

Radio Listeners in Panic, Taking War Drama as Fact

Many Flee Homes to Escape 'Gas Raid From Mars'--Phone Calls Swamp Police at Br Wells Fantasy

This article appeared in the New York Times on Oct. 31, 1938.

A wave of mass hysteria seized thousands of radio listeners between 8:15 and 9:30 o'clock last night when the broadcast of a dramatization of H. G. Wells's fantasy, "The War of the Worlds," led thousands to believe that interplanetary conflict had started with invading Martians spreading wide death and destruction in New York.

The broadcast, which disrupted households, interrupted religious services, created traffic jams and clogged communications systems, was made by Orson Welles, who as the radio character, "The Shadow," used "terrifying sounds" to countless child listeners. This time at least a score of adults required medical treatment for shock and hysteria.

In Newark, in a single block at Heddon Terrace and Hawthorne Avenue, more than twenty families rushed to their houses with wet handkerchiefs and towels over their faces to flee from what they believed was to be a gas raid. Some began moving household furniture.

Throughout New York families left their homes, some to flee to near-by parks. Thousands of persons called the police, newspapers and radio stations here and in other cities of the United States and Canada seeking advice and protective measures against the raids.

The program was produced by Mr. Welles and the Mercury Theatre on the Air over station WABC and the Columbia Broadcasting System's coast-to-coast network, from 8 to 9 o'clock.

The radio play, as presented, was to simulate a regular radio program with a "break-in" for the material of the fantasy. The radio listeners, apparently, missed or did not listen to the introduction, which was: "The Columbia Broadcasting System and its affiliated stations present Orson Welles and the Mercury Theatre on the Air in 'The War of the Worlds' by H. G. Wells."

They also failed to associate the program with the newspaper listing of the program, announced as "Tonight 9:00--Play: H. G. Wells's 'War of the Worlds'--WABC." They ignored three additional announcements during the broadcast emphasizing its fictional nature.

Mr. Welles opened the program with a description of the series of which it is a part. The simulated program began with a weather report, then a news report, then a dance program. A weather report was given, prosaically. An announcer remarked that the program would be continued following the dance program with dance music. For a few moments a dance program was given in the usual manner. Then there was a "flash" with a "flash" about a professor at an observatory noting a series of gas explosions on the planet Mars.

News bulletins and scene broadcasts followed, reporting, with the technique in which the radio had reported the events, the landing of a "meteor" near Princeton N. J., "killing" 1,500 persons, the discovery that the "metal cylinder" containing strange creatures from Mars armed with "death rays" to open hostilities against the inhabitants of the earth.

Despite the fantastic nature of the reported "occurrences," the program, coming after the recent war scare and a period in which the radio frequently had interrupted regularly scheduled programs to report developments

the Czechoslovak situation, caused fright and panic throughout the area of the broadcast.

Telephone lines were tied up with calls from listeners or persons who had heard of the broadcasts. Many to verify the reports. But large numbers, obviously in a state of terror, asked how they could follow the advice and flee from the city, whether they would be safer in the "gas raid" in the cellar or on the roof, how could safeguard their children, and many of the questions which had been worrying residents of London during the tense days before the Munich agreement.

So many calls came to newspapers and so many newspapers found it advisable to check on the reports of fantastic content that The Associated Press sent out the following at 8:48 P. M.:

"Note to Editors: Queries to newspapers from radio listeners throughout the United States tonight, regarding reported meteor fall which killed a number of New Jerseyites, are the result of a studio dramatization. The

Similarly police teletype systems carried notices to all stationhouses, and police short-wave radio station police radio cars that the event was imaginary.

Message From the Police

The New York police sent out the following:

"To all receivers: Station WABC informs us that the broadcast just concluded over that station was a drama of a play. No cause for alarm."

The New Jersey State Police teletyped the following:

"Note to all receivers--WABC broadcast as drama re this section being attacked by residents of Mars. In affair."

From one New York theatre a manager reported that a throng of playgoers had rushed from his theatre at the broadcast. He said that the wives of two men in the audience, having heard the broadcast, called the men and insisted that their husbands be paged. This spread the "news" to others in the audience.

The switchboard of *The New York Times* was overwhelmed by the calls. A total of 875 were received. One called from Dayton, Ohio, asked, "What time will it be the end of the world?" A caller from the suburbs had a houseful of guests and all had rushed out to the yard for safety.

Warren Dean, a member of the American Legion living in Manhattan, who telephoned to verify the "report" expressed indignation which was typical of that of many callers.

"I've heard a lot of radio programs, but I've never heard anything as rotten as that," Mr. Dean said. "It's not realistic for comfort. They broke into a dance program with a news flash. Everybody in my house was asking for the news. It went on just like press radio news."

At 9 o'clock a woman walked into the West Fortyseventh Street police station dragging two children, and extra clothing. She said she was ready to leave the city. Police persuaded her to stay.

A garbled version of the reports reached the Dixie Bus terminal, causing officials there to prepare to change their schedule on confirmation of "news" of an accident at Princeton on their New Jersey route. Miss Dorothy

the terminal sought verification, however, when the caller refused to talk with the dispatcher, explaining "the world is coming to an end and I have a lot to do."

Harlem Shaken By the "News"

Harlem was shaken by the "news." Thirty men and women rushed into the West 123d Street police station twelve into the West 135th Street station saying they had their household goods packed and were all ready to leave Harlem if the police would tell them where to go to be "evacuated." One man insisted he had heard "the voice" over the radio advising all citizens to leave the cities.

The parlor churches in the Negro district, congregations of the smaller sects meeting on the ground floor brownstone houses, took the "news" in stride as less faithful parishioners rushed in with it, seeking spiritual consolation. Evening services became "end of the world" prayer meetings in some.

One man ran into the Wadsworth Avenue Police Station in Washington Heights, white with terror, crossed the Hudson River and asking what he should do. A man came in to the West 152d Street Station, seeking traffic directions. The broadcast became a rumor that spread through the district and many persons stood on street corners hoping for a sight of the "battle" in the skies.

In Queens the principal question asked of the switchboard operators at Police Headquarters was whether of poison gas will reach as far as Queens." Many said they were all packed up and ready to leave Queens to do so.

Samuel Tishman of 100 Riverside Drive was one of the multitude that fled into the street after hearing the program. He declared that hundreds of persons evacuated their homes fearing that the "city was being bombed."

"I came home at 9:15 P.M. just in time to receive a telephone call from my nephew who was frantic with panic. He told me the city was about to be bombed from the air and advised me to get out of the building at once. I went to the radio and heard the broadcast which corroborated what my nephew had said, grabbed my hat and coat, my personal belongings and ran to the elevator. When I got to the street there were hundreds of people in a state of panic. Most of us ran toward Broadway and it was not until we stopped taxi drivers who had heard the broadcast on their radios that we knew what it was all about. It was the most insane stunt I ever heard of."

"I heard that broadcast and almost had a heart attack," said Louis Winkler of 1,322 Clay Avenue, the Bronx. "I didn't tune it in until the program was half over, but when I heard the names and titles of Federal, State and municipal officials and when the 'Secretary of the Interior' was introduced, I was convinced it was the real thing. I ran out into the street with scores of others, and found people running in all directions. The whole thing came back to me as a news broadcast and in my mind it was a pretty crummy thing to do."

The Telegraph Bureau switchboard at police headquarters in Manhattan, operated by thirteen men, was flooded with calls from apprehensive citizens inquiring about the broadcast that police business was seriously interrupted.

Police Headquarters, unable to reach the radio station by telephone, sent a radio patrol car there to ascertain the reaction to the program. When the explanation was given, a police message was sent to all precincts and boroughs advising the commands of the cause.

"They're Bombing New Jersey!"

Patrolman John Morrison was on duty at the switchboard in the Bronx Police Headquarters when, as he expressed it, all the lines became busy at once. Among the first who answered was a man who informed

"They' re bombing New Jersey!"

"How do you know?" Patrolman Morrison inquired.

"I heard it on the radio," the voice at the other end of the wire replied. "Then I went to the roof and I could see smoke from the bombs, drifting over toward New York. What shall I do?"

The patrolman calmed the caller as well as he could, then answered other inquiries from persons who wanted to know whether the reports of a bombardment were true, and if so where they should take refuge.

At Brooklyn police headquarters, eight men assigned to the monitor switchboard estimated that they had received more than 800 inquiries from persons who had been alarmed by the broadcast. A number of these, the police learned, came from motorists who had heard the program over their car radios and were alarmed both for themselves and for persons at their homes. Also, the Brooklyn police reported, a preponderance of the calls seemed to come from women.

The National Broadcasting Company reported that men stationed at the WJZ transmitting station at Bound Brook, N. J., had received dozens of calls from residents of that area. The transmitting station communicated with the New York City office and passed the information that there was no cause for alarm to the persons who inquired later.

Meanwhile the New York telephone operators of the company found their switchboards swamped with increasing demands for information, although the NBC system had no part in the program.

Record Westchester Calls

The State, county, parkway and local police in Westchester County were swamped also with calls from residents. Of the local police departments, Mount Vernon, White Plains, Mount Kisco, Yonkers and Tarrytown received most of the inquiries. At first the authorities thought they were being made the victims of a practical joke but when the calls persisted and increased in volume they began to make inquiries. The New York Telephone Company reported that it had never handled so many calls in one hour in years in Westchester.

One man called the Mount Vernon Police Headquarters to find out "where the forty policemen were killed" and said he brother was ill in bed listening to the broadcast and when he heard the reports he got into an automobile and "disappeared." "I' m nearly crazy!" the caller exclaimed.

Because some of the inmates took the catastrophic reports seriously as they came over the radio, some of the hospitals and the county penitentiary ordered that the radios be turned off.

Thousands of calls came in to Newark Police Headquarters. These were not only from the terrorstricken citizens but also from physicians and nurses, believing the reports to be true, called to volunteer their services to aid the "injured." Officials also called in to make "emergency" arrangements for the population. Radio cars were stopped and traffic was panicky throughout that city.

Jersey City police headquarters received similar calls. One woman asked detective Timothy Grooty, on duty, "Shall I close my windows?" A man asked, "Have the police any extra gas masks?" Many of the callers, however, assured the reports were fiction, queried again and again, uncertain in whom to believe.

Scores of persons in lower Newark Avenue, Jersey City, left their homes and stood fearfully in the street with apprehension toward the sky. A radio car was dispatched there to reassure them.

The incident at Hedden Terrace and Hawthorne Avenue, in Newark, one of the most dramatic in the area, resulted in a tie-up in traffic for blocks around. The more than twenty families there apparently believed the "gas attack" had started, and so reported to the police. An ambulance, three radio cars and a police emergency squad of five were sent to the scene with full inhalator apparatus.

They found the families with wet cloths on faces contorted with hysteria. The police calmed them, halted those who were attempting to move their furniture on their cars and after a time were able to clear the traffic.

At St. Michael's Hospital, High Street and Central Avenue, in the heart of the Newark industrial district, men and women were treated for shock and hysteria. In some cases it was necessary to give sedatives, and many physicians sat down and talked with the more seriously affected.

While this was going on, three persons with children under treatment in the institution telephoned that they were taking them out and leaving the city, but their fears were calmed when hospital authorities explained what had happened.

A flickering of electric lights in Bergen County from about 6:15 to 6:30 last evening provided a build-up of terror that was to ensue when the radio broadcast started.

Without going out entirely, the lights dimmed and brightened alternately and radio reception was also affected. The Public Service Gas and Electric Company was mystified by the behavior of the lights, declaring there was nothing wrong at their power plants or in their distributing system. A spokesman for the service department said he had been made to Newark and the same situation was reported. He believed, he said, that the condition was general throughout the State.

The New Jersey Bell Telephone Company reported that every central office in the State was flooded with calls for more than an hour and the company did not have time to summon emergency operators to relieve the congestion. The hardest hit was the Trenton toll office, which handled calls from all over the East.

One of the radio reports, the statement about the mobilization of 7,000 national guardsmen in New Jersey, resulted in the armories of the Sussex and Essex troops to be swamped with calls from officers and men seeking information about the mobilization place.

Prayers for Deliverance

In Caldwell, N. J., an excited parishioner ran into the First Baptist Church during evening services and said that a meteor had fallen, showering death and destruction, and that North Jersey was threatened. The Rev. T. H. Thomas, the pastor quieted the congregation and all prayed for deliverance from the "catastrophe."

East Orange police headquarters received more than 200 calls from persons who wanted to know what to do to escape the "gas." Unaware of the broadcast, the switchboard operator tried to telephone Newark, but was unable to get the call through because the switchboard at Newark headquarters was tied up. The mystery was not cleared until a teletype explanation had been received from Trenton.

More than 100 calls were received at Maplewood police headquarters and during the excitement two fan club motorists, residents of New York City, arrived at the station to inquire how they were to get back to their homes.

now that the Pulaski Skyway had been blown up.

The women and children were crying and it took some time for the police to convince them that the catastrophe was fictitious. Many persons who called Maplewood said their neighbors were packing their possessions and to leave for the country.

In Orange, N. J., an unidentified man rushed into the lobby of the Lido Theatre, a neighborhood motion picture house, with the intention of "warning" the audience that a meteor had fallen on Raymond Boulevard, New Jersey, was spreading poisonous gases. Skeptical, Al Hochberg, manager of the theatre, prevented the man from entering the auditorium of the theatre and then called the police. He was informed that the radio broadcast was real because of the man's alarm.

Emanuel Priola, bartender of a tavern at 442 Valley Road, West Orange, closed the place, sending away customers, in the middle of the broadcast to "rescue" his wife and two children.

"At first I thought it was a lot of Buck Rogers stuff, but when a friend telephoned me that general orders had been issued to evacuate every one from the metropolitan area I put the customers out, closed the place and started home," he said.

William H. Decker of 20 Aubrey Road, Montclair, N. J., denounced the broadcast as "a disgrace" and "a lie" which he said had frightened hundreds of residents in his community, including children. He said he knew a woman who ran into the street with her two children and asked for the help of neighbors in saving them.

"We were sitting in the living room casually listening to the radio," he said, "when we heard reports of a meteor falling near New Brunswick and reports that gas was spreading. Then there was an announcement of the evacuation of Interior from Washington who spoke of the happening as a major disaster. It was the worst thing I ever heard over the air."

Columbia Explains Broadcast

The Columbia Broadcasting System issued a statement saying that the adaptation of Mr. Wells' novel for the broadcast "followed the original closely, but to make the imaginary details more interesting to American listeners the adapter, Orson Welles, substituted an American locale for the English scenes of the story."

Pointing out that the fictional character of the broadcast had been announced four times and had been previously publicized, it continued:

"Nevertheless, the program apparently was produced with such vividness that some listeners who may have heard only fragments thought the broadcast was fact, not fiction. Hundreds of telephone calls reaching CBS station authorities, newspaper offices and police headquarters in various cities testified to the mistaken belief.

"Naturally, it was neither Columbia's nor the Mercury Theatre's intention to mislead any one, and it was evident that a part of the audience had been disturbed by the performance five announcements were read over the network later in the evening to reassure those listeners."

Expressing profound regret that his dramatic efforts should cause such consternation, Mr. Welles said: "We will choose anything like this again." He hesitated about presenting it, he disclosed, because "it was so improbable that perhaps people might be bored or annoyed at hearing a tale so improbable."

Scare Is Nationwide

Broadcast Spreads Fear In New England, the South and West

Last night's radio "war scare" shocked thousands of men, women and children in the big cities through country. Newspaper offices, police stations and radio stations were besieged with calls from anxious relatives. New Jersey residents, and in some places anxious groups discussed the impending menace of a disaster.

Most of the listeners who sought more information were widely confused over the reports they had heard. Many were indignant when they learned that fiction was the cause of their alarm.

In San Francisco the general impression of listeners seemed to be that an overwhelming force had invaded the United States from the air, was in the process of destroying New York and threatening to move westward. "God," roared one inquirer into a telephone, "where can I volunteer my services? We've got to stop this."

Newspaper offices and radio stations in Chicago were swamped with telephone calls about the "meteor" that had fallen in New Jersey. Some said they had relatives in the "stricken area" and asked if the casualty list was available.

In parts of St. Louis men and women clustered in the streets in residential areas to discuss what they saw on the face of the sudden war. One suburban resident drove fifteen miles to a newspaper office to verify the "report."

In New Orleans a general impression prevailed that New Jersey had been devastated by the "invaders," and many inquiries were received than in other cities.

In Baltimore a woman engaged passage on an airliner for New York, where her daughter is in school.

The Associated Press gathered the following reports of reaction to the broadcast:

At Fayetteville, N. C., people with relatives in the section of New Jersey where the mythical visitation had occurred went to a newspaper office in tears, seeking information.

A message from Providence, R. I., said: "Weeping and hysterical women swamped the switchboard of The Providence Journal for details of the massacre and destruction at New York, and officials of the electric utility received scores of calls urging them to turn off all lights so that the city would be safe from the enemy."

Mass hysteria mounted so high in some cases that people told the police and newspapers they "saw" the "fire."

The Boston Globe told of one woman who claimed she could "see the fire," and said she and many other people in her neighborhood were "getting out of here."

Minneapolis and St. Paul police switchboards were deluged with calls from frightened people.

The Times-Dispatch in Richmond, Va., reported some of their telephone calls from people who said they were "praying."

The Kansas City bureau of The Associated Press received inquiries on the "meteors" from Los Angeles,

City, Beaumont, Texas, and St. Joseph, Mo., in addition to having its local switchboards flooded with calls. A telephone informant said he had loaded all his children into his car, had filled it with gasoline, and was gone somewhere. "Where is it safe?" he wanted to know.

Atlanta reported that listeners throughout the Southeast "had it that a planet struck in New Jersey, with nearly almost everything and anywhere from 40 to 7,000 people reported killed." Editors said responsible persons to them, were among the anxious information seekers.

In Birmingham, Ala., people gathered in groups and prayed, and Memphis had its full quota of weeping calling in to learn the facts.

In Indianapolis a woman ran into a church screaming: "New York destroyed; it's the end of the world. I will go home to die. I just heard it on the radio." Services were dismissed immediately.

Five students at Brevard College, N. C., fainted and panic gripped the campus for a half hour with many fighting for telephones to ask their parents to come and get them.

A man in Pittsburgh said he returned home in the midst of the broadcast and found his wife in the bathroom with a bottle of poison in her hand, and screaming: "I'd rather die this way than like that."

He calmed her, listened to the broadcast and then rushed to a telephone to get an explanation.

Officials of station CFRB, Toronto, said they never had had so many inquiries regarding a single broadcast. Canadian Press reported.

Washington May Act

Review of Broadcast by the Federal Commission Possible

SPECIAL TO THE NEW YORK TIMES

WASHINGTON, Oct. 30.--Informed of the furor created tonight by the broadcasting of Wells drama, "The War of the Worlds," officials of the Federal Communications Commission indicated that the commission might review the broadcast.

The usual practice of the commission is not to investigate broadcasts unless formal demands for an inquiry are made, but the commission has the power, officials pointed out, to initiate proceedings where the public interest seems to warrant official action.

Geologists at Princeton Hunt ' Meteor' in Vain

SPECIAL TO THE NEW YORK TIMES

PRINCETON, N. J., Oct 30.--Scholastic calm deserted Princeton University briefly tonight following w

misunderstanding of the WABC radio program announcing the arrival of Martians to subdue the earth.

Dr. Arthur F. Buddington, chairman of the Department of Geology, and Dr. Harry Hess, Professor of Geology, received the first alarming reports in a form indicating that a meteor had fallen near Dutch Neck, some five miles away. They armed themselves with the necessary equipment and set out to find a specimen. All they found was a group of sightseers, searching like themselves for the meteor.

At least a dozen students received telephone calls from their parents, alarmed by the broadcast. The Daily Princetonian, campus newspaper, received numerous calls from students and alumni.

Mars Monsters Broadcast Will Not Be Repeated

Perpetrators of the Innovation Regret Causing of Public Alarm

WASHINGTON (AP) The radio industry viewed a hobgoblin more terrifying to it than any Halloween prospect of increasing federal control of broadcasts was discussed here as an aftermath of a radio presentation of H. G. Wells' imaginative story which caused many listeners to believe that men from Mars had invaded the States with death rays.

When reports of terror that accompanied the fantastic drama reached the communications commission they created a growing feeling that "something should be done about it." Commission officials explained that the law conferred upon it no general regulatory power over broadcasts. Certain specific offenses, such as obscenity, are for which the commission has the right to refuse license renewal to any station which has not been operating "in the public interest." All station licenses must be renewed every six months.

Within the commission there has developed strong opposition to using the public interest clause to impose restrictions upon programs. Commissioner T. A. M. Craven has been particularly outspoken against anything resembling censorship and he repeated his warning that the commission should make no attempt at "censorship shall or shall not be said over the radio."

"The public does not want a spineless radio," he said.

Objection to Terrorism.

Commissioner George Henry Payne recalled that last November he had protested against broadcasts that caused "terrorism and nightmares among children" and said that for two years he had urged that there be a "standstill on broadcasts."

Saying that radio is an entirely different medium from the theater or lecture platform, Payne added: "People who have material broadcast into their homes without warnings have a right to protection. Too many broadcasters insisted that they could broadcast anything they liked, contending that they were protected by the prohibition of censorship. Certainly when people are injured morally, physically, spiritually and psychically, they have as much right to complain as if the laws against obscenity and indecency were violated."

The commission called upon Columbia Broadcasting system, which presented the fantasy, to submit a tape electrical recording of it. None of the commissioners who could be reached for comment had heard the program.

The broadcasters themselves were quick to give assurances that the technique used in the program would be repeated. Orson Welles, who adapted "The War of the worlds," expressed his regrets.

Told Story Imaginative.

The Columbia network called attention to the fact that on Sunday night it assured its listeners the story was imaginary, and W. B. Lewis, its vice president in charge of programs, said: "In order that this may not happen the program department hereafter will not use the technique of a stimulated news broadcast within a drama when the circumstances of the broadcast could cause immediate alarm to numbers of listeners."

The National Association of Broadcasters, through its president, Neville Miller, expressed formal regret over misinterpretation of the program. "This instance emphasizes the responsibility we assume in the use of radio and renews our determination to fulfill to the highest degree our obligation to the public," Miller said. "I know the Columbia Broadcasting system and those of us in radio have only the most profound regret that the conduct of many of our fellow citizens was disturbed by the vivid Orson Welles broadcast. The Columbia Broadcasting system has taken immediate steps to insure that such program technique will not be used again."

Chairman Frank R. McNinch, of the communications commission, declaring that he would withhold judgment on the program until later, said: "The widespread public reaction to this broadcast, as indicated by the press demonstration of the power and force of radio and points out again the serious responsibility of those who are licensed to operate stations."

Demand Investigation.

NEW YORK (AP). Urgent demands for federal investigation multiplied in the wake of the ultra-realistic drama that spread mass hysteria among listeners across the nation with its "news broadcast" fantasy of monsters from Mars invading the United States and annihilating cities and populaces with a lethal "heat

While officials at the Harvard astronomical observatory calmed fears of such a conquest by space devils from another planet with the wry comment that there was no evidence of higher life existing on Mars--some 40,000,000 miles distant--local and federal officials acted to prevent a repetition of such a nightmarish event.

As for the 22 year old "man from Mars" himself, Orson Welles, youthful actor manager and theatrical producer whose vivid dramatization of H. G. Wells' imaginative "The War of the Worlds" jumped the pulse beat of listeners, declared himself "just stunned" by the reaction. "Everything seems like a dream," he said.

The Columbia Broadcasting system whose network sent the spine chilling dramatization into millions of homes issued a statement expressing "regrets" and announced that hereafter it would not use the "technique of a news broadcast" which might "cause immediate alarm" among listeners.

Military Lesson Taught.

WASHINGTON (AP). Military experts here foresee, in time of war, radio loudspeakers in every public place in the United States and a system of voluntary self-regulation of radio. This is the lesson they draw from Sunday night's drama about an invasion by men from Mars armed with death rays.

What struck the military listeners most about the radio play was its immediate emotional effect. Thousands of persons believed a real invasion had been unleashed. They exhibited all the symptoms of fear, panic, determination to resist, desperation, bravery, excitement or fatalism that real war would have produced. Military men could

such widespread reactions shows the government will have to insist on the close co-operation of radio in war.

The experts believe this could be accomplished by voluntary agreement among the radio stations to refrain from over-dramatizing war announcements which would react on the public like Sunday night's fictional armistice. They recall that the newspapers adopted voluntary self-regulation during the World war and worked in close cooperation with the government.

Moreover, since radio admittedly has so immediate an effect, the experts believe every person in the United States will have to be given facilities for listening in if war ever comes. Consequently radios with loud speakers should be installed in all public squares, large and small. Persons not having radios in their homes can listen in at those.

Canada to Take No Action.

TORONTO (Canadian Press). Gordon Conant, attorney general of Ontario, said his department did not object to the broadcast of a realistic radio drama which, emanating from the United States and re-broadcast here, caused a widespread alarm. "I don't know of any action we could take," Conant said. "The difficulty is that only things which can be decided that they are not in the public interest. It is certainly not in the public interest that such broadcasts should be allowed."

Radio Chain Heads Called

Broadcast Problem Raised by the Welles Program.

WASHINGTON (INS). Presidents of the nation's three major broadcasting chains were invited by Charles R. McNinch, of the federal communications commission, to a conference here late next week to discuss the newspaper term "flash" on radio programs. McNinch issued the invitations to the presidents of the National Broadcasting company, the Columbia Broadcasting company and the Mutual Broadcasting system, he said to discuss "especially the frequent and, at times, misleading use of the newspaper term 'flash.'"

This step was taken by the FCC chairman in connection with last Sunday night's broadcast, "The War of the Worlds." The word "flash" was used in the broadcast to dramatize the H. G. Wells' imaginative story of this planet by "monsters from Mars." Many protests were received by the commission against the broadcast. The commission will meet in secret session next week to listen to a reproduction of the dramatization as recorded on discs. The conference with the radio chain chieftains will follow.

In announcing the conference, McNinch said: "I have heard the opinion often expressed within the industry as well as outside that the practice of using 'flash,' as well as 'bulletin,' is overworked and results in misleading. It is hoped and believed that a discussion on this subject may lead to a clearer differentiation between bona fide news matter of first rank importance and that which is of only ordinary importance or which finds place in dramatic advertising."
