vytvářet mapy a má více nástrojů.

Soubor si stáhnete ve formátu *ZIP. Nejprve ho rozbalte a poté klikněte na tlačítko s příponou *exe a program se nainstaluje.

Pokud máte na počítači operační systém **Windows Vista, nebo Windows 7**, musíte před instalací kliknout na soubor s příponou *exe pravým tlačítkem myši, zvolit Vlastnosti -> Kompatibilita a pro Režim kompatibility zakliknout tento program spustit v režimu kompatibility a zvolit Windows XP (Service Pack 2, nebo Service Pack 3).

Program by měl bez problémů fungovat.

Pokud si budete stahovat verzi ArcExplorer Java Edition 9.3.1. ve Windows Vista spustíte instalaci obvyklým způsobem (tzn. není nutné dávat Spustit v režimu kompatibility). Toto bohužel neplatí pro Windows 7, zde je nutné spustit i tuto verzi v režimu kompatibility.
