

Přehled funkčních skupin

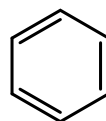

alkan

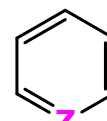

alken

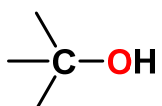

alkyn

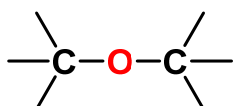

aromatická
sloučenina

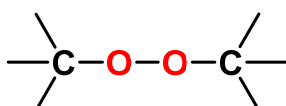

heteroaromatická
sloučenina

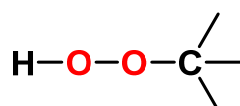

alkohol (1°,2°,3°)

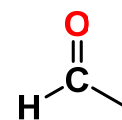

ether

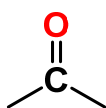

peroxid

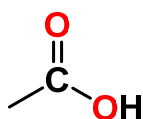

hydroperoxid

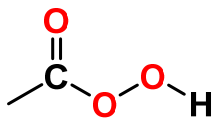

aldehyd

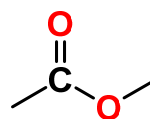

keton

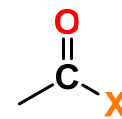

karboxylová
kyselina

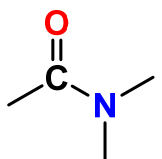

peroxykyselina

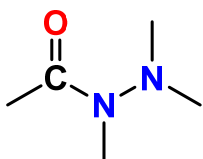

ester

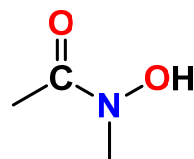

acylhalogenid

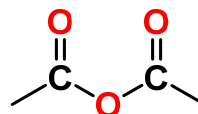

amid (1°,2°,3°)

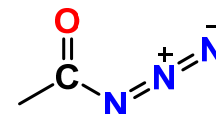

hydrazid

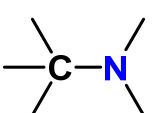

hydroxamová
kyselina

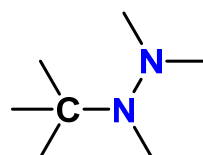

anhydrid

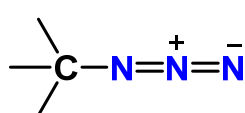

acylazid

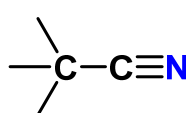

amin (1°,2°,3°)

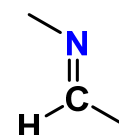

hydrazin

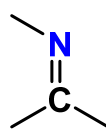

azid

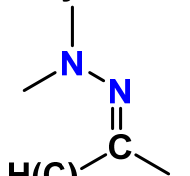

nitril

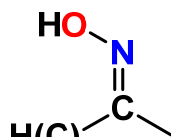

aldimin

ketimin

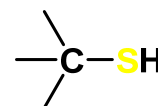

hydrazon

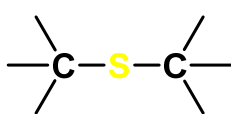

oxim

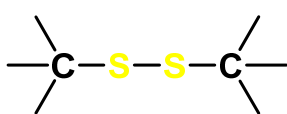

alkylhalogenid
(1°,2°,3°)

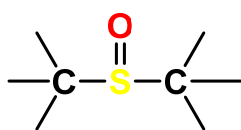

thiol (merkaptan)

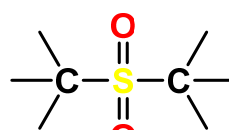

sulfid

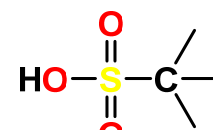

disulfid

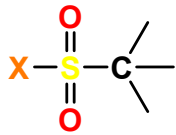

sulfoxid

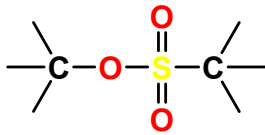

sulfon

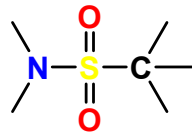

sulfová
kyselina

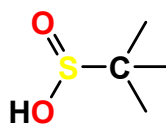

sulfonylhalogenid

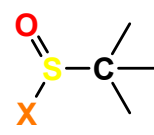

sulfonát ester

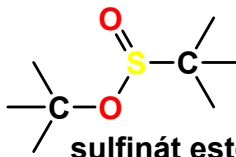

sulfonamid
(1°,2°,3°)

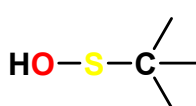

sulfinová
kyselina

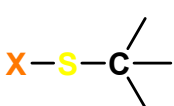

sulfinylhalogenid

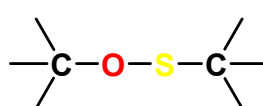

sulfinát ester

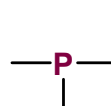

sulfenová
kyselina

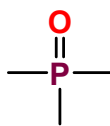

sulfinylhalogenid

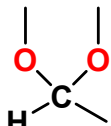

sulfenát ester

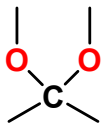

fosfan
(fosfin)

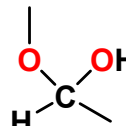

fosfanoxid
(fosfinoxid)

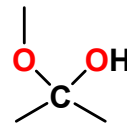

acetal

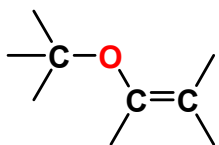

ketal

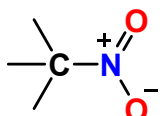

hemiacetal

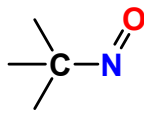

hemiketal

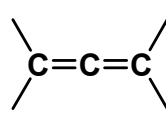

enol ether

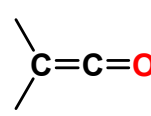

nitrosloučenina

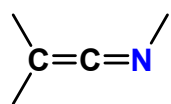

nitrososloučenina

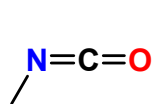

allen

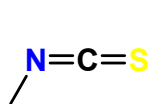

keten

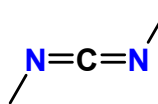

ketenimin

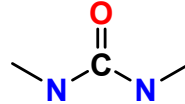

isokyanát

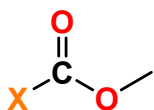

isothiokyanát

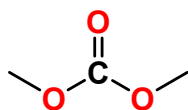

karbodiimid

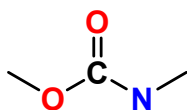

močovina

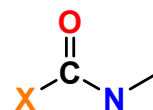

halfomiát

karbonát

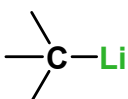

karbamát

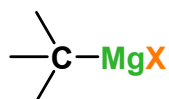

karbamoylhalogenid

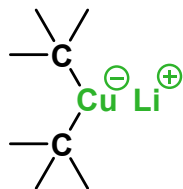

thiomočovina

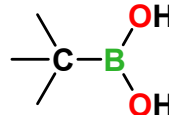

organolitná
sloučenina

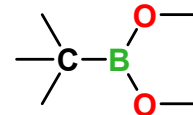

Grignardovo
čnidlo

Gilmanovo
čnidlo
(dialkylkuprát)

boronová
kyselina

boronát ester
