“ . . . A somewhat unusual critical semiprozine. It publishes general articles of remarkably varying quality on sf, as well as some of the best long reviews in the field. . . . As one might expect from the very well informed staff producing its 24 large-format pages a month with astonishing regularity, it is also irreplaceable. Certainly its coverage of genre sf and fantasy is both wider and deeper than anything in the academic journals with the possible exception of *Foundation: The Review of Science Fiction*.”

—Peter Nicholls, *The Encyclopedia of Science Fiction*

“The magazine produces a wide range of features, some of them shrewd, insightful, and informed, some of them overintellectualized to the point of opaqueness; there is a welcome leavening of humor, and some fascinating but unclassifiable stuff.”

—Gardner Dozois, *The Year's Best Science Fiction: Ninth Annual Collection*

For twenty-five years, *The New York Review of Science Fiction* has been a leading voice in science fiction, fantasy, and horror criticism, publishing reviews, scholastic flights of fancy, and personal essays for an audience of those unafraid to read to sf like it matters.
