**Think and look up five words related to travelling and use them in your own sentence. Try to find words you are not familiar with. (TIP: Google 'travelling vocabulary B2')**

- 1)
- 2)
- 3)
- 4)
- 5)

**Read the article and answer the questions. Highlight all the linking words and phrases.**

Air-travel is one of the most popular and convenient ways to travel. It allows you to reach your destination quickly and efficiently. However, there are also some downsides to air-travel, such as long security lines, crowds, and jetlag.

One of the biggest challenges of air-travel is the cost. Airfare can be quite expensive, especially if you're flying during peak travel times. However, there are ways to save money on airfare, such as booking your flight well in advance or using a travel agent.

Another challenge of air-travel is the security process. Long lines and strict security measures can make the process of getting through the airport a bit stressful. To make things easier, make sure to arrive at the airport early and pack your bags accordingly.

Despite these challenges, air-travel remains a popular and efficient way to travel. With the help of technology and new innovations, the experience of air-travel is constantly improving.

**Comprehension Questions:**

1. What are some downsides to air-travel?

2. How can you save money on airfare?

3. What can you do to make the security process at the airport easier?

**Open-Ended Questions. Write short answers (30 – 50 words)**
