Roku 1683 vydal Balbin w páté knize swých Miscellaneí rejstřík desátku papežského, wybraného ze všech duchowních beneficíí w diecezi Pražské roku 1384, dle rukopisu sauwékého, který se nyní nachází w archivu kapituly Pražské. Byl tím ponejprw otevřen dějepisný pramen nad míru důležitý jak pro církevní statistiku tak pro místopis český 14. století wůbec, poněwadž w řečeném rejstříku nachází se popis všech tehdejších beneficíí, z kterých se desátek takový odváděl, a tudy jmenowitě popis míst farních, kterážto se w něm kladau dle arcijahenství a děkanství, na něž se diecezi Pražská tehdáž dělila, čímž tedy seznamujeme se welmi podrobně s tímto tehdejším rozdělením církevním země české.

Důležitost popisu tohoto objewila se časem býti tím wětší, když slavný dějepisec náš Palacký we swém hlavním díle o dějinách českých ukázal na sauwislost onoho rozdělení církevního s politickým, s rozdělením totiž země české na župy.

Balbin při wydání swém wyslowil domnění, že snad rejstřík z roku 1384 byl wůbec jediný toho druhu w Čechách, poněwadž prý duchowenstvo české bylo platů podobných prosto. Tehdáž prý papež powolil sebrání desátku od duchowenstwa králi Wácslawowi IV ku pomoci na cestu, kterau slíbil Wácslaw podstaupiti do Italie dle přání papežowa, kteréhožto slibu prý potom nesplnil. Balbin mylil se však w čase, co se týkalo desátku od papeže králi Wácslawowi swoleného, jakž se doleji ukáže. Skutečně pak vybírali papežowé desátek takový z duchowních beneficíí w Čechách častěji, a ku každému takowému vybírání bylo potřeba zvláštního rejstříku, do něhož se kladlo, co které beneficium mělo platiti nebo platilo; w každém takowém rejstříku byl tudy obsažen popis beneficíí a míst, z nichž desátek papežský w té případnosti byl wyžadován.

Palacký zmiňuje se již w prvním německém wydání dějin českých (II. 5), že měl starší rukopisy Balbinowa popisu far, děkanství a arcijahenství než z roku 1384 w rukau. We druhém pak wydání českém podává wykladu zewrubného, kde které místo w popise roku 1384 položené má se hledati, prawě, že porownal Balbinowo dosti nesprávné wydání se staršími rukopisy (II. 369).

Které a kolik rukopisů těch bylo, neudává wyslovně. W nejnowějším však čase podařilo se snahau zaslaužilého badatele pana kanowníka Pražského Frinta při nowém rownání kapitulního archivu odkryti w témž archivu celkem sedm rukopisů sem náležejících, totiž register desátků papežských w rozličných létech na duchowenstvu českém wyžádaných. K účelu našemu potřebí jest přede wším seznámiti se s těmito rukopisy.

1. První, již dle podoby písma patrně ze všech nejstarší, obsahuje 17 listů in folio. Na začátku i na konci něco schází. Tudy nenachází se udání roku, kdy rejstřík ten složen byl, ač bylli půwodně buď na začátku buď na konci udán. Toliko ze jmen osob w rejstříku uwedených, pokud se o nich wí z jiných pamětí, kdy byli žiwi, dá se ukázati, že pochází z roku 1352. Nemůžet býti starší než z toho roku, poněwadž se w něm uwodí mezi kanow-

nky sw. Jiří co držitel præbendy Statiwnické Nicolaus successor Wernheri, o kterémžto Wernherowi jest psáno w paměti sauwěké u Dobnera (Monum. VI. 348): Qui Verenherus anno domini Mccclii in die S. Spiritus (to jest 21 Kwětna) est defunctus. S tím srownává se, že w rejstříku tom uweden jest Jindřich probošt Wyšehradský, který, pokud známo, proboštował w létech 1345 až 1352. Poslední známá pamět o něm co o proboštowi jest w listině kapituly Wyšehradské dané dne 8 Kwětna 1352; nástupce pak jeho Wilém z Landšteina uwodí se po nejprwé w listině též kapituly dne 8 Čerwence 1353. Dle toho nemůže rejstřík ten připadati do jiného času než do druhé polowice roku 1352 neb do prwní polowice roku 1353. Že pak skutečně složen byl we druhé polowici roku 1352, dá se sauditi ze tří poznámek o farářích Miličowském děkanstwi Rakownického, Lauňowickém děkanstwi Štěpanowského a Klatowském děkanstwi téhož jména, že totiž tehdejší farář Miličowský dosazen byl w suchých dnech postních po sw. Kříži (quatuor temporum in Cruce) tedy w měsíci Září, Lauňowický u wigilii sw. Maří Magdaleny, tedy 21 Čerwence, a Klatowský o narození páně, tedy w měsíci Prosinci. Poznámky tyto, které se při žádném jiném beneficii nenacházejí, učiněny jsau dle wší ku prawdě podobnosti proto, že se tito tři duchowní teprw mezi vybíráním desátku dostali ke swým farám, pročez nemohl na nich žádán býti desátek celý. Data pak všech, jak widěti, připadají do měsíců druhé polowice roku, a nemohau se tedy wztahowati k roku 1353, nýbrž 1352.

2. Druhý rukopis obsahuje 30 listů krom sedmi blíž konce wyřezaných, jichž zbytky toliko pozůstaly wšity. Na přední straně pergamenové obálky jest od některého pozdějšího pořadatele archivu kapitulního snad asi z 18. století napsáno: Decima papalis sub Joanne Oczko archiepiscopo Pragensi anno domini 1367. Registřík tento rozeznává se ode všech ostatních tím, že w něm toliko dvě arcijahenstwi, Pražské a Kauřimské, provedena jsau podrobně dle všech far w jednom každém děkanstwi. K ostatním arcijahenstwím wztahují se toliko zápisky dále následující, kolik kdy který arcijahen odwedl peněz ze swého arcijahenstwi hlawním wyběrčím, ježto, jak se z toho podobá, vybírání desátku bylo krom Pražska a Kauřimska arcijahnům swěřeno. Zápisky tyto jsau datowány wesměs z měsíců Unora, Března a Dubna bez jmenování roku. Který to rok byl, dá se opět sauditi, ač ne zcela určitě, ze času, kdy byly živy osoby w rejstříku uwedené. Jmenují se na příklad Wratiwoj děkan Pražský, který byl děkanem od roku 1362 do roku 1374, a Purkart probošt Wyšehradský, známý z let 1363 až 1368. Do této doby náležejí také arcijahen Hradecký Wácslaw a kanowník Wyšehradský Wácslaw z Miličina, rovněž w rejstříku uwedení, o nichž wí se, že onen nastaupil w arcijahenstwi Hradecké roku 1365 před 18 Srpnem (dle lib. confirm. G. 6), tento pak w kanownictwi téhož roku 1365 dne 3 Listopadu. Dále uwodí se w rejstříku Břewnowský opat Oldřich, jehož předchůdce Diwiš wládl, pokud známo, ještě 10 Listopadu r. 1365. Z toho všeho následuje, že nemohl rejstřík tento býti složen před Listopadem r. 1365. Poněwadž pak dále w rejstříku jmenuje se děkanem sw. Appollinaříše Welek, po němž byl nástupcem Jan, jmenovaný nejprwé roku 1367 dne 17 Kwětna (w listině u Pešiny, Phosphorus septicornis 29), widěti jest zase, že rejstřík ten jest starší než z měsíce Kwětna 1367. Hledě k tomuto wypadku, dle něhož zbývá k složení toho rejstříku jen krátký čas nezcela půldruhého roku, příkládám wáhu nápisu na přední obálce wyše zmíněnému, kterým se klade rejstřík ten na rok 1367. Neb ač jest pozdní, zdá se, že jest důwodný. Nemyslím, žeby půwodce jeho byl na ten rok uhodil porownáváním dat ode mne zde uwedených, která jemu při tehdejším stawu badání sotwa byla tau měrau známa, ale spíše, že on rok 1367 nalezl na rejstříku samém napsaný, snad na některém nyní ztraceném listě, nejspíš na nějakém titulním, jehož již není. Newáhám se tedy mnoho, klásti rejstřík ten určitě na rok 1367.

3. Třetí rukopis čítá 30 listů, a jest úplně zachován. Registrík w něm obsažený neudává též roku, kdy byl složen, ale dá se dokonale určití. I w něm jmenuje se děkanem Pražským Wratiwój, který, jak predešle řečeno, w důstojenství tom byl od roku 1362 až do roku 1374. Mezi tímto časem byl Wácslaw Čáda nvedený w rejstříku oltářníkem sw. Filippa a Jakuba w kostele Wyšehradském od 8 Ledna 1368 (dle lib. confirm. H. 10), a Wácslaw farář sw. Jiljí, který se rovněž awodí, byl farářem tohoto kostela do roku 1369 dne 11 Prosince (lib. confirm. O. 1). Případá, tedy registrík do času mezi 8 Lednem 1368 a 11 Prosin- cem 1369. Dle poznámky na listě 28 w tomto rejstříku posláno bylo z wybraného desátku 1100 kop císaři, totiž Karlowi IV, do Budišína. Císař Karel byl však od 2 Dubna 1368 wzdálen z Čech na cestě do Itálie a w Itálii až do Srpna 1369; ale dne 15 Října 1369 na- cházel se skutečně w Budišíně (viz Palackého Archiv český II. 187). Z toho následuje, že jest rejstřík ten z roku posledně řečeného, 1369.

4. Čtvrtý jest rukopis, dle něhož wydal Balbin swůj registrík desátků od roku 1384. Na titulním listě jeho stojí psáno: Anno domini Millesimo trecentesimo lxxxiiii in die Omnium Sanctorum imposita est decima unius anni papalis. Zde udává se tedy určitě rok i den uložení desátku a následkem toho složení rejstříku, to jest 1 Listopadu 1384. Registrík ten roze- znává se ode všech druhých tím, že w něm desátek rozdělen jest na dvě půlletní lhůty, a klade se každá lhůta obzvlášť, tak že rukopis ten obsahuje dwa popisy všech beneficií, jichž se týkalo, jeden při prwní lhůtě, začínající se 1 Listopadem 1384, druhý při druhé pod nápisem Terminus secundus, která sáhala do roku 1385, ježto musila se počínati 1 Kwětnem toho roku. Balbin wydal we swých Miscellanefch toliko prwní z těchto dwau popisů.

5. Pátý rukopis jest pouhý přepis tohoto čtvrtého, na němž toliko nápis, který na- značuje rok 1384, schází; obsahuje pak toliko prwní lhůtu tehdejšího desátku; druhá schází,

6. Rukopis šestý jest z roku 1399; což naznačuje předně nápis sawvěký na obálce: Anno domini Millesimo trecentesimo nonagesimo nono currente; zadruhé širší poznámka na prwním listě, která zní: Anno domini Millesimo trecentesimo nonagesimo nono die mensis Maji (při čemž pohříchu udání dne jest zapomenutím písaře wynecháno)... Reverendus in Christo pater et dominus, dominus Wenceslaus patriarcha Anthiocenus incepit colligere decimam papalem ab universo clero in diocesi et civitate Pragensi; quam concessit Sanctissimus in Christo pater et dominus, dominus Bonifacius papa . . pro Serenissimo principe et domino, domino Wenceslao, Romanorum et Boemíe rege. Skutek zde dosvědčený, že bylo wybrání desátku od duchowenstwa powoleno papežem králi Wácslawowi, jest také odjinud znám; teprw zde však dowídáme se, že to bylo roku 1399. Balbin jen z domyslu pokládá desátek wybraný roku 1384 za onen, jehož papež powolil králi Wácslawowi, však patrně mylně; w rejstříku z roku 1384 od něho wydaném nic o tom nestojí, jak by se sic každému zdálo dle určitého způsobu, kterým Balbin o tom mluví.

7. Sedmý rukopis konečně jest pohříchu velmi porauchaný; na začátku schází několik listů, a zbývá jich toliko 16, které jsau wětším dílem natrhány a silně zpuktelé, ač tak, že se obsah předce dá přečísti. Udání roku registríku w rukopise tom obsaženého schází, a určení jeho jest i více než při jiných stíženo následkem ztráty prwních listů, na kterých se všude nachází nejvíce jmen známých osob. Nicméně za jmen zachovaných vychází lehce na jawo, že rejstřík ten složen byl někdy ku konci 14. nebo na začátku 15. století. K bližšímu pak určení času slauží nejvíce jména oltářníků Božšho těla a sw. Markéty w kostele sw. Haštala. Oltářníkem totiž Božšho těla w řečeném kostele jmenuje se w registríku Hereš. Kněz tento byl při tom oltáři dle paměti w aktech konsistoře (r. 1403 pag. 302, a w knihách

Erectionum w létech 1403 až 1406, kdež posledně připomíná se 10 Kwětna. Bezpośredním předchůdcem jeho byl kněz Wít řečený Dokoše až do 9 Unora 1403 (lib. confirm. D. 5). Oltářníkem sw. Markéty nazývá se w registříku kněz Mikuláš. Ten byl dle knih confirmationum prvé mansionářem w kostele sw. Wíta; byl dosazen k řečenému oltáři r. 1400 dne 29 Kwětna (A. 15); po jeho pak smrti byl dosazen za jeho nástupce kněz Lukáš Přibislawůw z Domažlic dne 26 Dubna 1406 (H. 2). K tomu uwedeme ještě oltářníka sw. Trojice w kostele sw. Mikuláše na Starém městě Pražském, který se w registříku nazývá Jindřich, a dle knih confirmationum byl při tom oltáři od roku 1397 (Q. 11) až do 28 Dubna 1406 (H. 2), konečně Ortlina oltářníka panny Marie w kostele sw. Linharta na Starém městě, který dle knih confirmačních (G. 14) zemřel před 3 Unorem roku 1406. Z udání těchto vyplývá s jistotau, že registřík tento složen byl w čase od 9 Unora 1403 až do 3 Unora 1406.

Wítané pomoci ještě k lepšímu určení tohoto času poskytuje nám však osmý rukopis tohoto druhu, který se někdy w archivu kapituly Pražské chawal, pohřichu však na tento čas práwě se pohřešuje. Asi před 20 léty učinil jsem sobě z něho částečné wýtahy, z kterých vychází na jawo, že registřík desátku w něm obsažený složen byl roku 1403. Mezi rozličnými osobami w něm jmenowanými, které, pokud známy jsau odjinud, wesměs žily w prwních létech 15. století, uwodí se w něm totiž také Dominik oltářník panny Marie w kostele sw. Mikuláše na Starém městě, který dle knih konfirmačních (D. 19) byl při tom oltáři do 27 Září roku 1403, dále Jan farář u sw. Michala pod hradem Pražským, který dle týchž knih (D. 5, D. 8) byl farářem při tom kostele jen od 6 Unora do 25 Kwětna téhož roku. Registřík tento pochází tedy z první polowice roku 1403 a tudy z téhož třiletí, do kterého, jak ukázáno, připadá registřík posledně výše zmíněný. Že není jeden ten rejstřík přepisem druhého, jest se snadno přesvědčiti jak z jiných rozdílů, tak jmenowitě také tudy, že w registříku sedmého rukopisu znamená se wybraný desátek pololetní, w tomto pak osmém celoroční; z čehož hned také widěti jest, že se oba tyto registříky nedoplňowaly co dvě pololetní lhůty jednoho desátku, jako výše zmíněný z let 1384 a 1385. Když tedy registřík rukopisu osmého pocházel z první polowice roku 1403, musil registřík rukopisu sedmého býti o něco pozdější. A poněwadž nepodobá se, žeby byl desátek papežský býwal wybírán dvě léta hned po sobě, widí se mi býti ku prawdě nejpodobněji, že registřík rukopisu sedmého pocházel asi z roku 1405. Byly by tu pak dva desátky we třech létech 1403 až 1405, tak jako předtím w létech 1367 a 1369.

Protí domnění Balbinowu, žeby wůbec jen jednau, totiž roku 1384, byl wybrán desátek papežský od duchowenstwa českého, máme tuto sedm registříků desátků papežských z dieceze Pražské, z kterých wyswítá, že během málo wíce než padesáti let byl desátek takowý wybrán sedmkrát, totiž w létech 1352, 1367, 1369, 1384, 1399, 1403 a asi 1405. Dwakrát w těchto případnostech bylo wybrání desátku powoleno od papeže králi českému, totiž roku 1369 císaři Karlowi a r. 1399 králi Wáclawowi IV; jednau byly wybírány dvě třetiny desátku pro krále, a jedna třetina pro papeže, totiž r. 1352; w ostatních jmenowaných létech nemáme žádné příčiny ku pochybowání, že byl wybrán pro papeže samého.

Registříky z let 1367, 1384, 1399 a 1403 obsahují desátek celoroční, ostatní tři, totiž z let 1352, 1369 a 1405 toliko pololetní. Nenásleduje však z toho s jistotau, žeby w těchto třech létech nebyl desátek žádán býwal za celý, než toliko za půl roku. Možná, že se nám jen zachowaly registříky jedné půlletní lhůty a druhé nic, tak jako na příklad we druhém exempláři registříku z roku 1384, jež jsme uwedli výše pod číslem 5, obsažena jest jen jedna půlletní lhůta, ačkoli wíme, že byl desátek uložen na celý rok.

Nelze však ani počet sedmi těchto desátků, jejichž registříky se zachowaly, pokládati

za úplný v celém běhu času od roku 1352 do roku 1405; ano jsou toho důkazy, že byl desátek papežský během toho času vybrán více než sedmkrát. Tak čteme v Aktech konsistoře Pražské roku 1373 (pag. 9), kterak srovnal se Pešl komendator kláštera panny Marie konce mosta na Malé straně Pražské ve jménu svém a všech klášterů řádu toho, totiž Johannitů v provincii Pražské, s děkanem sv. Apollinarije, jakožto výběrčí komory papežské, o desátek papežský, zavázav se do tří měsíců zaplatiti 400 zlatých jménem téhož desátku. Byl tedy také roku 1373 vybrán papežský desátek v Čechách. Z jiné pak paměti v týchž Aktech, dle které arcibiskup Pražský Jan z Jenšteina, co výběrčí desátku papežského, poháněl několik farářů Pražských k zaplacení téhož desátku dne 23 Čerwence 1384, jest viděti, že tehdyž přišlo dvojí uložení desátku hned po sobě, poněvadž desátek z toho roku, o němž se zachoval registrík, byl uložen teprv 1 Listopadu 1384, tento pak, o němž registríku nemáme, byl wyupomínán již za lhůty o hromnicích a nanebewzetí panny Marie toho roku. Jest konečně také jistý dopis císaře Karla IV. ku papeži psaný ještě za živobytí arcibiskupa Arnošta, tedy na každý způsob před rokem 1364, za jistau příčinou, o které ještě níže powíme, z kterého se souditi musí, že již před tím rokem byl desátek papežský za panování Karlova vybrán několikrát, ač neznáme z toho času než jediný registrík, totiž z roku 1352. Mluví se totiž v dopise tom o způsobu placení desátku pro komoru Jeho Swatosti, někdy pak za zvláštního dowolení Jeho Swatosti pro potřeby císařowy vybraného (de modo solutionis decimae pro Sanctitatis Vestrae camera, interdum vero ex speciali Sanctitatis Vestrae indulto pro nostris opportunitatibus recollectae).

Wybírání desátku papežského v Čechách bylo ostatně mnohem staršího původu, než ze času Karla IV. Jsouť o něm paměti z let 1274, 1308, 1312, 1325, o kterých nám zde nepotřebí jednati. Jisté byly již i v těch letech k též potřebě složeny podobné registríky, jako ony, které se nám náhodou dochowaly.

Balbin přikládal známému sobě registríku desátků papežských zvláštní důležitost v tom směru, žeby se dle něho lehko dal wypočítati roční důchod každého beneficia w něm obsaženého; neb že potřebí jest toliko roční desátek wzíti desetkrát. Rozuměj dle míněn Balbina toliko důchod ze stálých platů (census) každého beneficia; žeby totiž byly w tom obsaženy také jiné příjmy, k. p. z ofěr neb ze štoly, jak nyní říkáme, nemyslil Balbin. Za příklad dává proboštství Pražské. Celoroční desátek jeho činil 24 kop, dle toho tedy že musil celoroční stálý důchod proboštství činiti 240 kop.

Skutečně však nedá se stawěti na tomto základě, ano jest docela matný. Tak k. p. když zůstaneme hned při proboštství Pražském, spatříme brzy, že se wypočtení Balbinowo se skutečným stawem důchodů jeho nesrovnává. W kapitulním archivu chová se urbář proboštství Pražského, zhotowený někdy na začátku 15. století, z něhož, ač w něm není všecko docela úplně udáno, dá se napočísti 368 kop ročního stálého platu, který vycházel ze statků proboštství, nepočítaje w to ceny dávek w plodinách a ještě jiných rozličných důchodů, což by činilo ještě zase summu znamenitau. Desátek byl tedy w tomto případě mnohem menší, než by wypadal z celého stálého důchodu.

Podobně by se dalo ukázati na více příkladech, kde nám staw důchodů jednotlivých beneficií jest více neb méně powědom. Uwedeme k. p. farní kostel sv. Jana na Zábradlí na Starém městě Pražském. Prwotní nadání jeho není nám sice známo. Ale z knih Erectionum dowídáme se, že přibýlo k němu roku 1399 ročního platu 4 kopy 3 groše, a roku 1401 opět jedna kopa, tedy dohromady něco přes 5 kop ročního platu. Z tohoto přírostku byl by dle mínění Balbinowa měl platiti 30 grošů desátku. Skutečně však platil celkem 32 grošů, jak

dle starších registříků před tímto přirostkem, tak i potom. Patrně tedy se desátek z celého jeho stálého platu nepočítal. Podobně přibýlo farářů u sw. Benedikta na Hradčanech v letech 1398, 1400 a 1402 dohromady 3½ kopy grošů ročního platu. Z toho wypadá desátek 21 grošů. K nadání této fary náležel také jistý dvůr poplužní. Nicméně platil farář sw. Benedikta dle všech zachovaných registříků jen 18 grošů desátku celoročního. Mohli bychom uvést i více příkladů, kdybychom hleděli k rozličným oltářníkům v kostelích Pražských, jichž nadání stálými platy jest nám namnoze známo z knih *Erectionum*. Kdybychom summu ročního platu kteréhokoli oltáře porovnali s desátkem registříků, našli bychom, že byl desátek menší než desátý díl příjmu.

Ještě větší rozdíly naskytují se ovšem v takových případnostech, ve kterých jest nám lze porovnatí příjem nejen ze stálých platů, nýbrž i z jiných, nahodilých důchodů některého benefícia. Tak na příklad čteme v Aktech konsistoře roku 1384 (fol. 33), kterak farář Chuchelský u Prahy pronajal užitky fary své, jak se téhdáž často stávalo, knězi náměstkovi za 6 kop grošů ročně. Kdyby fara ta byla ročně přinášela jen 6 kop příjmu (musila pak více přinášeti, poněvadž kněz najímající musil z ní také míti swau výživu), bylo by z toho příjmu wypadalo 36 grošů desátku. Skutečně odvádělo se z Chuchle dle registříků jen polovice toho, totiž 18 grošů. Podobně pronajal roku 1408 arcijahen Horšowský Mikuláš Zeiselmeister důchody svého arcijahenství Wacslawowi farářovi z Lipoltic na rok za 82 kop grošů, vymíniw sobě krom toho některé důležité požitky. Z 82 kop grošů wypadalo by 8 kop 12 grošů desátku; skutečný desátek dle registříků činil však pokaždé jen 2 kopy. Roku 1386 pronajal farář sw. Klimenta na Pořčici v Praze požitky kostela svého za 18 kop a roku 1408 farář Krtenský požitky svého kostela rovněž za 18 kop. Prvé jmenovaný vymínil sobě přitom požívání winnice náležející ku kostelu. Z 18 kop činil by desátek 108 grošů; skutečně odvádělo se z jednoho i druhého tohoto kostela jen 30 grošů.

Jaké tedy bylo měřítko, dle kterého se počítal desátek papežský z důchodů beneficií v Čechách? Některého světla poskytuje nám k tomu rukopis kapituly Pražské z 15. století, ve kterém se krom urbáře proboštství výše zmíněného nachází přepis části registříku desátku papežského z roku 1367, o prae-bendách kapituly Pražské a kostelích celého arcijahenství Pražského a částí arcijahenství Kaurimského, dále pak také popis důchodů jednékaždé prae-bendy i všech jednotlivých oltářů kostela Pražského pod nápisy: *Taxa primi chori ecclesiae Pragensis. Secundus chorus sinister. Census altarium in ecclesia Pragensi infrascriptorum*. Popis tento, saudec dle času, ve kterém žily osoby v něm uvedené, byl složen mezi léty 1365 a 1369, patrně pak k tomu účelu, aby sloužil za základ k vypočtení desátku papežského, který se mezi tím časem vybíral, tedy buďto roku 1367 nebo 1369. Pod nápisem *Taxa primi chori* stojí předně o děkanu: *Decanus Pragensis ecclesiae habet de decanatu exclusis oneribus xxxvi sexagenas*. Následuje potom asi polovice prae-bend s udáním, kolik která nese. Pod nápisem: *Secundus chorus sinister* stojí zase na prvním místě o proboštovi: *Præpositus Pragensis exclusis oneribus et inclusis araturis ccc sexagenas*, a následují ostatní prae-bendy. Pod třetím titulem stojí oltářové, a při každém předně platy jeho, potom břímě (onus) na platech těch vězící. Z oněch výtek *exclusis oneribus, inclusis araturis* a z udání pauze stálých platů s břemeny jejich při oltářnicích jest viděti, že se Balbin neminul prawdy, když twrdil, že se při wyměření desátku na příjmy nahodilě nehledělo (ač byly příjmy takové při mnohých beneficiích velké); zároveň však také, že se mimo stálé platy peněžité hledělo nebo umělo hleděti též k užitku z polí (de araturis); že však hledělo se při obém jen k užitku čistému po odražení břemen. Co se rozumělo břemeny při oltářnicích, jest na mnoze jasno.

z nadacích listin jejich, pokud se zachovaly w knihách *Erectionum*. Obyčejně se totiž w nadací listině uwodí roční plat, který zakladatel k oltáři darowal, zároveň však také, co z toho platu oltářník měl obraceti k jiným potřebám neb odváděti jiným osobám. Powinnosti tyto byly břemenem oltáře, a teprw, co po zaprawení jich zbylo, čistým důchodem oltářníka. O proboštu a o děkanu wíme, že měli jisté powinnosti ku kostelu, probošt jmenowitě jisté welké odwody peněz ku prospěchu kanowníků. To byla břemena jejich. Jak widěti počítalo se při proboštowi všeecko, co měl přes 300 kop ročního příjmu, za břímě. Zdali a jaká břemena se počítala při jiných důstojenstwích a praebendách, neumíme do podrobna udati.

Buď však jak buď, co se počítalo za břímě a jak se počítal čistý důchod beneficií, na každý způsob máme tu před sebou popis osob při kostele Pražském s udáním čistých důchodů jejich, ku kterým oni sami se znali; dle toho udání tedy byli powinni počítati papežský desátek. Nicméně když projdeme ten popis a srownáme jej s registříkem desátku z roku 1367 nebo kterýmkoli jiným, shledáme skoro při všech w něm uwedených beneficiích, že z nich byl odváděn desátek ještě zase o něco menší, než dle tohoto wyznaného čistého důchodu. Uwedeme na důkaz toliko členy kapituly.

Probošt měl z důchodu 300 kop platiti 30 kop. Platil jen 24.

Děkan ze 36 kop 3 kopy 36 grošů. Platil 2 kopy 30 gr.

Scholastikus ze 24 kop 2 kopy 24 gr. Platil 2 kopy.

Arcijahen z 42 kop 4 kopy 12 gr. Platil 4 kopy.

Præbenda w Bělukách ze 6 kop 36 grošů. Platila 35 gr.

Præbenda w Zloníně z 10 hřiwen čili 10 kop a 40 gr. 1 kopu a 4 gr. Platila 1 kopu.

Præbenda w Hořanech ze 14 kop 1 kopu 24 gr. Platila 1 kopu 23 gr.

Præbenda w Kojeticích ze 27 kop 2 kopy 42 gr. Platila 2 kopy 30 gr.

Præbenda w Poštowicích z 20 kop 2 kopy. Platila 1 kopu 48 gr.

Præbenda w Jesenicích ze 17 kop 1 kopu 42 gr. Platila 1 kopu 36 gr.

Præbenda w Ctiněwsi ze 30 kop 3 kopy. Platila 1 kopu 12 gr.

Præbenda w Chrasti z 11 kop 1 kopu 6 gr. Platila 1 kopu.

Præbenda w Sowinicích ze 20 kop 2 kopy. Platila 1 kopu 12 gr.

Præbenda w Příšlepích ze 17 kop 1 kopu 42 gr. Platila 1 kopu 24 gr.

Præbenda we Wětrušicích ze 24 kop 2 kopy 24 gr. Platila 2 kopy.

Præbenda we Kbelích ze 17 kop 1 kopu 42 gr. Platila 1 kopu.

Præbenda w Aujezdci ze 23 kop 2 kopy 36 gr. Platila 1 kopu 36 gr.

Præbenda we Wysočanech ze 14 kop 1 kopu 24 gr. Platila 1 kopu 16 gr.

Præbenda druhá w Jesenicích z 11 kop 1 kopu 6 gr. Platila 48 gr.

Præbenda w Slatině z 30 kop 3 kopy. Platila 2 kopy 12 gr.

Præbenda druhá we Zloníně z 10 hřiwen čili 10 kop 40 gr. 1 kopu 4 gr. Platila 52 gr.

Jediné dvě praebendy Krčská a Líbeznická platily dle wyznaného čistého důchodu, Krčská totiž ze 12 kop 1 kopu 12 gr. Líbeznická pak z 18 kop 1 kopu 48 grošů. Jinou výjimku činí tři praebendy, které platily wíce než dle wyznaného čistého důchodu, totiž Holubická ze 47 kop 5 kop místo 4 kop 42 gr. a Hornětická ze 24 kop 3 kopy místo dwau kop 24 grošů. Musilo to míti příčinu zvláštní nám neznámau.

Podobné rozdíly mezi desátkem skutečným a wypočítaným dle popisu čistých důchodů mohli bychom ukázati také při oltářích w kostele Pražském, čehož pro ukrácení opomíjme.

Nesrownalosti této neumím sobě jinak wyložiti, nežli že duchowenstwo hledělo sobě powinnost obtížnau dosti častého odváděni desátku papežského ulehčiti a k tomu cili zamlčo-

walo některau část swých důchodů dworu papežskému. Že se zamlčování takové musilo dít, dá se souditi také z toho, že krom řídkých výjimek desátek ve všech létech, z kterých se zachovaly registříky, zůstával stejný, ačkoli se důchody jednotlivých beneficí proběhnutím více než padesáti let všelijak měnily a jmenovitě množily, jakž ukázáno výše na příklad o kostelích sw. Jana na Zábradlí a sw. Benedikta na Hradčanech.

Máme také jistau pamět, z níž vychází na jawo, že dwůr papežský spůsobu, kterým se vypočítával desátek, nedůvěřowal dosti a přál si vyměřování přísnějšího. Jest to psaní císaře Karla IV ku papeži, o kterém jsme již výše učinili zmínku, zasláné w neznámém roce, však ještě za žiwobyti arcibiskupa Arnošta, wytištěné w Palackého Formelbücher (I. 363). Papež žádal byl na arcibiskupu Pražském Arnoštowi na Janowi biskupu Olomauckém a Janowi biskupu Litomyšlském, aby mu zaslali popis všech beneficí provincie Pražské, jak swětského duchowenstwa tak řeholních, co do ročního důchodu jich, zhotowený jistým spůsobem od něho k tomu předepsaným. K tomu odpowídá císař, jemuž biskupové dopis papežůw o to předložili, na místě jich, kterak zprawiw se o okolnostech při těch beneficích a o spůsobu placení desátku, buď pro papeže buď pro něj samého z powolení papežowa wybíraného, auplně přesvědčil se, že se beneficia ta řádně a nezměnitelně wyceniti nedají, však že se placení desátku děje správně a bez umenšení dle možnosti každého benefícia. Pročež žádá Jeho Swatosti, aby od takového popisu welice nemožného upustil a spokojil se s řádem dotud uwyklým, jakožto sprawedliwým a bezúhonným.

Jak jest widěti z popisu praebend a oltářů kostela Pražského. o němž jsme výše powěděli, nebylo zhotowení popisu takového naprosto nemožné. Kapitula Pražská dala jej skutečně zhotowiti, ale nesprawowala se jím docela přísně. Dobrému však národnímu hospodáři, jakým byl Karel IV, nemohlo býti milo, aby se desátek papežský přísněji wyměřowal, než bylo již we zwyku, i aby tudy ještě více peněz bez prospěchu odcházelo ze země; byť pak i do jeho wlastní pokladnice o něco méně se sešlo we případech, když se desátek s powolením papeže wybíral pro něho samého.

Ačkoliw dle toho, co jest tuto ukázáno, nelze z registříků desátků papežských wypočísti důchody jednotlivých beneficí tím spůsobem, jak si předstawowal Balbin, předce owšem poskytují nám známosti aspoň o poměrném bohatství beneficí, jak totiž každé w porownání s jinými bylo hojně nadáno, byť nesmělo se ani to bráti příliš určitě.

Důležitosti paměti těchto w jiných ohledech nic se tím neujíhá. Nejwětší cena jejich záleží w tom, že nám poskytují, ne sice úplného ale aspoň k úplnosti welmi se blízkiego přehledu církewních beneficí w Čechách w době předhusitské a tudy welice důležitého příspěwku k místopisu země české w též době, krom toho pak také mnoho wítaných osobních zpráv, ježto se při mnohých beneficích jmenují držitelé jejich, kteří kdy byli; owšem ukazují nám dle wlastního určení swého jistau stránku tehdejšího řízení církwe, kterak často totiž papežové užíwali swé moci k wyžadování peněz od duchowenstwa českého pod jménem desátku ke swým potřebám; konečně pak obsahují také některé jiné drobnější zpráwy. K seznámení se se wším tím nepostačuje uweřejnění jediného z registříků těchto, kterým se zawděčil Balbin. Neboť registříky ty jakožto časem od sebe wzdálené uchylují se od sebe, jmenovitě co se týče osob w nich uwedených i jiných nahodilých okolností; co se pak obsahu jich místopisného a statistického týče, přinášel čas i w tom některé, ač méně čtené proměny; krom toho pak slauží často jeden registřík k objasnění druhého, ježto co w některých jest udáno nesprávně neb neúplně, w jiných se opravuje a doceluje.

Z té příčiny pokládal jsem wydání všech registříků, co jich nyní známe, pohromadě

za věc nezbytečnou, a předkládám je tuto vzdělavatelům a milovníkům dějepisu domácího k použití ve způsobě, která se mi zdála býti k účelu nejprůměřenější.

W předu a wzadu položeny jsau totiž předně poznámky a zápisky, které w několika registříkách vlastně popis beneficí předcházejí nebo za ním jsau přidány, s nadepsáním roku registříka, ve kterém se nalezejí.

Popis beneficí rozdělen jest na články, které w registřících samých jsau vyznačeny zvláštními nadpisy. Přidány jsau toliko číslice nad jednotlivými články. W každém článku následují beneficia po sobě w tom pořádku, ve kterém se nacházejí w registříku nejstarším, tedy z roku 1352, a kde w registříku tomto jest mezera, z roku 1367 nebo z prvního pozdějšího, ve kterém mezera jest vyplněna. Rok ten jest všude udán w nadpise. Při každém beneficii vytaženém z roku nejstaršího, ve kterém se nachází, přidány jsau však hned zmínky o něm též z ostatních registříků, aby všecko, co se jednoho beneficiuma týče, mohlo pohodlně nalezeno býti pohromadě. Přitom jsau roky ostatních registříků poznamenány všude na začátku řádku. Který rok kde schází, w tom registříku jest beneficium, o němž se jedná, pomínuto mlčením. Nejstarší zmínka o každém beneficii jest tištěna větším písmem, pozdější zmínky menším.

Kde z beneficí obsažených w jednom článku některá mají první zmínku o sobě w starším, jiná w novějším registříku, jest nadepsán nejprve rok starší, k. p. 1352, a po uvedení všech beneficí w tom roce ponejprv zmíněných stojí nad řádky druhý nápis novějšího roku, k. p. 1367, pod nímž následují beneficia w tomto roce nejprve zmíněná, a tak dle potřeby dále nadpisy pozdějších registříků: 1369, 1384 atd.

Týmž způsobem musilo se naložiti s některými zmínkami o beneficích, při kterých nedá se poznati, které beneficium se jimi míní, totiž zejména při některých kapitulách, když se jmenuje kanovník a není udáno, kterau měl přebendu, kdež pak nemožné jest wraditi zmínku pozdější tam, kde by ke starší zmínce náležela. Musila se tedy postawiti sama o sobě pod pozdější rok, jako by to bylo nové nějaké beneficium, předtím nezmněné.

Kde se názew některého beneficiuma uwodí dwakrát po sobě docela stejně, jest podruhé užito skráceniny *it.* (to jest *item*). Na nepatrné rozdíly prawopisné se přitom nehledí; varianty však jen poněkud důležité při místních jménech kladau se všechny.

Kolik se kdy z kterého beneficiuma platilo, jest pokaždé udáno, třebas bylo několikrát po sobě docela stejně. Kde udání schází, schází w registříku samém, což mělo příčiny rozličné.

Roky, kterými se jednotlivé registříky naznačují, jsau ty, které jsme wyše položili, jak a pokud se nám podařilo je wypátrati, totiž:

1352, 1367, 1369, 1384, 1385, 1399, 1403, c. (circa) 1405. Přitom rozumíme rokem 1384 první, a rokem 1385 druhau lhůtu tehdejšího desátka celoročního.

Registřík z roku 1403, jak již řečeno, nemohl na ten čas býti nalezen. Kladu z něho nicméně aspoň tolik, co obsahují mé wýtahy před léty z něho učiněné.

Následuje příkladu Palackého při jeho popise děkanství w druhém svazku Dějin národa českého, přidávám při každém jméne místním, kde se ponejprv děje zmínka o něm, způsob čtení jeho nynějším českým prawopisem a stránku, na které se nachází w Palackého Popise králowství českého.

Wzadu přidán jest registřík všech míst, která byla sídla beneficí, w pořádku abecedním, a sice jak česká, tak také rozeznávající se německá nebo latinská, co jich w rukopisích samých jest uvedeno. Jména česká uwodí se však dle správného wyslowení, bez ohledu na rozličný způsob psaní tehdejšího.

b*

Ještě zasluhuje zde upozornění zvláštní rozdílnost v rukopisích, týkající se děkanství Kolinského, že totiž děkanství toto jen v některých registřících se uvodí a v jiných nic. Prostě uvodí se jako každé jiné děkanství vlastně jen v registříku z roku 1385. Roku 1384 uvodí se farní místa do něho náležející některá při děkanství Kauřimském a některá při děkanství Čáslavském; ale dvě tato děkanství mají tam nadpisy: *Decanatus Curimensis et Coloniensis cum cyfris*, a opět: *Decanatus Czaaslaiuensis et decanatus Coloniensis cum cyfris*, čímž míní se, že místa náležející do děkanství Kolinského při obou těchto děkanstvích jsou znamenána cyfrou 0, která v rukopise stojí všude po kraji před jménem místa, jehož se týče. Jen starý Kolín jest přitom pominut. We vydání našem jest to všude též poznamenáno při každém místě cifrou 0 po roce 1384. V registříku z roku 1367 stojí děkanství Kolinské pod zvláštním svým nápisem se všemi jmény míst k němu náležejících i se jmény farářů a co který platil; mimo to však předce uvedena jsou místa k němu náležející také při děkanství Kauřimském jedna a při děkanství Čáslavském ostatní, ač beze všeho jiného udání. V ostatních registřících, totiž z let 1352, 1369, 1399 a c. 1405, nenachází se žádné děkanství Kolinské. Místa k němu příslušná jsou uvedena s větší polovicí při děkanství Kauřimském, s menší při Čáslavském.

Rozdílnost tato dala by se vyložití v ten způsob, že snad děkanství Kolinské bylo teprv někdy mezi léty 1352 a 1367 utvořeno, oddělením některých míst od děkanství Kauřimského a jiných od Čáslavského i spojením jich v jeden nový okres, později pak, totiž někdy mezi léty 1385 a 1399, že bylo zase zrušeno a místa k němu náležející zase ke dvěma oněm děkanstvím přiřčena. Jakýmsi potvrzením toho mohlo by se zdáti, že v *Libris confirmationum* roku 1355 při dosazení faráře v Rosochách, jednom z míst tohoto děkanství Kolinského, jmenují se exekutory Petr farář Labsko-Týnecký a Jan děkan Čáslavský, (Tingl. 56) z čehož by se mohlo souditi, že tehdaž Rosochy náležely ještě k děkanství Čáslavskému, a tedy že děkanství Kolinské bylo zřízeno teprv po roce 1355, kdežto naproti tomu při dosazení faráře ve Weletově roku 1390 (Tingl 23) a opět roku 1396 (Tingl 251) jmenuje se pokaždé exekutorem *plebanus in Conarzewicz decanus Coloniensis*.

Proti tomu jest však zase, že se v registříku z roku 1369, tedy v čase mezi léty 1367 a 1396, ve kterých se zvláštní děkanství Kolinské objevuje, nicméně děkanství toto neuvodí, nýbrž místa k němu náležející připočtena jsou k sousedním dvěma děkanstvím, Kauřimskému a Čáslavskému. Kdyby tedy onen výklad byl důvodný, bylo by musilo děkanství Kolinské býti mezi léty 1355 a 1367 zřízeno, mezi léty 1367 a 1369 zase zrušeno, mezi léty 1369 a 1384 opět zřízeno a mezi léty 1396 a 1399 opět zrušeno; což jest předce méně podobné.

Myslím proto, že spíše děkanství Kolinské bylo starodávné, a že po celý čas, k němuž se registříky naše vztahují, stávalo, ale že z nějakých nám neznámých příčin nemítvalo vždycky zvláštního výběřčího desátku papežského, nýbrž bývalo někdy jen k tomu účelu rozdělováno na dvě polovice, tak že v jedné vybíral desátek děkan Kauřimský, v druhé Čáslavský. Bylo-li tomu tak, musila býti roku 1355 nějaká zvláštní příčina, pro kterou k dosazení faráře v Rosochách nebyl vedlé faráře Týneckého ustanoven děkan Kolinský, nýbrž Čáslavský; možná, že zrovna tehdaž nebylo děkanství Kolinské osazeno. Všeliká pochybnost přitom ovšem nemízí. Možná, že by se dala věc lépe vysvětliti prohlídnutím všech knih *confirmationum* v tom směru, co se týče všech zmínek o dosazování farářů v místech náležejících ku Kolinskému děkanství; což mi však na tu chvíli nebylo lze předsevzítí, poněvadž jsem neměl knih těch právě při ruce, než toliko, co jest z nich vydáno tiskem péčí P. Tingla.
