A brief historical overview

- ❑ up to the end of the 19th century, pedagogical thoughts were totally embedded in Philosophy (cf. Plato, Aristotle, Jean-Jacques Rousseau, John Locke...)

Reading: *Emile, or On Education*

- ❑ Jon Amos Comenius (1592 – 1670) - formulated the general theory of education

reading: *Didactica Magna*

- ❑ German philosopher Johann Friedrich Herbart (1776 – 1841) can be considered as a founder of pedagogy as an academic discipline

- ❑ G. A. Lindner (1828-1887) the first professor of pedagogy at the Czech Charles-Ferdinand University, since 1882

- ❑ John Dewey (1859 – 1952) an American philosopher, psychologist and educational reformer

A brief historical overview

Normative Pedagogy vs. Exploratory Pedagogy

Normative theories of education provide the norms, goals, and standards of education.

From the twentieth century onwards, empirical research became one of the constitutive elements of educational science.

The turn of the paradigm?

Set of concepts or thought patterns, including theories, research methods, postulates, and standards for what constitutes legitimate contributions to a field.

- **Read:** Kuhn: The Structure of Scientific Revolutions

Educational sciences

educational research is often conceived as the interdisciplinary study of educational processes and practices

Educational sciences:

History of Education

Didactics

Comparative Education

[Special Education](#)

[Sociology of education](#)

Educational psychology

[Economics of education](#)

Discuss interdisciplinarity of educational sciences:

Philosophy

History

Sociology

Psychology
