

How to identify key ideas

You are going to listen to a dialogue between a physician, a girl with ADHD and her mother.

<https://www.youtube.com/watch?v=aAzd3-rsqoA&t=1s>

- What problems do you think they will talk about?

What questions does the physician ask? How does Maddie answer? What does her mother say?

- Watch the interview and write down some **key words**.

The physician	Maddie	Maddie's mom

- Watch the video again and try to write **more details** about each problem/question.
- Work in groups of three. **Student A**, use your notes to sum up the physician's concerns. **Student B**, use your notes to sum up Maddie's problems. **Student C**, use your notes to give a summary of Maddie's mum's concerns.
- What have you learned about Maddie's situation from the dialogue? Focus on the facts mentioned in the interview and try to **sum them up**. How would you organize the **key points**? Write some bullet points to help you summarize.

 -
 -
 -
 -
- **Compare** your notes with the other students in the group. Did you have the same ideas?
- What **advice** would you give to Maddie, to her mother and to Maddie's teachers?
