HOW THE AWOL (ALCOHOL WITHOUT LIQUID) MACHINE WORKS

1 Generator sends oxygen out through the hose to the vaporizer.

2 80-proof alcohol is poured into the hand-held vaporizer.

3 Oxygen mixes with the alcohol producing a mist which is inhaled.

4 Alcohol enters the bloodstream through the lungs, not the stomach.

Company recommends using device for no more than two 20-minute sessions in a 24-hour period.
